## General background and general reporting principles

**General background**. The report presented below ("risk report") has been prepared according to the reporting directives of the Supervisor of Banks on "disclosure requirements detailed in the third Pillar of Basel and additional information on risks".

It is noted that the updated instruction has clearly defined the frequency of the quantitative and qualitative disclosure requirements. Whereas, a significant part of the disclosure requirements has been defined as disclosure required on an annual basis only, this report should be read together with the risk report published as part of the Annual Report for 2022, together with the Annual Report for 2022 and the Second Quarter of 2023 Report. For further details, see the Risks Report published as part of the Annual Report for 2022.

**General reporting principles**. Towards the publication of the first risk report, as part of the annual report for 2015, general reporting principles had been determined, that were validated and updated within the framework of the preparations for the implementation of the updated reporting directive, all subject to the reporting directives.

- The risk report is an integral part of the annual report, and respectively, the processes applying to the annual report shall apply to it (including: controls and procedures regarding internal control over financial reporting (SOX), statements by the President & CEO and the Chief Accounting Officer regarding the disclosure);
- In order to present an appropriate report and avoid repetition of details, it has been determined that the principal disclosure document in the risk management field would be the risk report. With respect to issues requiring disclosure in two of the documents the extended disclosure shall be presented in the risk report while in the Chapter "Risk review" in the Board of Directors and Management report a very concise summary shall be presented, with reference to the risk report. With respect to issues that require specific disclosure relating to the "Risk review" Chapter disclosure would generally be presented only in this chapter;
- The risk population to which the Bank relates will be in line with the risks identified and presented in the framework of the assessment of the capital adequacy (ICAAP);
- The disclosure will describe the principal activities of the Group and the significant risks, based on relevant data and information;
- The disclosures will include qualitative information and sufficient quantitative data on procedures of the Group for the identification, measurement and management of risks. The level of details given in the disclosures should be proportional;
- In order to assist users to understand in an optimal manner the Group's risk tolerance/risk appetite, the disclosure shall be flexible in a way that enables to reflect the manner in which senior Management and the Board of Directors assess and manage risk and strategy internally within the organization;
- A mechanism of a controlling nature has been established securing the appropriateness and relevancy of the disclosures included in the report, based on the work processes applied in the framework of assessment of the capital adequacy (ICAAP) and of the preparation of the quarterly risk document;
- Attention should be paid to especially material changes in data and to the study of the need to provide explanations for such changes.

## Main developments in the first half of 2023

Issue of debt instruments within the framework of an international private placement. On January 26, 2023, the Bank completed an international private placement of US dollar bonds, being the first in its history, in a principal amount of US\$800 million ("the bonds"), which were issued to institutional investors, within the meaning of the term in the Articles of the Tel Aviv Stock Exchange Ltd. ("the Stock Exchange" and "the issue", respectively).

The bonds were issued at a price of 99.935% of their par value. The gross proceeds of the issue amounted to US\$799.48 million. The issue price comprises a margin of 190 basis points over that of US government bonds of an identical average period to maturity.

The bonds have been registered for trading on the "TASE-UP" system of the Stock Exchange.

**IDB Bank**. For details regarding proceedings concerning certain matters relating to IDB Bank's compliance plan, see "Legislative Restrictions, Regulations and Special Constraints applicable to the International Operations" in section "International Operations Segment – Additional Details" in the Second Quarter of 2023 Report.

## The banking corporation's approach to risk management

For details see in the Risks Report, which was published as part of the 2022 Annual Report (pp. 6-16). For details on the Risk profile of the Discount Group and for details on Risk Factors Table, see in the Chapter C to the Directors and Management Report - "Risks review" in the 2022 Annual Report (pp. 63-64, 109-112).

## Material leading and developing risks

The Bank considers macro environment risk, business model risks, cyber and data protection risks, model risks and environment and climate risk, as the most significant developing leading risks. For additional details see in the Risks Report, which was published as part of the 2022 Annual Report, and is open for review on the Bank's Internet website, on the MAGNA website of the Israel Securities Authority and the MAYA website of the Tel Aviv Stock Exchange Ltd. (pp. 16–17).

## Weighted risk assets review (OV1)

Total tier 2 capital	7,434	6,275	6,878

For details on the connection between the balance sheet and the components of the regulatory capital, see the Risks Report, which was published as part of the 2022 Annual Report (pp. 118–124).

## Capital adequacy

For details on "Evaluation of capital adequacy" as well as "Capital planning process", see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review as stated (pp. 22–25).

## Leverage ratio

**General**. The leverage ratio is defined as the capital measurement divided by the exposure measurement. The capital for the purpose of this measurement is the common equity tier 1. The exposure measurement is the sum of the balance-sheet exposures, the exposures to derivatives, the exposures to securities funding transactions and off-balance-sheet items (for details on the factors which may affect the leverage ratio, see Note 25 item 2 to the financial statements as of December 31, 2022, p. 231.

# Comparison between Balance sheet assets and the measurement of exposure for the purpose of the leverage ratio (LR1)

Footnotes

## Credit Risk

**General**. Credit risk is the risk of material impairment to the value of the Group and its ability to attain its goals as a result of deterioration in the ability of a borrower or counterparty to honor their obligations towards the Bank, in whole or in part.

