Additional data:			
Share price	1,816	1,552	2,094
Dividend per share	24.45	-	12.41
Ratio of fees and commissions to total assets[4]	0.97	0.97	1.02

Footnotes:

(1) The method of computing the quarterly rate of ROE in annual terms has been changed as from January 1, 2022, in accordance with the accepted practice at US banks. The comparative data was restated accordingly.

(2) The ratio is computed in respect of the three months ended at the end of the reporting period.

(3) The Directive regarding Net Stable Funding Ratio is being implemented as from December 31, 2021.

(4) In annual terms.

For details regarding the decision of the Bank's Board of Directors dated August 11, 2022, to distribute a dividend in the amount of approx. 0.1099 Agorot per share, see below "Dividend distribution" and Note 18 to the condensed financial statements.

Market share

Based on data relating to the banking industry as of March 31, 2022, published by the Bank of Israel, the Discount Bank Group's share in the total of the five largest banking groups in Israel was as follows

	March 31, 2022	December 31, 2021
	In %	
Total assets	15.3	15.2
Net credit to the public	16.3	16.6
Deposits from the public	14.9	14.6
Net interest income	17.5	17.6
Total non-interest income	[1]26.4	21.4

Footnote:

(1) The Bank's data includes profit from realization of assets (see below).

Development of the Discount share

	Closing price at end of the trading day			Change in
	August 9, 2022	June 30, 2022	December 31, 2021	the first half of 2022 in %
Discount share	1,948	1,816	2,094	(13.3)
The TA 5 Banks index	3,415.55	3,183.71	3,420.05	(6.9)
The TA 35 index	1,989.94	1,828.73	1,978.06	(7.5)
Discount market value (in NIS billions)	24.10	22.46	24.37	(7.8)

Goals and business strategy

The strategic plan, which was formed in the course of 2020, directs towards the realization of an ambitious vision of being **the best financial institution for its customers, which creates maximum value to its shareholders over time**. The strategic plan is made up of three central pillars – accelerated evolution of traditional banking, revolution in banking business by way of groundbreaking innovation and maximizing the value of the Group.

First pillar – Accelerated evolution of traditional banking

The Discount Group will accelerate the evolution of banking activity with a view of improving competitive ability and increase its market share and profitability in banking activity. The said acceleration is to be achieved by way of focusing on five areas:

Winning customer experience

Goal: To be the bank with the best customer experience in the system

Changing reality requires us to improve customer experience quickly and qualitatively – customers expect another level of service, and the base for comparison is not necessarily other banks but the organizations leading in customer experience provided by them. Discount shall act to create a differentiating competitive advantage by way of a winning customer experience.

In order to realize this vision and become the best bank for its customers, Discount has introduced a comprehensive strategic project, intended to turn the whole Bank into a customer focused organization. This, by making a significant and extensive effort covering all units of the Bank and leading to a basic and deep change of work processes and of service and behavior principles.

The leading index measuring the success of the change is the customer recommendation index – Net Promoter Score. This index has been successfully implemented by thousands of leading organizations around the world. This index has been proven as directly connected to the increase in income, to attracting new customers and increasing customer loyalty.

Within the framework of this mechanism, the Bank integrated processes involving attentiveness to customers, deep and methodological analysis of feedback from customers through translating the messages into effective initiatives for improving customer experience at all his interface points with the Bank.

Significant growth and increasing market share in focal segments

Goal: Growth at a faster rate than that of competitors in the credit portfolio and in income

- The Bank will act to increase income at a faster pace than market growth, and to maximize the potential of income from interest and fees and commissions, as well as non-interest financing income. The Bank shall endeavor to increase its credit portfolio at a faster pace than market growth, mainly in the housing and commercial banking fields and in additional focal fields;
- In order to enable the said growth, the Bank implements new operational models in retail and corporate banking areas, which are to include, inter alia, changes in service, sales and operating layouts.

Innovation

Goal: Positioning at the front of traditional banking innovation

- The Bank will act to enlarge the offer of digital services with a view of maximizing the usefulness of such services while providing response to expectations of customers and of the period;
- The Bank will leverage advanced data capabilities with the aim of improving value offers to customers and making banking personal, effective and valuable;
- The Bank will continue to intensify relations and cooperation with the fintech community in Israel and abroad, with a view of offering its customers and also customers of all banks, the most advanced services and products, both in banking and related areas.

Banking excellence

Goal: Creating a qualitative organizational platform based on efficiency, operational excellence and a high level of performance

- In order to support all the strategic goals of the Bank, it is the Bank's intention to integrate operational excellence that would support customer experience, would reduce errors and operating risks and assist in obtaining significant efficiency;
- In this respect, the Bank will introduce automation, digitization and improvement of processes enabling greater efficiency, shortening of reaction time and improvement of measurement and monitoring capabilities, and will integrate additional new work methods improving central processes;
- The Bank will continue to perform efficiency measures leading to the reduction in manpower of the Discount Group; optimization regarding real estate areas; and savings in purchase expenditure and other expenses.

Winning organizational culture

Goal: Being the best employer for our employees

With the understanding of the importance and centrality of the Bank's employees in providing the best service to customers and the ability to realize the strategic plan, the Bank will act to strengthen its managers and employees and to design an organizational culture that promotes performance, excellence and continuous striving for improvement. Furthermore, the Bank will act to improve the feeling of commitment and organizational bonding of employees and managers and to modify their skills to the changing environment.

Second pillar – groundbreaking innovation

Goal: Being a leading player in the implementation of groundbreaking banking models that create competition

The financial field in general and banking business in particular, is in the midst of an accelerated process of change. The change is motivated by diverse trends headed by an ever growing transition to digital banking, competition encouraging regulation, entry of new players into the traditional banking areas, and growth in expectation of customers for more varied and customized value offers than in the past.
The competitive and singular positioning of the Discount Group which, on the one hand, is large enough in order to lead a change, and on the other hand is small enough in order not to be deterred by the implications of the change, creates for it a significant opportunity to establish its position as a leading banking-financial group, which encourages competition in the system, and to increase its market share, inter alia, by forming new initiatives, off-banking, based on extensive cooperation with third parties and fintech companies:

- The Bank will act to form initiatives in cooperation with fintech companies and other third parties, for the creation of innovative products and services designed for customers of all banks;
- The first initiative of the Bank, in cooperation with Shufersal, will develop PayBox as the leading digital wallet in Israel, which combines an open platform on which will be offered products and services of third parties to customers of all banks. For details regarding this strategic cooperation, see "Management's handling of current material issues" below.

Third Pillar – maximizing the value of the Group

Goal: Utilization of the synergies between the Group companies and maximization of their value

- The Bank, as a holding company, will continue the implementation of the unique strategies defined for the central subsidiaries – IDB Bank, MDB, Discount Capital and ICC, with the aim of modifying their operations to the new competitive environment;
- The Bank will continue to act to identify and utilize possible synergies among the group companies, both in the field of revenues and in the field of expenditure, which may contribute significantly to the Group's economic value;
- The Bank will continue to promote assembling all Head Office units of the Group companies in a joint campus located in the Millennium Complex in Rishon LeTzion, with the aim of accelerating the realization of synergies and work processes, thus achieving significant real estate efficiency.

The strategic plan goals

Subsequent to updating the strategic plan formulated in 2020, which includes a financial plan for the years 2021 through 2025, and in light of the reduction in the level of uncertainty associated with the Corona crisis and the stabilization of the economy during 2021, the Bank's Board of Directors decided on March 8, 2022 to approve the following goals:

- a return on equity goal exceeding 12.5% in 2025;
- an efficiency ratio goal of less than 55% in 2025;
- a net profit goal which will exceed NIS 3.5 billion in 2025;
- a continuation of dividend distributions in accordance with the existing policy, namely, up to a rate of 30%. As progress is made in executing the plan, the possibility of raising the dividend rate will be examined.

Forward-looking information. The aforesaid reflects the plans of the Bank's Management and its intentions, paying attention to information already in its possession at the time of preparing the reports with regard to the development of the banking sector, to the macroeconomic forecast, including in relation to an increase in the rates of interest and inflation and to the uncertainty associated with planning for several years ahead. Material changes in the economic and regulatory environment or in the geo-political or defense situations, technological developments, actions of competitors operating in the banking sector and other potential competitors, and changes in consumer patterns and customer expectations, which are not under the Bank's control, might results in changes in the ability to execute the Bank's plans as they exist at the time of publishing the statements. For the definition of the term "forward looking information", see "Appendix No. 4 – Glossary".

Material environmental, social and governance aspects. The Bank conducts examination and evaluation of its policy and goals regarding environmental, social and governance matters, especially with respect to matters of the environment and climate, on the background of the amendment to the public reporting directives of December 2021. Following the completion of the process, projects and/or goals regarding the above matters would be integrated into the strategic plan.

Chapter "B" - Explication and analysis of the financial results and business position

Material trends, occurrences, developments and changes

Management's handling of current material issues

The Bank's financial base and its capital infrastructure remain stable and are being stringently managed. The ratio of equity capital Tier 1 amounts to 10.16% and the liquidity coverage ratio amounts to 121.3%. This is the capital infrastructure that allows the Group to continue growing.
The central challenges and issues in the first half of 2022 were:

Increase in capital

On March 30, 2022, the Bank completed a process of issuing shares to the public, comprising 72,994,300 shares of a par value of NIS 0.1 each, in total consideration for approx. NIS 1,428 million. The raising of capital has been made in order to enable the Bank to continue its growth momentum and realize the existing significant potential, while focusing on areas being in the strategic center of the Bank, viz, mortgages and medium businesses, utilizing opportunities arising in the market. The raising of capital has been effected on the background of the sharp increase in yields which occurred in recent months and of the fluctuations in the market, which imbeds a significant rise in probability for the increase and force of interest rates, which temporarily affected the capital reserves and capital ratio.

Issue of debt instruments

On June 2, 2022, the Bank, by means of Manpikim, completed the issue of financial instruments intended to respond to the liquidity requirements and strengthen the infrastructure for the accelerated growth strategy for the credit portfolio of the Bank. In this framework, bonds (Series "N") were issued in a total amount of approx. NIS 1 billion, and at an effective margin of 1.05% and commercial securities (Series 2) in a total amount of approx. NIS 700 million and at a margin of 0.34% over the Bank of Israel interest rate.

Striving for a winning customer experience

In order to realize the vision and become the best bank for its customers, the Bank had introduced a comprehensive strategic effort intended to turn the whole Bank into a customer focused organization. This, in a significant and wide move that would engulf all units of the Bank and lead to a fundamental and deep change of work procedures and of service and behavioral principles.

The index for the measurement of the success of the change is the Net Promoter Score (NPS). This index has been successfully implemented by thousands of leading organizations around the world. It has been proven that this index is directly related to the growth in income, to attracting new customers and to increasing customer loyalty.

Within the framework of this mechanism, the Bank implements processes of listening to customers, of in-depth and methodological analysis of customer feedback and the ability to translate the messages into effective initiatives improving customer experience at all his interface points with the Bank.

As an additional step in striving for a winning customer experience, the Bank has recently introduced a new and quick service of correspondence on the Application, which invites all Bank customers to approach the Bank and receive a reply within one hour at the most.

The Corona crisis

A new virus of the "Corona" type broke out in the first quarter of 2020, spreading quickly to most countries around the globe, causing widespread morbidity and a significant mortality rate. Following the outbreak of the virus, governments around the world, including Israel, have adopted preventive measures, which included restrictions on passage between countries, isolation means even up to imposing a lockdown, restrictions on different types of activities and businesses, etc. The said measures have led to actual impairment of business activity, to a rise in the rates of unemployment, impairment of the economic survivability of businesses and impairment of income and consumption of households. Since then, several waves of the outbreak and fading of the pandemic had been identified. The significant vaccination efforts taken since the beginning of 2021, had led since the month of March 2021, to a decline in the rates of morbidity, allowing a gradual removal of most of the restrictions, and in consequence thereof, recovery in economic activity, a decline in the scope of unemployment and the reduction in Government deficit were noted starting from the second quarter of 2021. An additional considerable outbreak of the pandemic occurred at the beginning of the first quarter of 2022, although the scope of restrictions imposed by the Government on the economic activity in Israel was limited. Following the outbreak of the morbidity, a moderate decline has been noticed in the scope of economic activity in Israel during the second quarter. The pandemic faded in the second quarter of 2022, and the Government removed the remaining restrictions.

Additional issues

- **Strategic cooperation with Shufersal - PayBox Ltd.** On March 29, 2022, PayBox expanded its digital wallet services by entering into an engagement with ICC for the issue of digital credit cards to users of the Application. The issue of digital credit cards began during the second quarter of the year. For additional details, see the 2021 Annual Report (pp. 22-23 and 324) and in the item "Credit Card Operations" below;
- **Changes in the organizational structure.** For details, see "The Human Capital" below;
- **Equity remuneration for officers and to senior employees.** For details, see "The Human Capital" below and Note 23 to the condensed financial statements;
- **Discount Campus.** Construction work on the campus continued in the reported period. For additional details, see Note 10 section 5 to the condensed financial statements and "Fixed assets and installations" below;
- **The "One-Click Mobility" reform.** For details, see the 2021 Annual Report (p. 23);
- **Increase in competition and reduction in concentration Act.** The preparation for changes in the financial system is continuing, both at the Bank and at ICC, following the Increase in Competition and Reduction in Centralization in the Banking Market in Israel Act including an examination of the separation of ICC from the Bank. For additional details, see Note 17 to the condensed financial statements.

Principal economic developments

Presented below are the main economic developments that impacted the economic environment in which the Israeli banking sector, including the Bank, operated in the first half of 2022.

Growth. The global economy is being affected by the war in the Ukraine and due to the rise in commodity prices and impairment to the chain of supply, which had started prior to the outbreak of the war, with the recovery from the Corona crisis, and which accelerated as a result of the war. In consequence thereof, inflation has increased significantly, leading to erosion in consumer income and forces the central banks to raise the interest rate at a fast pace. The US economy shrank in the second quarter by an annualized rate of 0.9%, and on the other hand, the GDP of the Eurozone recorded growth of 2.8%.

In Israel, following an especially strong growth[1] in the last quarter of 2021 (approx. 16%), the GDP recorded at the beginning of 2022, contraction at an annualized rate of 1.8%. With the exception of the investment component, regression is noticed in all applications, while imports continued to grow at a fast rate. Investments in fixed assets recorded a moderated growth, in view of the impressive rise in investments in residential construction (approx. 24%), for the fourth consecutive quarter, while investments in machinery and equipment and in transportation vehicles shrank.

Exchange rates. In total for the first half of the year, the US dollar strengthened, on the background of the relatively solid state of the US economy, and in the light of the fast increase in the interest rate. Consequently, the dollar basket (DXY) strengthened by a rate of 9%. Concurrently, the shekel devalued steeply against the US dollar at a rate of 12.5% and at a rate of approx. 7% against the currencies basket. This due to the decline in the equities markets abroad and the global strengthening of the dollar.

Inflation. On the background of the global trend of accelerated inflation, concurrently with the opening of the market to full activity, the tight labor market and the weakening of the shekel, inflation continued to accelerate. In June 2022, the inflation reached an annualized rate of 4.4%, compared to 1.7% in June of 2021. The core inflation (excluding energy, fruit and vegetables) also increased to an annualized rate of 3.8%. Concurrently a steep increase was recorded in inflationary expectations regarding all ranges, and in particular for the short-term range, from approx. 2.4% per year, at the end of 2021, to approx. 3.2% at the end of June (Index contract).

Monetary policy. Despite signs of slowdown in economic activity, the FED raised the interest rate to 1.5%-1.75% and started to reduce the balance sheet. At the same time, the ECB raised the interest rate by 0.5% to 0%.

The Bank of Israel also raised the interest rate by 0.65% from a level of 0.1% to a level of 0.75%. Furthermore, within the framework of the monetary restraint policy, purchases of bonds have discontinued and the volume of foreign currency purchases was most limited.

Financial markets. The first half of the year was marked by a high market volatility level, and closed with steeply declining quotation on the equities market. This, in view of the monetary policies of the central banks, which acted emphatically to restrain inflation, and concerns regarding recession. Against the background of the central bank's actions to rein in inflation and the steep interest hikes, an increase of approx. 150 basis points occurred in yields on 10-year government bonds in the US, in Germany and in Israel. The increase in shekel yields was accompanied by a steep rise in real-term interest, all along the graph, alongside a rise in short-term inflationary expectations.

The third quarter of 2022[2]. In Israel, the budgetary surplus for the twelve months ended in July 2022 increased to 0.6% of the GDP. The FED raised the interest rate in July to a level of 2.25%-2.5%, and the ECB raised the interest rate to 0%, while the Bank of Israel raised it to 1.25%.

In view of increasing concerns regarding recession, a reduction in prices of commodities was recorded since the middle of June. Concurrently, estimates increased that the central banks would slowdown the pace of monetary restraint, and as a result, a rise was recorded in the equities markets, alongside a reduction in yields on government bonds. The rise in share prices abroad, led to the strengthening of the shekel.

Forward-looking information. The aforesaid includes, inter alia, assessments of the Bank regarding the future development of primary indicators, which are deemed to be forward-looking information. The aforesaid reflects the assessment of the Bank's Management, taking account of information available to it at the time of preparing the quarterly report, with regard to trends in the Israeli and world economies. The aforesaid might not materialize should

1 The economic growth data for the second quarter of 2022 have not as yet been published at date of publication of this Report, and, accordingly the data in this respect relate to the first quarter.

2 All data relate to the period from July 1, 2022 and until August 8, 2022.

changes occur in the trends, in Israel and/or in the world, and as a result of various developments in the macro-economic conditions that are not under the control of the Bank.
For further details, see "Main developments in Israel and around the world in the first half of 2022" in "Corporate governance, audit, additional details regarding the business of the banking corporation and management thereof".