For general information on credit risk quality (CRA), see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review on the Bank's Internet website, on the MAGNA website of the Israel Securities Authority and the MAYA website of the Tel Aviv Stock Exchange Ltd. (pp. 28–35) and in the Second Quarter of 2023 Report.

<sup>(1)</sup> The Tier I capital and the total exposure are presented after the relief granted by the Supervisor of Banks for the efficiency plans.

<sup>(2)</sup> The amounts of exchange costs and the addition in respect of the future potential exposure multiplied by the Alpha coefficient used for the computation of the regulatory exposure at default (EAD), according to the standardised approach to counterparty credit risk (SA-CCR).

#### Footnotes:

- (1) Balance Sheet and Off-Balance Sheet Credit Risk, including for derivative instruments. Including: Debts<sup>10</sup>, bonds, securities borrowed or purchased under agreements to resell, assets for derivative instruments, and credit risk for off-balance sheet financial instruments, as calculated for single borrower liability limitation, guarantees and liabilities on account of clients in an amount of NIS 266,971 million, NIS 52,707 million, NIS 1,024 million, NIS 2,969 million, NIS 131,421 million, respectively.
- (2) Credit to the Public, Credit to Governments, deposits with banks and other debts, excluding investments in bonds and securities borrowed or purchased under resale and assets for Maof Market operations.
- (3) Credit risk for off-balance sheet financial instruments, as calculated for single borrower liability limitation, excluding for derivative instruments.
- (4) Including for off-balance sheet credit instruments (stated in the balance sheet under "Other liabilities").
- (5) Balance sheet and off-balance sheet, credit risk, which is non-accruing, substandard or under special mention.
- (6) Including acquisition groups in an amount of NIS 311 million.
- (7) Including mortgage backed securities in the amount of NIS 7,956 million, issued by GNMA and in the amount of NIS 234 million, issued by FNMA and FHLMC.
- (8) Including mainly municipal bonds and bonds of states in the U.S.
- (9) Including credit facilities guaranteed by banks outside the Group in the amount of NIS 10,195 million.
- (10) Credit risk, the credit rating thereof at date of reporting matches the credit rating for the granting of new credit according to the Bank's policy.
- (11) The balance of commercial debts includes housing loans in the amount of NIS 107 million, which are combined in the layout of transactions and collateral of commercial borrowers' business, or which were granted to acquisition groups, the projects being built by them are in the course of construction.

#### Footnotes

- (1) Balance Sheet and Off-Balance Sheet Credit Risk, including for derivative instruments. Including: Debts<sup>(2)</sup>, bonds, securities borrowed or purchased under agreements to resell, assets for derivative instruments, and credit risk for off-balance sheet financial instruments, as calculated for single borrower liability limitation, guarantees and liabilities on account of clients in an amount of NIS 251,036 million, NIS 43,001 million, NIS 857 million, NIS 2,363 million, NIS 122,149 million, respectively.
- (2) Credit to the Public, Credit to Governments, deposits with banks and other debts, excluding investments in bonds and securities borrowed or purchased under resale and assets for Maof Market operations.
- (3) Credit risk for off-balance sheet financial instruments, as calculated for single borrower liability limitation, excluding for derivative instruments.
- (4) Including for off-balance sheet credit instruments (stated in the balance sheet under "Other liabilities").
- (5) Balance sheet and off-balance sheet credit risk, which is impaired, substandard or under special mention, including for housing loans, for which an allowance is made according to the extent of arrears, and housing loans for which no allowance is made according to the extent of arrears, and are in arrears of 90 days or more.
- (6) Including acquisition groups in an amount of NIS 519 million.
- (7) Including mortgage backed securities in the amount of NIS 6,724 million, issued by GNMA and in the amount of NIS 239 million, issued by FNMA and FHLMC.
- (8) Including mainly municipal bonds and bonds of states in the U.S.
- (9) Including credit facilities guaranteed by banks outside the Group in the amount of NIS 9,407 million.
- (10) Credit risk, the credit rating thereof at date of reporting matches the credit rating for the granting of new credit according to the Bank's policy of the Bank.
- (11) The balance of commercial debts includes housing loans in the amount of NIS 218 million, which are combined in the layout of transactions and collateral of commercial borrowers' business, or which were granted to acquisition groups, the projects being built by them are in the course of construction.
- (12) Reclassified following improvement of data.

#### **Credit Exposure to Foreign Financial Institutions**

About 98% of the exposure as of June 30, 2023, is to financial institutions rated "A-"rating or higher, similar to December 31, 2022. For additional details, see the Report for the second quarter of 2023.

#### Drafts and Instructions published during the first half of 2023

**High risk transactions for the purchase of land**. An update of a Q&A file was published on January 23, 2023, for the implementation of Proper Conduct of Banking Business Directive dealing with capital adequacy requirements: following entry into effect of higher capital requirements in respect of high risk transactions for the purchase of land, the need had arisen for clarification relating to the manner of calculating the financing ratio.