Material leading and developing risks

The Bank considers business model risks, cyber and data protection risks, macro environment risk, model risks, privacy protection aspects as well as conduct risks and environment and climate risk, as the most significant developing leading risks. No material changes have taken place during the reported period with respect to the said risks, except for the macro-environment risk, as stated below. For additional details see the 2021 Annual Report (pp. 26-27).
Developments in the macro-environment. The sharp fluctuations on the markets, the pace of changes and effects of the macro-economic situation, including the rise in interest rates and in inflation, as a result of the aftereffects of the Corona crisis and the effect of the war between Russia and the Ukraine, create an increased risk of global recession. The said developments may have a medium-term effect on the repayment ability of borrowers.

Initiatives concerning the banking sector and its operations

Increase in competition and reduction in concentration Act. The Increase in Competition and Reduction in Concentration in the Banking Market in Israel (Legislation Amendments) Act, 2017, was published in the Official Gazette on January 31, 2017. The Act constitutes the adoption of the recommendations of the Strum Committee, appointed in June 2015 by the Minister of Finance and by the Governor of the Bank of Israel, in order to recommend, inter alia, of ways for attracting new participants in the competition for the supply of prevalent financial services, including by way of separation from banks of the ownership of credit card companies.
In the first stage, within the framework of implementing the Act, the credit card companies Isracard and MAX (formally: Leumi Card) were separated from Bank Hapoalim and Bank Leumi, respectively, and the separation of ownership of the credit card companies from the banks did not apply to the owners of ICC. Only in the second stage will the issue of the separation of ownership in relation to ICC be re-examined. In accordance with the law, a period of two year began on February 1, 2021, ending on February 1, 2023, during which the Minister of Finance may order ICC to be separated from Discount. To the best knowledge of the Bank, the matter is being examined by the relevant factors.
This and more, if in the past the large banks (Hapoalim, Leumi and Discount) issued to their customers credit cards of the credit card companies owned by them (Isracard, MAX and ICC), then, competition had intensified between the companies in the transitional period determined in the Act. Each bank holding control means in a debit card company, is required to divert a part of the business of issuing new cards to its customers to at least one other operating company, with which the bank had no business relations in the past. From the view point of ICC, although there is a reduction in the issue of credit cards to customers of the owner banks, ICC now has the opportunity to compete in the issue of new credit cards to customers of Hapoalim and Leumi. In this context, it should be mentioned that the transitional period ended in January, February and April 2022, with respect to Discount Bank, Bank Leumi and Bank Hapoalim, respectively. In the era following the entry into effect of the new Act, and now again, with the ending of the transitional period[3], the different participants in the credit card market, banks on the one part and credit card companies on the other part, find themselves in front of an array of moves and action possibilities of each of them and of each of the other participants.
The aforementioned could have a material effect on the banking system, including the Bank itself, on the credit card market and on ICC. Nevertheless, at this stage, prior to clarifying the nature, character, scope and timing of all the measures that will be taken, it is not possible to assess the aforesaid effects either in terms of materiality or in terms of quantity. The additional tax that may apply, if doubt is raised as to the continued holding (according to this term's meaning in generally accepted accounting principles) of the Bank in ICC, computed in relation to the value of the holdings in ICC stated in the books of the Bank as of June 30, 2022, is estimated at approx. NIS 50 million.

3 The dates relating to Bank Leumi and Bank Hapoalim are, to the best knowledge of the Bank, based on open information.

For details regarding the said Act and additional legislation initiatives concerning the banking sector, see ”Legislation and Supervision” in the Chapter ”Corporate governance, audit and additional details regarding the business and manner of management of a banking corporation”. For details in respect of agreements between ICC and certain banks on the one hand, and between the Bank and MAX on the other hand, see in the 2021 Annual Report (p. 319-320) and Note 17 to the condensed financial statements. For details in the matter of ”Changes regarding competition in the credit card market”, see ”Credit Card Operations” in the 2021 Annual Report (p. 390).

Continuation of the plan for strengthening competition in the banking market. For further details, see “Legislation and Supervision”.

Reduction of the cross-commission rate. The Banking Oder (Customer service)(Supervision over cross-clearing service for transactions made by charge cards and for immediate debit transactions), 2018, was published on November 25, 2018, establishing an outline with respect to the reduction of the cross-commission in deferred charge transactions, from the rate of 0.7% at that date to a rate of 0.5%, this in five stages, and an outline with respect to the reduction of the cross-commission regarding immediate charge transactions, from the rate of 0.3% at that date to a rate of 0.25%.

For details regarding the exemption terms for the agreement (a new arrangement in the industry replacing the arrangement expired on December 31, 2018), published by the Competition Commissioner, see in the 2021 Annual Report (p. 318).

For additional details, see the 2021 Annual Report (pp. 28-29).

Review by the independent auditors

In their review report of the interim consolidated condensed unaudited financial statements for the six and three months periods ended on June 30, 2022, the independent auditors drew attention to Note 10 section 4, regarding class actions and other legal actions that cannot be estimated.

Material developments in income, expenses and other comprehensive income

Profit and Profitability

Net profit attributed to the Bank’s shareholders for the first half of 2022 totalled NIS 383 million, compared with NIS 662 million in the corresponding period last year, an increase of 48.5%.

Return on equity net attributed to the Bank’s shareholders for the first half of 2022 reached a rate of 18.3%, on an annual basis, compared with a rate of 13.8% for the corresponding period last year, and 13.6% for all of 2021.

The following are the main factors that had an effect on the business results of the Group in the first half of 2022, compared with the corresponding period last year:

a. An increase in net interest income in an amount of NIS 684 million (21.4%), which was affected by the growth in credit to the public in the non-linked segment and from the effect of the difference in the rise in the CPI.
b. An increase in credit loss expenses of NIS 628 million. Increasing the expenses in the first half of 2022, stemmed mostly from the intensified effect of the macro component and from growth in credit. This, compared with expenses release in the corresponding period last year.
c. An increase in the non-interest income, of NIS 202 million (10.6%), which was affected, mostly, by an increase in other income, which includes capital gains on the sale of buildings in the amount of NIS 413 million, by a decrease of NIS 369 million in non-interest financing income (95.3%), mostly a reduction in income from derivatives operations, and from an increase of NIS 167 million in fees and commissions (11.1%), mainly from an increase in credit card fees and commissions.
d. An increase of NIS 160 million in operating and other expenses (4.9%), affected, mainly, from an increase of NIS 68 million in salaries (4.2%), from an increase of NIS 84 million in other expenses (8.2%), and from a NIS 8 million rise in maintenance and depreciation of buildings and equipment (1.3 %).

e. Tax provision of NIS 818 million on earnings in the first half of 2022, compared with NIS 846 million in the corresponding period last year.

Additional details and explanations are presented below.

Net profit attributable to the Bank's shareholders amounted in the second quarter of 2022 to NIS 680 million, compared to NIS 983 million in the first quarter of the year, a decrease at the rate of 30.8%, and compared to NIS 860 million in the second quarter of 2021, a decrease at the rate of 20.9%.

Net return on equity attributable to the Bank's shareholders reached in the second quarter of 2022 an annualized rate of 11.8%, compared to 18.3% in the first quarter of the year and compared to 17.2% in the second quarter of 2021.

The principal factors affecting the Group's business results in the second quarter of 2022, compared to the previous quarter, are:

a. An increase in net interest income in the amount of NIS 273 million (15.2%).
b. An increase in credit loss expenses in the amount of NIS 191 million.
c. A decrease in non-interest income in the amount of NIS 462 million (35.9%).
d. An increase in operating and other expenses in the amount of NIS 9 million (0.5%).
e. A provision for taxes on income in the amount of NIS 371 million was recorded in the second quarter of 2022, compared to an amount of NIS 447 million in the preceding quarter.

Details regarding Eliminated Components

Realization of assets as part of the preparations for the relocation of the Head Offices and operation of the Bank to the Discount Campus. For details, see Note 21 to the condensed financial statements.
Effect of settlement. Acceleration of the amortization of "actuarial profits/losses" (a charge to profit and loss) following the payment of severance pay to retirees, including those who had retired within the framework of the 2020 retirement plan (see the 2021 Annual Report, pp. 222-223 and Note 8 to the condensed financial statements).
Expenses of vacating the Management Building of IDB Bank. Principally the balance of lease improvements in the old Management building, the balance of which, it was decided to write off in the second quarter of 2021, due to the vacating of parts of the old building during that quarter as well as expenses relating to the vacating of the building and its return to the owners.

For details regarding gains in respect of the ZIM shares recorded in 2021, see Note 5 J to the condensed financial statements.