Adopting consumer measures in a changing financial environment. On February 26, 2023, the Supervisor of Banks published a letter regarding adoption of consumer measures in a changing financial environment, in which it is stated that banking corporations are expected to adopt different measures for the monitoring of borrowers wishing to prepare for situations of possible difficulty in the monthly repayment of their debt, and invite them to examine different ways of mitigating their cash flow situation, as well as continue to study alternatives relating to the customer's compliance with the monthly repayments, all while providing a suitable, timely and professional response to the customer's approach and needs, while focusing on singular characteristics of the different population groups and on the different channels and languages by which the service is provided.

#### Financial Stability Report for the first half of 2023

On August 2, 2023, the Bank of Israel published the said Report, the principal items of which are: The local financial system remained stable. The uncertainty concerning the legislation amendments has increased the risk premium of the economy, which was accompanied by a devaluation of the exchange rate which contributed to inflation, by a decline in prices of shares and by increased fluctuation in the foreign currency market and in the financial markets. The security buffers accumulated by households and corporations strengthened their durability in facing potential turbulence. The financial system in the economy has been affected by two main factors: one, the continuing monetary tightening and the slowing down of economic growth in Israel and globally; and the other, the effect of the uncertainty surrounding the implications of legislation amendments relating to the legal system in Israel upon the performance of the economy and on the financial system as a whole. The Bank of Israel estimates that if these processes - in Israel and globally - intensify, they may challenge the system in the medium range. The required monetary tightening due to the continuing inflation and the slowing down of economic growth were reflected in the rising risk indices – and with them in pricing - in the real estate market and in the financial markets, and by an increase in credit costs. On this background, households and businesses are facing the increased burden of servicing debts. Despite the growing amount of the monthly repayment of debts, the repayment ability of households - principally respecting housing loans - remained high. Notwithstanding the above, consumer credit originating outside the banking system, recorded a certain increase in the rate of arrears. In the business credit, risk indicators increased with respect to the construction and real estate sectors, to which the financial system is particularly exposed. No deterioration is noticed in the other economic sectors.

Footnote:

(1) Improvement of data.

## Market Risk

For the general qualitative disclosure on market risks (MRA), see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 57–72).

## Quantitative disclosure

### (1) Limitations set by the Board of Directors

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 60).

### (2) Interest Risk Exposure

#### General

The risk of loss, stemming from parallel and non-parallel movements in the return graph, and the impact of the optionality embedded in different financial instruments.

Relation between balance sheet items and the positions included in the disclosure of Market risk

The Group differentiates between two classes of portfolios: the trading portfolio and the banking book. These portfolios differ in the nature of exposure to market risks, reflected also in the management tools used in managing their market risks.

- The trading portfolio comprises of positions in financial instruments held for trading or with the aim of earning gains in the short-term. These positions are marketable and may be hedged in full. As a general rule, the trading portfolio is held by the dealing room and in trading bonds portfolios held by the "Nostro" unit.
- The banking book all balance sheet assets and liabilities and the off-balance sheet items of the Group that are not included in the trading portfolio.

The risk indices used for the overall interest risk management, are presented in detail in the item "Additional information on exposure to market risk" below.

The models used for the management of interest risk in the banking portfolio only, are presented in detail in the Chapter "Interest risk" (IRRBB) in the banking portfolio below.

Actual exposure	(396)	(409)	(149)	(609)		
Limitation set by the Board of Directors	(1,858)	_	(1,676)	-		

The increase in the results of the scenario in the first half stems from the updating of the parameters of the scenario and not as a result of a change in exposure. The results of the scenario based on the old or the new parameters would have led to similar results in both periods.

#### Indices and additional models

#### The Value at Risk (VaR)

**The VaR of trading operations**. The VaR for the trading activity is calculated at daily intervals using the historical (hybrid) method, using a confidence level of 99% and a time horizon of one day.

The Board of Directors has set specific limits for the VaR on trading activity. No exceptions to the limits were recorded in the second quarter of 2023.

This estimate serves as one of the main tools in the management of the trading activity.

#### Details of the exposure in terms of - VaR in trading activity

Footnote:

The VaR calculated for 1 business day and profitability of 99%.

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 64).

For details on loss analysis in extreme scenarios (Stress Tests) and analysis of the anticipated interest income the NII (Net Interest Income) and the EaR (Earning at Risk) model, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 65).

### (4) Inflation and exchange rate exposure

The Bank's Exposures to inflation and foreign currency exchange rates is performed from an economic perspective, taking into account the exposure's implications on accounting fluctuations where the accounting and the economic perspectives do not align. The measurement of the risk is performed through calculating the surplus/shortfall of assets to liabilities after including economic revisions.

The actual management of the exposures is conducted on a daily frequency on the basis of economic positions in the various linkage and currencies segments, which differ from the accounting positions which may be seen in Note 32 to the financial statements as of December 31, 2022. The principal change stems from the transfer of linkage segments of pension liabilities for payroll and additional employee rights (from the shekel accounting-measurement segment to the economic-measurement linked segment).