Details regarding material changes in statement of profit and loss items

Net interest income. In the first half of 2022, net interest income amounted to NIS 3,873 million compared with NIS 3,189 million in the corresponding period last year, an increase of 21.4%. The rise in the net interest income in the amount of NIS 684 million, is explained by a positive price impact of NIS 177 million, and a positive quantitative effect in the amount of NIS 507 million (see "Rates of interest income and expenses and analysis of the changes in interest income and expenses" in Appendix No.1).
The interest spread, excluding derivatives, reached a rate of 2.30% in the first half of 2022, compared with 2.20% in the corresponding period last year.
The average balance of interest bearing assets has increased by a rate of approx. 14.3%, from an amount of NIS 271,319 million to NIS 310,024 million, and the average balance of interest bearing liabilities increased by a rate of approx. 14.6%, from an amount of NIS 196,058 million to NIS 224,623 million.

Net interest income according to linkage segments

Distribution of volume of operations according to interest bearing assets, net interest income and interest margin by linkage segments

	For the six months ended June 30					
	2022			2021		
	Volume of activity[1] in %	Net interest income in NIS millions	Interest spread in %	Volume of activity[1] in %	Net interest income in NIS millions	Interest spread in %[2]
Unlinked shekels	72.9	2,687	2.30	72.4	2,356	2.34
CPI-linked shekels	7.7	594	1.92	7.8	304	0.30
Foreign Currency	19.4	592	1.91	19.8	529	1.89
Net interest income and the interest spread	**100.0**	**3,873**	**2.30**	**100.0**	**3,189**	**2.20**

Footnote:

(1) According to the average balance of the interest bearing assets.

(2) The interest rate was recalculated in accordance with the new reporting directives.

The growth in net interest income, stemmed mostly from an increase in credit to the public in the non-linked segment and from the effect of the difference between the rise in the CPI in the first half of 2022, by a rate of 3.1%, and the rise of 1.4% in the corresponding period last year.

Non-interest financing income amounted in the first half of 2022 to NIS 18 million, compared to NIS 387 million in the corresponding period last year, a decrease of 95.3%.

The decline in non-interest financing income stems, mostly, from the decline in income from derivatives operations and from a reduction in gains on investment in shares (see below "Analysis of the total net financing income").

Non-interest financing income includes the effect of activity in derivative financial instruments, which constitute an integral part of the management of the Bank's interest exposure and base exposure. Accordingly, for the purpose of analyzing the financing income from current activity, the net interest income and the non-interest financing income need to be aggregated.

(1) Exchange rate differences in respect of trading bonds are included in the exchange rate differences line	19	4	(11)	(5)	(1)	1
(2) Of which: income from realizations in Discount Capital in deduction of provision for impairment	15	39	84	73	26	11
(3) See note 5 J to the condensed financial statements.						

Net financing income, amounted to NIS 3,891 million in the first half of 2022, compared to NIS 3,576 million in the corresponding period last year, an increase of 8.8%. The increase in financing income stemmed mostly from an increase in financing income from current operations as well as from the effect of the rise in the CPI, which were offset by adjustments to fair value of derivative instruments and a reduction in gains on investment in shares.

Rates of income and expenses. In the appendices to the quarterly report – Appendix 1 are presented net interest income, with respect to the balance sheet activity. In order to explain the Bank's overall interest margin, the effects of activity in derivatives not for trading (excluding adjustments to fair value and exchange rate differences) needs to also be added.

Interest margin, including derivatives not for trading reached a rate of 1.99% in the first half of 2022, similar to the corresponding period last year.

Net financing income amounted in the second quarter of 2022 to NIS 2,046 million, compared to NIS 1,774 million in the corresponding quarter last year, an increase at the rate of 15.3%, and compared to NIS 1,845 million in the first quarter of 2022, an increase at the rate of 10.9%.

The interest spread including non-trading derivatives reached in the second quarter of 2022 a rate of 2.10%, compared to 2.03% in the corresponding quarter last year and compared to 1.90% in the first quarter of 2022.

Credit loss expenses. The accounting policy regarding current expected credit losses (CECL) was initially applied from January 1, 2022, as detailed in Note 1 (e) to the condensed financial statements. At date of initial implementation, the allowance was adjusted to the new accounting policy, and the cumulative effect thereof was recognized in the balance of retained earnings as of January 1, 2022. In the first half of 2022 credit loss expenses were recorded in an amount of 71 million were recorded, compared with expenses release of NIS 557 million in the corresponding period last year.

The credit loss expenses increase in the first half has been mostly affected by the following factors:

- Expenses increase on a group basis in the amount of NIS 107 million, compared to expenses release of NIS 422 million, in the first half of 2021. Expenses in the current year was affected mostly by intensified qualitative adjustments due to the macro-economic situation;
- Expenses release on a specific basis in the amount of NIS 70 million, compared to expenses release in the amount of NIS 134 million in the first half of 2021. The reduction in expenses this year was affected mostly by the change in the allowance following repayments and mitigation regarding classification;
- Expenses in respect of housing loans in the amount of NIS 34 million, compared to expenses release amounting to NIS 1 million, in the first half of 2021, affected mostly from allowances in respect of off balance sheet credit, and from the growth in credit and by the effect of macro-economic components, as stated.

For additional details, see below "Credit to the public" and "Credit risks" in Chapter "C" hereunder. For details as to the components of the credit loss expenses, see Note 14 to the condensed financial statements.

Footnotes:

(1) Including adjustments from translation of financial statements of a consolidated subsidiary - Discount Bancorp Inc., the functional currency of which is different from that of the Bank.

(2) See Note 5 L to the condensed financial statements.

The comprehensive income amounted in the first half of 2022 to NIS 1,057 million, as compared with NIS 1,473 million in the first half of 2021. The difference between the comprehensive income for the first half of 2022 and the net profit, stemmed mostly from unrealized losses in the amount of NIS 1,360 million on available-for-sale bonds, profits in the amount of NIS 461 million on translation adjustments and profits of NIS 312 million on adjustments relating to employee benefits.

Structure and developments of assets, liabilities, capital and capital adequacy

Development of Assets and Liabilities

Total assets as at June 30, 2022, amounted to NIS 364,421 million, compared with NIS 335,088 million at the end of 2021, an increase of 8.8%.

Developments in the principal balance sheet items

Following are details regarding credit to the public, securities and deposits from the public.

Credit to the public

General. Net credit to the public (after allowance for credit losses) as of June 30, 2022 totaled NIS 232,465 million, compared with NIS 213,156 million at the end of 2021, an increase of 9.1%.
For details regarding the credit portfolio, see the 2021 Annual Report (pp. 41-45). For details regarding credit risk management including the Credit risk in housing loans, Credit risk of private individuals and Credit risk in relation to the construction and real estate sector, see "Credit risk" in Chapter C hereunder and in the 2021 Annual Report (pp. 71-94). For details regarding the quality of credit, see Note 14 B 3 to the condensed financial statements and in the 2021 Annual Report (pp. 284-285).

Composition of credit to the public by linkage segments

Footnote:
(1) Reclassified - see Note 12 B to the condensed financial statements.

The increase in credit to the public in the first half of 2022 reflects growth in the focus points determined in the updated strategic plan. Credit to households excluding housing loans grew by NIS 1,420 million (4.7%). Credit to medium businesses grew by NIS 2,533 million (17.1%). Credit to large businesses increased by 3,128 million (6.2%) and housing credit grew by NIS 6,845 million (12.7%). It should be noted that credit to households excluding housing loans was affected from the decrease in the balance of receivables in respect of credit card transactions, due to the transition to daily clearing.
As seen from the above table, IDB Bank recorded during the reporting period growth regarding the credit balances.

Composition of the overall credit to the public risk by economic sectors

Developments of total credit to the public risk, by main economic sectors

	June 30, 2022		December 31, 2021		
Economic Sectors	Total credit to the public risk	Rate from total credit risk	Total credit to the public risk	Rate from total credit risk	Rate of change
	in NIS millions	%	in NIS millions	%	in %
Industry	22,966	6.4	20,641	6.1	11.3

Private individuals - housing loans	70,703	19.3	63,954	19.1	10.6
Private individuals - other	72,957	19.9	69,496	20.6	5.0
Other sectors	51,483	14.1	47,605	14.2	8.1
Total overall credit to the public risk	**365,729**	**100.0**	**336,417**	**100.0**	**8.7**

The data presented above indicates that in the first half of 2022, the overall risk regarding credit to the public increased by 8.7% compared with the end of 2021. This growth applied to credit granted for all sectors.

Development of problematic credit risk

For details regarding the identification and classification of non-accruing debts, a term replacing the term "impaired debts", see Note 1 (e) to the condensed financial statements.
Following are details on credit to the public, as specified in Note 14 to the condensed financial statements:
Problematic credit to the public. The balance-sheet problematic credit to the public (both accruing and non-accruing) amounted at June 30, 2022, to NIS 6,041 million, as compared to NIS 6,213 million at January 1, 2022, a decrease of 2.8%.
Problematic credit not accruing interest. The problematic credit to the public that does not accrue interest income amounted at June 30, 2022, to NIS 1,891 million, as compared to NIS 1,327 million at January 1, 2022, an increase of 42.5%.