Other changes are: the non-inclusion of losses or gains resulting from changes in the market value of foreign currency or index-linked bonds; the addition of foreign currency fixed assets as financial assets; the transfer of non-performing impaired foreign currency debts to the shekel-linked segment; and the addition of exposure to foreign currency in the severance pay fund for Bank employees (BLD) (only the difference between the severance pay provision and the value of the deposits with the fund is recorded in the accounting positions). The hedge relating to the structural position in foreign currency stemming from the investment in IDB Bank has been removed in order to reduce the sensitivity of the capital ratio to changes in exchange rates.

The mix of investments in the various linkage segments is determined on current basis within the framework of the limitations presented below and on the basis of forecasts regarding the relevant market variables.

The exposure is measured separately for each material currency.

#### Actual distribution of investment of the equity in relation to the set limitations (the data is stated in relation to the equity)

		Seco	nd Quarte	r of 2023		The year 2	2022	
					Position ra	nge		
Segment	Limitation	Year end	From	То	Average	Year end	From	То
CPI linked*	80%-(80%)	44.7%	43.8%	45.2%	44.6%	40.7%	33.9%	40.7%
Foreign currency	15% - 30%	19.5%	18.5%	19.8%	19.3%	17.6%	16.8%	17.6%
Footnote:								

\* Timing of economic position computation: the managed position is computed on the basis of the capital data as of the end of the previous quarter together with changes occurring during the last quarter until date of the computation. These changes are based on data that is not final as it is known at date of computation. On the other hand, the position in the linkage balance sheet is computed on the basis of audited data used in the framework of the financial statements.

## 20 23

The Group's underlying exposures presented in the above Table is based upon a monthly average. Notwithstanding, exposure management in each material subsidiary is conducted in an effective manner and at least once a week. In the Bank's opinion, the exposure to the various linkage bases at the end of the period characterizes the exposure during the period.

### (5) Management of positions in the trading portfolio

**Trading portfolios**. The Group distinguishes between exposure created in the course of managing the Bank's assets and liabilities and exposure to trading. Generally, trading exposures exist only at the parent company and they are concentrated mostly in the dealing room as part of the activity of the Bank as a "market maker" in government bonds in foreign currency and in derivatives. Occasional trading exposures occur at the subsidiaries in immaterial volume. The trading activity is intended at creating income while creating exposure within the approved risk limits for this activity, and maintaining daily and sub-daily monitoring and control.

As stated, trading activity is mainly focused on the dealing room, which both conducts trading with customers and transactions hedging the risks, and operations to generate profit as part of the management of market risks. In addition, a non-significant trading portfolio exist at the investments unit.

The Board of Directors has determined additional sets of limits pertaining to trading activities and to asset and liability management activities. Limitations on various trading activities were determined in terms of scope of activity, and in terms of sensitivity to risk factors including the VaR and the theoretical loss involved in stress tests. The limitations are monitored on a daily and intra-day basis by the control units of the Financial Markets Division. The Head of the Division has set a series of internal limits, within the framework of the limits set by the Board of Directors, aimed at providing advance warning when the Board of Directors' limits are approached and thereby preventing such limits being exceeded

Activity in derivative financial instruments. The Bank is active in a wide range of derivative financial instruments both in shekels and in foreign currency and acts also as a "market maker" for some of which. A substantial part of the transactions is made "over the counter" (OTC) according to customer needs and those of the Bank. The price determination for these transactions is based on returns and prices of base assets using accepted pricing models and taking into account market competition.

The market exposures, which are created as a result of activity in derivative financial instruments, both for inflation and foreign currency exchange rates and also for interest, are included within the framework of the Board of Directors' various limits. The counterparty exposures are managed under agreements for the transfer and set-off of collateral and vis-à-vis central clearing houses.

In addition, the Board of Directors has determined the variety of financial instruments available for the transaction of business by the Bank and the mode of the Bank's operation in each of them (whether on behalf of its customers of or its own account). In addition, limits of the Head of the Financial Markets Division were set for the scope of activity according to the types of instruments intended to delimit the operational risk involved in its activity. The volume of activity for a certain instrument does not necessarily represent the level of financial risk inherent therein.

The total exposure and compliance with the Board of Directors limits are being measured and controlled on an ongoing basis by control functions of the first line of defense.

No deviations from limitations set by the Board of Directors were recorded in the second quarter of 2023.

The Bank's transactions in derivative financial instruments are made partly with banking institutions or with Tel-Aviv Stock Exchange members, who are subject to capital adequacy requirements or compliance with the level of security required by the Tel-Aviv Stock Exchange, and partly with other Bank's customers, who provide security according to the Bank's procedures.

**Activity in the Ma'of market**. The Bank operates in the Ma'of share index market only on behalf of customers, while maintaining the security level required by the Tel-Aviv Stock Exchange. The Bank operates in options on the dollar exchange rates in the Ma'of market both on customers' behalf and on behalf of the Bank itself.

#### Accounting data as to the volume of operation in derivative financial instruments of the Bank and its consolidated subsidiaries

	June 30, 2023	December 31, 2022
	in NIS n	nillions
Not for trading derivatives	92,545	77,571
Of which: hedging derivatives	13,623	9,811
Trading derivatives	417,713	370,618
Total	510,258	448,189

**Accounting aspects**. The accounting policy with regard to the measurement of the value of derivative financial instruments and the results thereof, type of derivative financial transactions and instruments according to the directives of the Supervisor of Banks, is stated in Notes 1 D 6 and 28 to the financial statements as of December 31, 2022 (pp. 154-155, 246-252).