Overall credit risk and the rate of problematic credit risk in principal economic sectors

Total	**410,489**	**6,514**	**1.6**	**378,721**	**6,859**	**1.8**

In the first half of 2022, the ratio of problematic credit risk to the total credit risk decreased. The total problematic debts decreased mostly in the sectors of hotels, hotel services and food and private individuals – other. On the other hand, the total problematic debts increased mostly in other sectors.

The balances of the allowance for credit losses

The balance of the allowance for credit losses. The balance of the allowance for credit loss, including the allowance on a specific basis and the allowance on a group basis, but not including allowance for off-balance sheet credit risk, totalled NIS 3,045 million as of June 30, 2022. The balance of this allowance constituted 1.29% of the credit to the public, compared with a balance of the allowance in the amount of NIS 3,040 million, constituting 1.41% of the credit to the public as of December 31, 2021, and compared to the balance of the allowance of NIS 2,996 million at January 1, 2022, constituting 1.39% of the credit to the public, following the initial implementation of the new accounting policy.
The balance of allowances for credit losses in respect of non-accruing credit amounted on June 30, 2022 to NIS 292 million.
The balance of allowances for credit losses in respect of accruing credit amounted on June 30, 2022 to NIS 2,753 million (of which: in respect of accruing problematic debts – NIS 265 million).

Securities

General. Securities in the Nosrto portfolio totaled NIS 43,926 million as of June 30, 2022, compared with NIS 43,869 million at the end of 2021, a decrease of 0.1%. Securities included in the "nostro" portfolio of the Discount Group, the investment in which as of June 30, 2022, amounted to 5% or over of the total amount of the portfolio: "government variable 1130" and the "shekel government 219" security types, which amounted to approx. 10.9% and approx. 5.1%, of the total portfolio, respectively.

As of June 30, 2022, approx. 69.7% of the portfolio is invested in Government bonds, and approx. 16.8% of the portfolio is invested in bonds backed by mortgages of different federal agencies (Freddie Mac, Fannie Mae, Ginnie Mae) with an "AAA" rating, (of which - approx. 0.5% of the portfolio is invested in bonds of U.S. Government Supported Enterprises (GSE)). For details regarding the Bank's investments in bonds, according to economic sectors, see "Appendices to the quarterly report", appendix 2, sections 1-3. For details regarding the segmentation of the investment in government bonds according to principal governments, see "Appendices to the quarterly report" – appendix 3, section 2.

For details regarding the Nostro portfolios management policy, see 2021 Annual Report (p. 45).

Composition of the securities portfolio by linkage segments

Total Securities	**44,966**	**43,271**	**43,926**	**43,472**	**44,049**	**43,869**

Corporate bonds (excluding mortgages and assets backed bonds). Discount Group's available-for-sale bonds portfolio as of June 30, 2022, includes investments in corporate bonds in the amount of NIS 2,612 million (of which an amount of NIS 372 million is held by IDB Bank), compared with NIS 3,166 million as of December 31, 2021, a decrease of 17.5%. For details as to the balance of unrealized profit (losses) included in the balance of the said bonds, see Note 5 to the condensed financial statements.

Transfer of bonds to the held-to-maturity portfolio. On May 17, 2022, the Bank, IDB Bank and MDB transferred bonds from the available-for-sale portfolio to the held-to-maturity portfolio, in a total amount of approx. NIS 4.5 billion. As required by the reporting instructions, the unrealized loss on adjustment to fair value of the said bonds at the transfer date, in a total amount of approx. NIS 450 million, is continued to be presented in other comprehensive income and amortized to profit and loss over the remaining lives of the bonds as an adjustment of yield.

The rise in yields recorded since the beginning of the year was very steep and exceptional from an historical point of view. Differently from prior events of rising yields, in which the central banks around the world had immediately adopted an expansionary monetary policy, in the present event central banks around the world adopted a sharp change in policy, to a narrowing monetary policy. Moreover, the war between Russia and the Ukraine has led to a

global increase in commodity prices and to impairment in the chain of supply, which had started even before the outbreak of the war, gaining acceleration in its wake, and thus causing a significant rise in inflation and in uncertainty. In consequence of these exceptional developments, the markets expect that in order to curb inflation, the rate of increase in interest would be exceptional in comparison to the past.
In the opinion of the Bank, the above described circumstances agree with the term "rare event", as defined in the public reporting instructions, and as such, justify the transfer between the portfolios.
The Bank estimates that implementation of this step would significantly reduce the level of exposure of the Bank's equity capital and of the capital adequacy ratio to fluctuations in prices of bonds, caused by exogenous factors, as discussed above.

Investments in mortgage and asset backed securities

General. Discount Group's securities portfolio as of June 30, 2022 includes investment in mortgage-backed and asset-backed securities, in the amount of NIS 8,755 million, compared to an amount of NIS 8,190 million as at December 31, 2021, an increase of 6.9%. The amount includes investment in mortgage backed securities in the amount of NIS 8,015 million, which are held by IDB Bank, compared to an amount of NIS 7,607 million as at December 31, 2021, an increase at a rate of 5.4%. Approx. 84.4% of the mortgage backed securities portfolio is comprised of bonds of various federal agencies (Ginnie Mae, Fannie Mae, Freddie Mac) with an AAA rating in the U.S.. The investment in the said bonds does not include exposure to the subprime market.
As of June 30, 2022, the portfolio of mortgage and assets backed securities included unrealized net losses of NIS 668 million, compared with NIS 58 million as of December 31, 2021.
For details regarding the agencies operating under the auspices of the U.S. Governance, see the 2021 Annual Report (p. 47).
CLO. IDB Bank holds secured bonds of the CLO class in a total amount of approx. NIS 621 million. The said securities are rated AA-AAA. The Bank holds secured bonds of the CLO class in a total amount of NIS 738 million. The said securities are rated AA-AAA. For details, see Note 5 to the condensed financial statements.

Details regarding impairment in value of available-for-sale bonds

In light of the increase trend in yields to maturity recorded in the bond market in the first half of 2022, an increase in unrealized losses, included in the portfolio of available-for-sale bonds, was recorded during the reporting period, which as of June 30, 2022 amounted to a total of NIS 1,189 million, representing approx. 4.6% of the portfolio balance (December 31, 2021 - losses in the amount of NIS 166 million, approx. 0.54% of the portfolio balance). As assessed by the Management, these losses are due to an increase in yields in the capital market in the first half of the year, which is explained by the expectation of an increase in interest rates and a change in inflation expectations. It should also be noted that most of the losses in the portfolio are attributed to bonds issued by governments (mainly the Israeli government) and bonds backed by assets or mortgages. Based on the above, the Bank's Management estimates that these losses stem from changes in the market and not from credit losses. The classification of losses inherent in the portfolio of available-for-sale bonds is reviewed by the Bank on a quarterly basis. Based on these tests, no losses were credited to the profit and loss statement for this component during the reporting period.
For details regarding the review of impairment of available-for-sale bonds, see below "Critical accounting policies and critical accounting estimates". For additional details, see Note 5 to the condensed financial statements.

Subordinated bonds and debt notes

Subordinated bonds and debt notes as of June 30, 2022, totaled NIS 13,863 million, compared with NIS 15,071 million at the end of 2021, a decrease of 8.0%. The decline stemmed mostly, from the early redemption in full, in an amount of approx. NIS 2.7 billion, of Series "A" capital notes, Series "B" capital notes and debt notes Series "L", effected by the Bank in January 2022. The said decline was offset by the issue of debt instruments in June 2022, in an amount of approx. NIS 1.7 billion.

Customer assets

Deposits from the public as of June 30, 2022, totalled NIS 283,423 million, compared with NIS 260,907 million at the end of 2021, an increase of 8.6%.

Data on the composition of deposits from the public by linkage segments

	June 30, 2022		December 31, 2021		
	In NIS millions	% of total Deposits from the public	In NIS millions	% of total Deposits from the public	Rate of change in %

Footnote:
(1) Reclassified - see Note 12 B to the condensed financial statements.

The ratio of total net credit to the public to deposits from the public was 82% as at June 30, 2022, compared with 81.7% at the end of 2021.

Deposits from the public of the three largest depositor groups amounted as of June 30, 2022, to NIS 6,761 million.

Securities held for customers. On June 30, 2022, the balance of the securities held for customers at the Bank amounted to approx. NIS 214.94 billion, including approx. NIS 2.1 billion of non-marketable securities, compared to approx. NIS 235.02 billion as at December 31, 2021, including approx. NIS 1.9 billion of non-marketable securities, a decrease of approx. 8.5%. For details as to income from security activities, see "Distribution of the fees and commissions" above. In addition, the balance of securities held on behalf of customers at the MDB as of June 30, 2022, amounted to NIS 11.59 billion, compared with NIS 12.69 million in December 31, 2021, a decrease of 8.67%.

Pension advisory services. The total cumulative assets of customers receiving pension consulting services from the Bank as at June 30, 2022, amounting to approx. NIS 22.1 billion, compared with NIS 23.8 billion as of December 31, 2021, a decrease of 7.1%, which stemmed, inter alia, from the decreases in the markets in the first half of 2022.

Capital and capital adequacy

The instructions. Instructions regarding "Basel III guidelines", which apply as from January 1, 2014, include a requirement for maintaining a minimal ratio of common equity tier 1 of 9%, and a total capital ratio of 12.5%, as well as detailed reference with respect to transitional instructions. For details regarding the requirement concerning housing loans and for details regarding a temporary relief granted with regard to this, see Note 9 to the condensed financial statements, section 1 (b).

Issues of capital instruments. The capital instruments that are permitted to be issued under the Basel III rules, include "loss absorption" mechanisms, whether by conversion into shares or by elimination (in full or in part) of the capital instrument.

Relief regarding the efficiency plan. The Supervisor of Banks granted the Bank relief regarding its 2018 and 2020 retirement plans. The Supervisor of Banks also granted MDB relief regarding its 2020 retirement plan. For further details, see the 2021 Annual Report (pp. 225-226) and Note 9 to the condensed financial statements, section 1 (c).

Preparations made by the Bank. The Bank prepared a detailed plan for attaining the capital targets, being at least the level of capital prescribed by the instructions of the Supervisor of Banks and according to the time schedules published by him, and it is acting towards its implementation.

Provisional Instruction mitigating the capital requirements in order to face the Corona crisis. The Supervisor of Banks published on March 31, 2020 a Provisional Instruction, according to which, on the background of the spreading of the Corona virus and in order to secure the ability of banks to continue the granting of credit, the regulatory capital requirements applying to banks, have been reduced so that the minimum Common Equity Tier 1 ratio (excluding the additional capital buffer in respect of residential credit) would be 8% (compared to 9% prior to the change), and the minimum total capital ratio would be 11.5% (compared to 12.5% prior to the change). The Provisional Instruction has been extended from time to time, and recently until December 31, 2021. The mitigated capital requirements will apply for a period of twenty-four months following the end of the temporary directive period (namely, until December 31, 2023), on condition that the Bank's capital ratios shall not be lower than the capital ratios existing at the end of the temporary directive period, or the capital ratios applying to the Bank prior to the temporary directive, whichever is lower. Within the framework of the circular dated March 22, 2021, it was prescribed that a reduction in the capital ratios of up to 0.3 percentage points in the six-month period from the end of the temporary directive's validity (namely, until June 30, 2022) would not be considered a deviation from the regulatory capital requirements.

Effect of the issue of capital. The issue of capital was completed on March 30, 2022, increased the common equity tier 1 ratio at a rate of 0.63%, in terms of June 30, 2022.

Effect of the rise in the interest rate. The Bank estimates that a rise of 1% in the interest rate, would reduce the Common Equity Tier 1 ratio by 0.18%, in terms of June 30, 2022 (the calculation is based on the impact of a parallel increase in interest of 1% on the Group's securities portfolio and actuarial liabilities as of June 30, 2022, net of the tax effect). Subsequently to the date of this Report, the Bank has made a number of actions in order to reduce the effect of the rise in interest rates on the Bank's capital, and as of date of publication of the financial statements, the Bank estimates that a rise of 1% in the interest rate would result in a decrease in the Common Equity Tier 1 ratio by 0.12%, in terms of June 30, 2022.

The effect of falling prices. The decrease in Common Equity Tier 1 as a result of the decline in prices during the first half, due to an increase in unrealized losses in the available-for-sale portfolio, less a decrease in actuarial liabilities, reached approx. 0.2%.

Effect of the implementation of the Directive regarding the standardized approach for measuring counterparty credit risk exposures. The applicable date is from July 1, 2022. The Bank estimates that the implementation of the new directive will reduce the Common Equity Tier 1 ratio by a rate of 0.04% - 0.08% in terms of June 30, 2022.

Effect of the credit rating of Israel. The credit rating of Israel has an effect on the capital requirements, in view of the fact that the capital requirement in respect of exposure to governments, to public sector entities (local authorities, for instance) and to banks, derives from the credit rating of the State. According to estimates of the Bank, if and to the extent that the credit rating of the State of Israel would decline, this would have a decrease of 0.185% in the Tier 1 capital ratio, in June 30, 2022 terms.

Effect of the amendment to Proper Conduct of Banking Business Directive No. 203. The Bank assesses, the implementation of the amendment to the directive, with reference to the financing of the purchase of certain lands, the effect of which will be spread, in accordance with the relief established in the directive, from the third quarter of 2022 to the second quarter of 2023, will amount to a decrease of 0.05%-0.1% in the Common Equity Tier 1 ratio. It should be noted that in a number of issues there is ambiguity as to manner of implementing the directive. The said estimate is based on a range of assumptions regarding the manner of calculating the risk asset addition required in accordance with the directive and it may change to the extent that clarifications are received regarding the aforementioned manner of implementation. Furthermore, the addition to the risk assets, in accordance with the amendment to the directive, may be affected by measures the Bank takes in the third quarter of 2022.

Common Equity Tier 1 goal and total capital goal

At least once a year, the Board of Directors approves the Bank's capital goals, which comprise a Common Equity Tier 1 goal and a total capital goal. These goals are based on the policy that has been approved by the Board of Directors, which expresses the Bank's appetite for risk, pursuant to which the Bank is required to maintain a higher capital adequacy level than the rate required by the ICAAP result and according to a system stress test.

On December 22, 2019, the Board of Directors adopted a minimum Common Equity Tier 1 goal at a level of 9.9% and a minimum total capital goal at a level of 12.8%, for 2020. It should be noted that these goals take into account, inter alia, the results from the Bank's internal processes for determining the capital goals (the ICAAP results) and the results of the last SREP that was carried out, which includes a dialogue between the Bank and the Banking Supervision Department in relation to the specific risks of the Bank at the time when this process was carried out and the uniform stress tests were conducted[4].

On the background of the spreading of the Corona virus and with the aim of supporting the credit needs of customers during this period, the Bank's Board of Directors decided on April 7, 2020, to adjust the goal of the Common Equity Tier 1 ratio to 8.9% (instead of the previous 9.9%), as permitted under the Provisional Instruction published by the Supervisor of Banks (see above). The total capital goal was adjusted accordingly.

On November 22, 2021, the Bank's Board of Directors decided to reestablish the goal of the Tier I capital ratio at the targeted range that had been in effect prior to the entry into effect of the Provisional Instruction. On the basis of the ICAAP and the SREP procedures as stated, including the latest uniform stress tests performed, the Board decided to reduce the said goal by 0.15%, fixing it at the rate of 9.75%.

For additional details, see the document "Disclosure according to the third pillar of Basel and additional information regarding risks", which had been published within the framework of the 2021 Annual Report.

Capital Planning

As part of the capital planning process, the capital targets of the work plan have been set in the outline, which enables attainment of the Board of Directors' goals while maintaining a capital buffer in the event of unexpected fluctuations affecting the capital ratio, and from these the risk assets budget is derived. The allocation of the risk assets between the business units and the subsidiaries is in line with the strategic plan, while optimizing the Group's return on equity.

The capital outline takes into consideration various parameters that have an effect on the capital ratios, such as: assumption of profitability consistent with the risk assets budget, dividend distribution, changes in the various

4 For the meaning of the term "uniform stress testing" and for further details, see "Stress testing" in Chapter C in the 2021 Annual Report (p. 70), as well as "Assessing the capital adequacy" in the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which had been published within the framework of the 2021 Annual Report.

capital reserves, regulatory adjustments and amortizations in accordance with transitional instructions. The Bank examines a number of scenarios in arriving at the prescribed capital ratios.

As part of the capital management process, the Bank routinely examines its ability to attain the internal capital targets set by the Board of Directors and included in the work plan. Should the forecasted capital ratio differ considerably from that planned (by a predetermined rate), a Management discussion takes place to consider the measures that need to be taken in order to attain the prescribed outline – measures such as reducing risk assets, utilizing the capital buffer, and so forth.

For additional details, see "Capital adequacy" in the document "Disclosure according to the third pillar of Basel and additional information regarding risks" which had been published within the framework of the 2021 Annual Report. The document is available for perusal on the Bank's website together with the Bank's 2021 Annual Report, on the MAGNA site of the Israel Securities Authority, and on the MAYA site of the Tel Aviv Stock Exchange Ltd.

Exposure regarding the investment in Discount Bancorp Inc.

A US dollar exposure (structural position) in the amount of US$1,094 million exists as of June 30, 2022, stemming from the investment in the banking subsidiary in New York (Discount Bancorp Inc.). This exposure prevents material fluctuations in the ratio of capital to risk components caused by the effect of exchange rate of the US dollar on the credit risk. On the other hand, changes in the exchange rate of the dollar affect the shekel value of the investment in the said subsidiary and lead to fluctuations in other comprehensive profit and in the equity capital of the Bank.

Components of capital

Total capital as at June 30, 2022, totalled NIS 24,093 million, compared with NIS 22,148 million at the end of 2021, an increase of 8.8%.