According to the said directives of the Supervisor of Banks, most of the transactions in derivative financial instruments made by the Bank for managing market risks resulting from its financial base assets (ALM) are classified as "ALM transactions" and not as "hedging transactions". In terms of the said directives more stringent criteria have to be complied with so that transactions in derivative financial instruments could be considered as "hedging transactions". The majority of base assets, the exposure of which to market risk, as stated, was managed by derivative financial instruments, are not marketable. Income and expenses generated by such assets are recognized on the accrual basis to the statements of profit and loss while the results of the transactions in derivative financial instruments defined as "ALM transactions" are computed, according to "fair value". Accordingly, no correlation exists between the recording of the base assets and the results they produce according to generally accepted accounting principles and the transactions in derivative financial instruments for those base assets, which are classified as "ALM transactions". Details of financing income from derivative financial instruments are presented in Note 3 to the financial statements as of December 31, 2022 (p. 163).

**Option risks**. Option risks relate to the loss that might be incurred as a result of changes in base assets and the volatility thereof, which affect the value of such options, including standard deviations. The Bank is active in a variety of types of options— vanilla options and "exotic" options of certain types as well as on a variety of base assets (foreign currency and interest rates).

The Bank's Board of Directors has set out guidelines regarding the permitted activity in options both as regards overall volume and in terms of the maximum impairment in value under stress tests and in cases of moderate scenarios. The scenarios relate to simultaneous changes in exchange rates, indices and in the volatility of base assets. In addition, the document by the Head of the Financial Markets Division includes limitations on maximum changes in the value of the option portfolio in terms of sensitivity indices ("GREEKS").

No deviations from limitations set by the Board of Directors were recorded in the second quarter of 2023.

## Market risk according to the standardized approach (MR1)

The Bank computes the capital allocation required for the exposure to market risks according to the standardized approach, as prescribed by Proper Conduct of Banking Business Directive No. 208. The allotment to market risks includes:

- Interest and shares risks resulting from instruments in the trading portfolio. The interest risk is computed by the "periods to maturity" method;
- Foreign exchange risk of the banking corporation as a whole (eliminating a structural position for IDB Bank according to the approval of the Supervisor of Banks).

In addition, for each of the above mentioned risks, an optional component shall be added, according to the "delta plus" method of the instruments included.

#### Details of capital allocation to market risks according to the standard approach

	Capital allocation as of	
	June 30, 2023 December 31, 202	
	In NIS millions	
Interest rate risk*	551	419
Foreign exchange rate risk	86	24
Share risk	1	
Option risk	12	10
Total for the Banking Group	650	454
Allocation in risk asset terms	5,200	3,633

<sup>\*</sup> Including the specific risk in the amount of NIS 1.6 million and NIS 1.8 million in June 2023 and December 2022, respectively.

The allocation to market risks in risk asset terms comprises approx. 2.0% of the total risk assets as of June 30, 2023, compared with approx. 1.46% as of December 31, 2022.

## Interest rate risk in the banking book (IRRBB)

For details on behavioral economic models integrated in risk management and on behavioral assumptions applied in the assessment of interest risks, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 68–69).

For quantitative information on interest risk in the banking book and the trading book, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 70–71).

Draft of update to Proper Conduct of Banking Business Directive no. 333 regarding interest rate risk in the banking book (IRRBB). The draft was distributed on May 24, 2023 and reflects the adoption of the Basel Committee's revised document. The draft puts forward principles pursuant to which a banking corporation will be required to manage the IRRBB and, in particular, requirements to take proactive action to identify, measure, monitor, control, and disclose such risks. The principal revisions to the IRBB management principles in the draft are as follows: more detailed guidelines regarding the manner in which the IRRBB is to be managed and, in particular, with regard to developing stress and shock scenarios in implementing interest–rate risk measurement (Principle 4), with regard to key behavioral and modelling assumptions in managing IRRBB (Principle 5), and with regard to the internal validation process that needs to be implemented for the internal measurement systems (IMS) and the models that are used to measure the IRRBB (Principle 6); a standard framework (optional or binding, as decided by the Supervisor of Banks) for managing IRRBB; redefining the "outlier banking corporation" test (set out in Principle 12).

A draft Q&A file relating to the implementation of the updated directive was distributed together with the draft. According to the draft, it will go into effect from December 31, 2024.

### **Shares Risk**

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 71–72).

## Liquidity risk

Liquidity risk is the risk to the stability of the Group stemming from the inability to provide for its liquidity needs and the difficulty to honor its obligations, due to unexpected developments, as a result thereof the Group would be

compelled to raise funds and/or realize assets in a way that would result in a material loss. The Bank has determined a maximum exposure limitation to the liquidity risk.

## Liquidity risk – qualitative disclosure and additional disclosures in respect to the liquidity coverage ratio (LIQA)

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 74–80).

## Liquidity coverage ratio - Proper Conduct of Banking Business Directive No. 221 in the matter of "liquidity coverage ratio"

For details on the Proper Conduct of Banking Business Directive No. 221 in the matter of "liquidity coverage ratio", see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 77–78).

#### The liquidity coverage ratio of the Discount Group

As of June 30, 2023, the ratio amounted to 135%, compared to 131.1% on December 31, 2022. The average liquidity ratio in the second quarter of 2023 amounted to 134.5% as compared with an average ratio of 130.5% in the fourth quarter of 2022.

The liquidity ratio has risen despite the growth in the credit portfolio as a result of the issuance of debt effected at the first half of the year, and the pledging of the mortgage portfolio.

The liquidity coverage ratio is based on a high and quality liquidity buffer. The liquidity buffer is based in shekels on the short-term loan (MAKAM), on Israel government bonds and on current account balances and deposits with the Bank of Israel. In foreign currency, the buffer is based on U.S. government bonds (in IDB Bank on the MBS portfolio, most of which issued by government and semi government agencies) and on current account balances and deposits with the Bank of Israel and the FED.

#### Details of the composition of the liquidity buffer

		For the perio	od ended
		June 30,	December 31,
	Assets included	2023	2022
		in NIS mi	llions
Buffer 1	Cash	46,125	56,890
	Israel Bonds/Short-term loans (MAKAM)	13,966	9,054
	Foreign bonds	11,285	12,110
Buffer 2	Sovereigns bonds	25	224
	Mortgage bonds issued by public corporations	129	322
	Corporation Bonds AA	798	609
Buffer 2 b	Corporation Bonds A	203	228
Total		72,531	79,437

The computation of the Group liquidity coverage ratio is based on an independent calculation of each of the Group companies. The Bank's Management has defined for each Company in the Group a minimum target for the liquidity coverage ratio. The transfer of liquidity from IDB Bank to its parent company (the Bank) is limited by local regulation, and therefore, the recognition of surplus liquidity of IDBNY in the group model, is limited accordingly. The surplus of Mercantile Discount Bank, operating under a regulatory framework identical to that of the Bank, is included in the Group model.

Most of the liquidity surplus of the Group originates in the liquidity surplus of the Bank.

#### Distribution of the liquidity coverage ratio (average for the quarter) according to the legal entities within the Group

	For the per	iod ended
	June 30, 2023	December 31, 2022
	In	%
Discount Group	134.51%	130.47%
The Bank	156.34%	145.42%
IDB Bank	137.62%	112.17%
Mercantile Discount Bank	131.68%	134.18%
Total	134.5%	130.5%

Concentrating the liquidity surplus at the Bank allows for much flexibility in the management of the Group's liquidity. Alongside the expectation for the independent management of the liquidity risk by the subsidiaries, the Management of the Group is able to shift liquidity between the companies in the Group.

#### The liquidity coverage ratio in the principal currencies

The Bank measures also the liquidity coverage ratios in the principal currencies. As of June 30, 2023, the coverage ratio in shekels was 123.8% compared with 115.6% at December 31, 2022. The increase in the ratio stemmed mostly from the pledging of the mortgage portfolio, issuance of debt and from the effect of Shekel/Dollar swap transactions.

The liquidity coverage ratio as of June 30, 2023, respecting the total of foreign currencies, amounted to 191.8% compared to 234.8% on December 31, 2022. The decrease in the ratio stemmed from the effect of Shekel/Dollar swap operations.

The liquidity coverage ratio with respect to US dollars as of June 30, 2023 was 184.3% as compared with 212.2% on December 31, 2022. The decrease in the ratio stemmed from the decline in inflow of cash due to Dollar/Shekel swap operations.

In Euros, the liquidity coverage ratio at June 30, 2023, was 91.4% compared with 160.7% at December 31, 2022. The decrease in the ratio stemmed from the effect of Dollar/Euro swap operations.

The Discount Group has a surplus of resources in foreign currency over applications, principally in U.S. dollars and in Euro. Accordingly, the Bank, invests its surplus liquidity in securities, bank deposits and in the interbank foreign currency/shekel SWAP transactions market. This activity allows the Bank to regulate the use of this surplus between liquidity considerations and yield considerations.

#### Financing risk - available and unrestricted assets

The Bank pledges assets belonging to the liquidity buffer for several purposes, with an emphasis for use as collateral for financial transactions with entities as the Stock Exchange, the Bank of Israel, etc. As a general rule, all pledged liquid assets are excluded from the liquidity buffer for the purpose of the daily measurement, except for assets pledged to secure the ability to realize liquidity, which in fact has not been utilized. These are being excluded only upon utilization. Collaterals pledged in favor of the Bank, are not recognized in the liquidity buffer.

#### **Available and unrestricted assets**

	June 30, 2023	December 31, 2022
	In NIS n	nillions
Total assets as of	118,338	119,002
Liquidity requirement	9,043	10,233
Of which pledged	23,912	21,660
Of which provided as collateral	976	894
Total available assets	84,407	86,215

## Additional risks

## Operational risk

Operational risk is the risk of loss caused by impropriety or by the failure of internal procedures, individuals and systems or as a result of external events. The operational risk is inherent in all business lines, products, systems and the work processes performed at the Bank. Accordingly, awareness and management of the operational risk at all levels of duty are of importance.