Shareholders' equity as at June 30, 2022, totalled NIS 23,490 million, compared with NIS 21,483 million at the end of 2021, an increase of 9.3%. The change in Shareholders' equity in the first half of 2022 was affected, among other things, from the issue of capital to the net tune (net of issue expenses) of approx. NIS 1,398 million, by the net earnings during the period, by a decrease of NIS 1,360 million in the component of net adjustment of available-for-sale bonds presented at fair value, net of the tax effect, and from an increase of NIS 461 million in financial statements transactions adjustments and from the net actuarial gain in the amount of NIS 312 million.

The ratio of total capital, to total assets as at June 30, 2022, stood at 6.6%, similar to December 31, 2021.

Components of the regulatory capital as of June 30, 2022

Ratio of common equity tier 1 as of June 30, 2022, amounted to 10.16%, compared with 10.14% on December 31, 2021.
Total capital ratio as of June 30, 2022, amounted to 12.83%, compared with 13.46% on December 31, 2021.

Components of the regulatory capital as of June 30, 2022

	June 30,		December 31,
	2022	2021	2021
	in NIS millions		
1. Capital for Calculating ratio of capital

Ratio of common equity tier 1[1]	9.18	8.16	8.16
Total capital ratio	12.50	11.50	11.50

Footnotes:
(1) With an addition of 0.18%, in accordance with the additional capital requirements with respect to housing loans - see Note 9 (1) (b) to the condensed financial statements (June 30, 2021 and December 31, 2021: 0.16%).
(2) (1) The total weighted balances of the risk assets have been reduced by NIS 301 million (June 30, 2021: NIS 391 million, December 31,2021: NIS 343 million) due to adjustments in respect to the efficiency plan.

Raising of resources

Subtraction of regulatory capital instruments in 2022. On January 1, 2022, regulatory capital instruments in the amount of NIS 328 million were deducted from capital, following termination of the effect of the transitional instructions. There is no subtraction of regulatory capital instruments expected in the rest of 2022.
The Bank may raise additional regulatory capital instruments in accordance with the Bank's work plan for 2022 and market conditions, in order to maintain the total capital targets for 2022.

Additional disclosure according to the third pillar of Basel

Within the framework of the "Additional regulatory disclosures" document, a description is given of the principal characteristics of the issued regulatory capital instruments. Within the framework of the document "Disclosure according to the third pillar of Basel and additional information regarding risks" a disclosure is given of The Regulatory capital and management thereof, including the composition of the regulatory capital. The documents are available for perusal on the Magna website of the Israel Securities Authority, on the Maya website of the Tel Aviv Stock Exchange Ltd. and on the Bank's website.

Dividends distribution

For details regarding the dividend policy approved by the Board of Directors, see the 2021 Annual Report (p. 53)
On April 7, 2020, on the background of Corona virus crisis and with the aim of supporting the credit needs of its customers, the Bank's Board of Directors decided to discontinue at this stage the distribution of dividends until the expiry date of the Provisional Instruction issued by the Supervisor of Banks on March 31, 2020 (see "Capital and capital adequacy" above), and the clarification of the circumstances. The validity of the provisional instruction has been extended to December 31, 2021 (see "Capital and capital adequacy" above).
A circular amending Proper Conduct of Banking Business Directive No. 250 was published on September 30, 2021, in the framework of which it is stated, inter alia, that despite the increasing processes of exiting the Corona crisis, the level of uncertainty still remains high impacting the ability of banking corporations to predict their middle-term capital requirements, and that, the said uncertainty and risk require the continuation of careful and conservative capital planning. The circular clarifies, inter alia, that the standpoint of the Supervisor of Banks is that a distribution of an amount higher than 30% of the profits of a banking corporation (in the years 2020 and 2021) would not be considered a careful and conservative capital planning.
In accordance with and further to the Bank's dividend policy and to the stated above, the Bank has resumed the distribution of dividends, starting with the profits of the third quarter of 2021, at the rate of 20%. On August 11, 2022 the Bank's Board of Directors decided to make a dividend distribution at the rate of 20% of the profits of the second quarter of 2022, in an amount of approx. NIS 136 million, representing approx. 0.1099 Agorot per ordinary A share of NIS 0.1 par value. Further details regarding the Board of Directors' decision, including the dates set as the record date and the payment date, are included in the immediate report that the Bank is issuing concurrently with the publication of this report.
For details of the dividends paid as from the fourth quarter of 2018 and regarding the limitations set in the Supervisor of Banks' directives, see the 2021 Annual Report (pp. 223-224).

Activity of the Group according to principal Segments of Operation - principal quantitative data and main developments

General

The regulatory operating segments have been defined by the Bank of Israel in the new directives, based on the characteristics of their customers, such as: the nature of their activity (in relation to private customers), or their business turnover (in case of commercial customers), in a format that connects, on a uniform and single value basis, between the different customers of the banking industry as a whole, and the regulatory operating segments.
According to the instructions, a banking corporation, the operating segments of which, according to the approach of its Management, are materially different from the regulatory operating segments, shall provide in addition, disclosure regarding operating segments according to the Management's approach ("managerial operating segments"), in accordance with the accounting principles accepted by U.S. banks in the matter of operating segments - (ASC 280). However, in accordance with new directives and clarifications of the Banking Supervision Department, the disclosure in the directors' and management report shall relate to regulatory operating segments only. Note 13 to the condensed financial statements present a quantitative disclosure of the managerial operating segments that the Bank has identified. For details regarding the administrative structure, see the 2021 Annual Report (p. 54). For details regarding changes in the organizational structure, see the "Human Capital" below.
Concise data regarding operations in the various segments is presented in Notes 12 and 13 to the condensed financial statements.
For details regarding the relevant public reporting instructions and the definition of the segments, and details regarding the principal guidelines, estimates and principles used in the preparation of segment information, see Note 29 to the financial statements as of December 31, 2021 (pp. 253-255).

Household Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to NIS 237 million, compared to an amount of 176 million in the corresponding period last year, an increase of 33.5%. The growth in profits was mostly affected by growth in income, which was partly offset by an increase in credit loss expenses and by an increase in operating expenses.

The credit loss expenses in the first half of 2022 recorded expenses of NIS 112 million, compared to expenses release of NIS 128 million in the corresponding period last year. The increase in expenses is due, primarily, from the group allowance.

Principal data regarding the household segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	1,113	904	2,113	1,751	3,672
Credit loss expenses (expenses release)	83	(69)	112	(128)	(162)
Total Operating and other expenses	821	768	1,628	1,566	3,268
Net Profit Attributed to the bank's shareholders	119	111	235	176	325

For additional details regarding the household segment (Domestic operations), including details regarding mortgage activity, see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Private Banking Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to NIS 29 million, compared to NIS 16 million in the corresponding period last year, an increase of 81.3%.

Principal data regarding the Private Banking segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	55	33	92	67	133
Credit loss expenses (expenses release)	-	-	1	-	(1)
Total Operating and other expenses	27	19	48	43	85
Net Profit Attributed to the bank's shareholders	18	9	29	16	33

For additional details regarding the Private Banking segment, see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Small and minute businesses Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to 289 million, compared to an amount of NIS 321 million in the corresponding period last year, a decrease at a rate of 10.0%. The decline in profits was mostly affected by an increase in credit loss expenses, which was partly offset by a rise in income.
The credit loss expenses in the first half of 2022 expenses of NIS 14 million were recorded, compared to expenses release of NIS 175 million in the corresponding period last year. The increase in expenses is due, primarily, to the increase in the group allowance.

Principal data regarding the Small and minute businesses segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	575	482	1,099	966	1,991
Credit loss expenses (expenses release)	18	(82)	14	(175)	(211)
Total Operating and other expenses	320	314	653	646	1,372
Net Profit Attributed to the bank's shareholders	149	160	289	321	550

For additional details regarding the Small and minute businesses segment (Domestic operations), see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Medium businesses Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to NIS 102 million, compared to an amount of 77 million in the corresponding period last year, an increase at a rate of 32.5%.

Principal data regarding the Medium businesses segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	145	129	282	247	499
Credit loss expenses (expenses release)	3	(4)	(5)	(1)	50
Total Operating and other expenses	65	66	135	131	278
Net Profit Attributed to the bank's shareholders	49	43	102	77	114

For additional details regarding the Medium businesses segment (Domestic operations), see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Large businesses Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to NIS 254 million, compared to an amount of NIS 377 million in the corresponding period last year, a decrease at a rate of 32.6%. The decrease in the profit was effected mostly from a decrease in credit loss expenses release.

The credit loss expenses release in the first half of 2022 recorded expenses release of NIS 19 million, compared to expenses release of NIS 259 million in the corresponding period last year, a decrease at a rate of 92.7%. The increase in expenses is due, primarily, to the increase in the group allowance.

Principal data regarding the Large businesses segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	374	318	689	621	1,266
Credit loss expenses (expenses release)	28	(202)	(19)	(259)	(339)
Total Operating and other expenses	170	157	328	304	682
Net Profit Attributed to the bank's shareholders	113	238	254	377	610

For additional details regarding the Large businesses segment (Domestic operations), including details regarding construction and real estate activity, see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Institutional bodies Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

The net profit of the segment in the first half of 2022 amounted to NIS 3 million, compared to an amount of NIS 11 million in the corresponding period last year, a decrease at a rate of 72.7%.

The credit loss expenses release in the first half of 2022 amounted to an expenses release of NIS 3 million has been recorded, compared to an increase in expenses of NIS 26 million in the corresponding period last year, a decrease at a rate of 88.5%.

Principal data regarding the Institutional bodies segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	19	9	28	21	39
Credit loss expenses (expenses release)	3	(25)	(3)	(26)	(23)
Total Operating and other expenses	14	15	28	30	64
Net Profit Attributed to the bank's shareholders	2	11	3	11	-

For additional details regarding the Institutional bodies segment (Domestic operations), see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

Financial management Segment (Domestic operations)

Scale of Operations and Net Profit of the Segment

Total income of the segment in the first half of 2022 amounted to NIS 1,053 million, compared to NIS 889 million in the corresponding period last year, an increase at a rate of 18.3%. The growth in income was affected, inter alia, by the realization of assets. See Note 21 to the condensed financial statements.
The net profit in the first half of 2022 amounted to NIS 567 million, compared to an amount of NIS 442 million in the corresponding period last year, an increase at a rate of 28.3%.

Principal data regarding the Financial management segment (Domestic operations)

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021
	in NIS millions				
Total income	270	417	1,053	889	1,812

Net Profit Attributed to the bank's shareholders	124	215	567	442	880

For additional details regarding the financial management segment (Domestic operations), including details regarding non-financial companies activity, see in the Chapter "Corporate governance, audit and additional details regarding the business of the banking corporation and the manner of their management".

International operations Segment

Scale of Operations and Net Profit of the Segment

The net profit in the first half of 2022 amounted to NIS 184 million, compared to NIS 102 million in the corresponding period last year, an increase at a rate of 80.4%. The increase in profit was affected by a growth in income and a decrease in credit loss expenses.
The credit loss expenses release in this segment in the first half of 2022 amounted to expenses release of NIS 29 million, compared to expenses of NIS 30 million in the corresponding period last year, a decrease at a rate of 196.7%.

Principal data regarding the International operations segment

	For the three months ended June 30,		For the six months ended June 30,		For the year ended December 31,
	2022	2021	2022	2021	2021

Deposits from the public	10,821	9,812	10,821	9,812	11,245
Total equity	1,094	1,168	1,094	1,168	1,158
	In %				
Main performance indicators:					
Return on equity	10.8	8.7	10.3	6.1	7.9
Efficiency ratio	62.6	70.2	63.5	66.9	64.5
Ratio of total capital to risk assets	13.8	15.0	13.8	15.0	13.6
Ratio of credit loss expenses (expenses release) to the average balance of credit to the public	(0.10)	(0.46)	(0.21)	0.24	(0.07)
Total net return on interest bearing assets	2.62	2.38	2.48	2.33	2.33

The main factors affecting the results in the first half, compared to the corresponding period last year, are: an increase in net interest income (US$29 million; 23.8%) effected from the additional growth in the credit portfolio and from improvement in return on assets, following the raising of interest rates by the FED, credit loss expenses release (expenses release of US$9 million in the current half, as compared with expenses of US$9 million in the corresponding period last year), and the increase in total operating and other expenses (US$9 million; 8.1%).

The contribution of Bancorp to the Bank's net results reached a profit of NIS 178 million in the first half of 2022 (after deducting a provision for taxes of NIS 23 million), compared with NIS 100 million in the first half of 2021 (after deducting a provision for taxes of NIS 14 million).

The annual financial statements of Bancorp and of IDB Bank are available for review on the Internet website of IDB Bank (IDB Bank). Annual and quarterly financial data is available for review on the Internet website of FDIC.

Mercantile Discount Bank Ltd.

Mercantile Discount Bank Ltd. ("Mercantile Discount") is a wholly-owned and controlled subsidiary of the Bank.

The principal factors affecting the business results. The profit in the first half of 2022, compared to the corresponding period last year, was mainly affected by the following factors: an increase of NIS 132 million in net interest income, increase of 20.6%; an increase of NIS 143 million in credit loss expenses and the shifting from release to recognition of expenses; the growth stemmed mostly from the rise in expenses on a group basis, explained, principally, by macro-economic adjustments in respect of expectations for the rise in interest rates in the economy; a decrease of NIS 118 million in non-interest income, a decrease of 39.9% (a gain on revaluation of ZIM shares, of NIS 94 million, was recorded in the first half of 2021 - see Note 5 J to the condensed financial statements).

Israeli police investigation. For details, see the 2021 Annual Report (p. 64).

Strategic plan. For details, see the 2021 Annual Report (p. 63).

For details regarding lawsuits and motions for approval of the lawsuits as class action suits and for details regarding additional proceedings, see Note 26 C to the financial statements as of December 31, 2021, sections 10.8 and 10.9 (p. 242) and Note 10, section 3.4 to the condensed financial statements.

The annual and quarterly financial statements of Mercantile Discount Bank are available on the MAGNA website of the Israel Securities Authority and on the MAYA website of the Tel Aviv Stock Exchange Ltd. appearing under "Mercantile Issuance", and on the website of Mercantile Discount Bank.

Israel Credit Cards Ltd.

Israel Credit Cards Ltd. ("ICC") is a subsidiary of the Bank. As of June 30, 2022, the Bank owned 71.8% of the equity and 79.0% of the voting rights in ICC, the remainder of the shares held by FIBI.

Footnote:

(1) Differences between net income and the contribution to the Bank's business results is derived from recognition of current tax liability in respect of the investment in the company.

The principal factors affecting the business results. The business results of ICC for the reported period, compared to the corresponding period last year, were mostly affected by an increase in income (NIS 244 million, 26.3%), stemming mostly from the increase in income from credit card transactions (NIS 126 million, 19.0%) and from an increase in net interest income (NIS 70 million, 26.8%). On the other hand, expenses of the company increased (NIS 213 million, 29.1%). The growth in expenses stemmed, mostly, from growth in turnover of the company.

Strategic plan. For details, see the 2021 Annual Report (p. 65).

Distribution of dividend. In May 2022, ICC distributed to its shareholders a dividend of NIS 340 million (the share of the Bank is approx. NIS 244 million).

For details regarding activity in the credit card field in Israel, see in the 2021 Annual Report (pp. 317-322, 387-394) in the chapter "Corporate governance, audit and additional details regarding the business of the Banking Corporation and management thereof", and Note 17 to the condensed financial statements.

For details regarding lawsuits and motions to approve them as class action suits filed against ICC, see Note 26 C to the financial statements as of December 31, 2021, sections 10.1, 10.3, 10.5 and 11.2 (pp. 239-243) and Note 10 sections 3.1, 3.2 and 4.2 to the condensed financial statements.

The annual and quarterly financial statements of ICC are available for review on the Internet website of the company.

Discount Capital Ltd.

Discount Capital Ltd., a wholly owned and controlled subsidiary of the Bank, is engaged in investment in companies, in private investment funds and venture capital funds and mezzanine, investment banking in the field of securities distribution and in the underwriting and management of public offerings of securities (through a subsidiary).

Discount Capital – principal data

The contribution to the Bank's business results[1]	75.5	53.9	40.1
Principal balance sheet data for the end of the reporting period:	June 30, 2022	December 31, 2021	Change in %
Total assets	2,389.6	2,329.5	2.6
Total equity	1,263.9	1,193.4	5.9

Footnote:

(1) Differences between net income and the contribution to the Bank's business results is derived from differences in the implementation of generally accepted accounting principles and from current tax liability for the investment on the company.

For details regarding realization of investments, see "Non-financial companies" below under "Activity of the Group by regulatory operating segments – additional details".

In the first half of 2022, Discount Capital participated, via its subsidiary, in 21 public offerings, of which 2 public offerings for the Discount Group, and in 8 private transactions, amounting to approx. NIS 14.1 billion. This, compared with 33 public offerings, of which 1 public offering for the Discount Group and 7 private transactions, of which 1 private placement for the Discount Group, amounting to approx. NIS 9.1 billion, in the corresponding period last year.

Chapter "C" - Risks review

General description of the risks and manner of management thereof

Risk Profile of the Discount Group - Risk Environment

For details regarding the risk profile of the Discount Group, see the 2021 Annual Report (pp. 66-68). For details regarding Risk Management Principles, see the 2021 Annual Report (pp. 68-71).

Disclosures in accordance with the third Pillar of Basel

The Basel guidelines broaden the qualitative and quantitative disclosure requirements in the matter of credit risk, market risk and operating risk exposure management, as well as in other fields. Qualitative and quantitative disclosure regarding the various risks above and below in this Chapter, is presented in the 2021 Annual Report (pp. 71-117) and in the document "Disclosure according to the third pillar of Basel and additional information regarding risks". The document is available for perusal on the Bank's website together with the Bank's 2021 annual report together with the Report for the first quarter of 2022 (this report), on the MAGNA site of the