For additional details on operational risks, including risk of fraud and embezzlement, business continuity and outsourcing and supplier risk, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review on the Bank's Internet website, on the MAGNA website of the Israel Securities Authority and the MAYA website of the Tel Aviv Stock Exchange Ltd., as stated (pp. 83–89).

### Other risks

## Information technology risk management

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 89–90).

#### Data and cyber protection risks

#### Threats in the cyberspace

In the second quarter of 2023, there were no one or more cybernetic incidents that materially affected the products or services offered by the Bank or by the Group, their relation with customers or the competitive conditions. A number of outstanding trends were noted in April–June of 2023:

- As part of the OP-ISRAEL events, many websites experienced DDOS attacks (deprivation of services);
- Continuation of cyber attacks on various organizations in Israel, by Iranian cyber groups, and on Internet websites, by pro-Palestinian groups relating themselves to Anonymous.

For additional details on data and cyber protection risks, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 90–93).

#### **Environmental and climate risks**

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 93-95).

#### Legal risks

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 95-97).

### **Compliance risks**

**Discount Group's activities with banks acting in the Palestinian Authority**. In 2018, the Bank received immunity letter and indemnity letter signed by the State of Israel. Following extension, the indemnity letter and immunity letter are in effect until May 31, 2021.

On the background of the delay in the start of operation of the Correspondence Government Company, that had been established but has not yet begun operations for providing services for banks operating in areas of the Palestinian Authority, the validity of the letters of indemnity and immunity has been extended twice more, until March 31, 2023. At the request of the Bank and MDB, an amended letter of indemnity was received on February 9, 2023, by which, inter alia, the State is committed to indemnify the Bank and MDB in an amount of up to NIS 2 billion, for each indemnifiable event. The commitment of the State to indemnify is subject to limits and terms that the banks have to abide with, similarly to the limits and terms stated in the original letter of indemnity. The power of the letter of indemnity and the letter of immunity was extended until March 31, 2024.

In light of the aforesaid, the Bank for the moment is continuing to provide services to banks operating in the Palestinian Authority.

For additional details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 97–102).

#### **Conduct risk**

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 102).

#### **Exposure to cross-border risks**

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 102–104).

#### Strategic risk

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 105).

#### Reputation risk

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 105–106).

#### Model risk

For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 106).

**Draft of new Proper Conduct of Banking Business Directive regarding "Model Risk Management"**. The draft was published on June 11, 2023. The draft describes the main aspects of effective model risk management, and also applies to models that include or are based on artificial intelligence, which could expose the banking corporations to new risks or could accentuate existing risks. The draft defines the term "model" and model risks, and prescribes provisions regarding corporate governance, policy and controls, as well as provisions and clarifications regarding the development, application and use of models and their validation. Pursuant to the draft, the directive will go into effect within a year of its publication (other than with regard to exceptions).

### Compensation to senior officers

For details on compensation to senior officers, according to the provisions of Regulations 21 and 22 of the Securities Regulations (Periodic and Immediate Reports), 5730–1970, see under "Corporate governance, audit and additional details of the banking corporation's business and the management thereof" in the 2022 Annual Report (pp. 333–337). For details, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 107–114).

## Addendums

For details on linkages between the financial statements and regulatory amounts, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (pp. 115–124). For details on Securitization, see the document regarding "Disclosure according to the third pillar of Basel and additional information on risk", which was published as part of the 2022 Annual Report, and is open for review, as stated (p. 125).

August 13, 2023 Shaul Kobrinsky Avi Levy Orit Caspi

Chairman of the President & Executive Vice President

Board of Directors Chief Executive Officer Chief Risk Officer

## Glossary

Management quality	Assessment of the appropriateness and effectiveness of risk management (effectiveness of the controls).
Key Risk Indicator	Means/pointer showing the risk exposure situation in relation to the risk.
Failure event	An event where risk is realized, whether or not causing damage to the Bank.
Gross credit	Balance sheet or off-balance sheet credit, before credit risk mitigation (CRM), before conversion to credit
	(CCF) and before allowances for credit losses.
Off-balance sheet credit	Includes: unutilized binding facilities, guarantees, documentary credit and derivatives.
	Binding facilities— any presentation by the corporation to its customer for the granting of credit (balance
	sheet and/or off-balance sheet) whether in writing or orally or in another manner of conduct where it can
	be expected that a reasonable customer would rely on such presentation as one which binds the Bank.
Balance sheet credit	Credit (to the public, governments) and bonds.
Collateral	Different assets (marketable and nonmarketable) designated to secure the repayment of customer debts,
	when the customer defaults on the current repayments agreed between him and the Bank.
Credit Risk Mitigation	Items offsetting risk permitted according to the rules of Basel II (mainly: liquid collateral pledged as
(CRM)	required). According to these rules, the Bank, when computing the capital requirements, may reduce its
	credit exposure to the counterparty, thus taking into consideration the effect of the collateral.
Allowances for credit	A provision created by the Bank to cover possible losses on its customer indebtedness. The Bank of Israel
losses	guidelines require that specific and group provisions should be created. Allowance for credit losses on a
	specific basis – an allowance required to cover expected credit losses for debts examined on a specific basis
	and found to be impaired. Allowance for credit losses on a group basis – an allowance for large groups of
	debts (performing and nonperforming) including allowances for credit losses for housing loans measured
	by the "extent of the arrears period" method.
Debt under special	A debt having potential weaknesses that require special attention by the Management. If such weaknesses
mention	remain unattended, the result might be deterioration in the prospects of repayment of the credit, or in the
	Bank's status as a creditor.
Substandard debt	A debt insufficiently secured by the present value based on the collateral and the repayment ability of the
	debtor, creating a clear possibility that the Bank will sustain a certain loss if the deficiencies are not rectified.
	It is required that the weakness endangering the repayment of the debt should be well defined.
Impaired debt	A debt the Bank estimates it will not be able to collect the amounts due to it and in the due dates per the
	debt agreement.
Liquidity coverage ratio (LCR)	The ratio of total high quality liquid assets to total net cash outflows during the next thirty calendar days.
Business goal	A defined business target in quantitative or qualitative terms, subject to restrictions of the risk appetite.
Recorded amount	The balance of a debt, including recognized accrued interest, unamortized premium or discount, differed
	commissions or deferred costs charged to the debt and not yet amortized, after deduction of any amount
	written off accounting wise. Non-recognized interest, or interest which had been recognized in the past
	and reversed at a later date, should not be included in the recorded amount.
Uniform macro-economic	A stress test published by the Supervisor of Banks, based on a uniform scenario for all the banking industry
stress test	and on macro-economic parameters formed by the Regulator
Sensitivity tests	A method which assesses the effect of a change in a single risk factor, or in a number of risk factors, on the
	financial condition of the banking corporation (for example: in market risk – steep decline in interest rate;
	in credit risk – steep decline in housing prices).
Restriction (internal)	A statement determined by the Bank, setting out a limit to activity within the framework of the risk appetite.
Capital outline	A detailed plan of the capital ratios forecast for the coming years, which includes the assumptions used for
	the forecast, a description of the expected implications in the capital layers and capital ratios, sensitivity
	analysis of the principal risks, and conformity by the Bank with the capital targets. The capital outline serves
	as a basis for the determination of a recommendation to the Management and to the Board of Directors on
	the capital targets of the work plan, including the capital buffer, the risk asset budget, capital issuance and
	dividend distribution.

## Glossary (continued)

Over the counter (OTC)	Transactions in derivatives not traded on a formal stock exchange, to which the Bank is a party.
derivatives	
Monitoring of capital	Monitoring changes in risk assets and in the capital base of the Group, and an assessment of attaining the
ratios	capital targets as determined by the Board of Directors.
Alert levels	Intended to indicate exposure to risk when it reaches a certain level below the stated restriction.
Risk profile	Assessment of the combined risk inherent in the exposures and in the activity of the Bank
Risk appetite	Reflects the level of risk a corporation is ready to accept, consistently with its business strategy, capital planning, liquidity planning and financing resources of the corporation. The risk appetite includes quantitative restrictions and qualitative goals, which outline the determination of the group business policy in the various risk fields, and comprises a central tool of the Board of Directors for the supervision and control of the risk profile of the corporation.
Available-for-sale	Securities not classified as bonds held to maturity or as trading securities.
portfolio	
Trading portfolio	Composed of positions in financial instruments held with the intension of trading, for the purpose of resale
	within a short period of time, and/or with the intent of earning gains from actual or expected changes in
	prices in the short-term or of realizing arbitrage gains. In order for a financial instrument to be considered
	part of the trading portfolio, it has to be free of any encumbrance on its marketability, or that it may be hedged in full.
Held-to-maturity	Securities for which the Bank has the intention and ability to hold them for a long period of time/to maturity.
portfolio	The portfolio is stated at the rate of return to maturity inherent therein since purchase date.
Stress tests	A risk management method used to assess the potential effects of a specific event and/or a change in a set of
	financial variables on the financial condition of a banking corporation. Traditionally, the focus of stress tests
	is on exceptional events though reasonable.
Credit conversion	Conversion of off-balance sheet items to credit equivalents – according to the standard approach of Basel II,
factors (CCF)	off-balance sheet items are converted to equivalent credit exposure by means of credit conversion
	coefficients.
Credit support annex	An Annex to the ISDA which regularizes the matter of collateral for derivative transactions against the
(CSA)	counterparty. This Annex determines a threshold amount reflecting the maximum exposure which each of
	the counterparties is ready to accept without collateral.
International Swaps	An international agreement which allows the setting off of liabilities and mutual requirements stemming
and Derivatives	from over the counter derivative transactions, in the case of insolvency of a counterparty.
Association (ISDA)	
Foreign Account Tax	In order to reduce tax evasion by American taxpayers, the Foreign Account Tax Compliance Act (FATCA) was
Compliance Act	enacted in 2010 in the United States. Under the FATCA provisions, financial bodies outside the US are required
(FATCA)	to identify and report to the U.S. Tax Authorities, any U.S. citizen or any U.S. resident having a financial account
	with them. This Regulation entered to effect on July 1, 2014. The Regulation is being implemented in many
	countries, including Israel, within the framework of an inter-state treaty signed by Israel and the United States.
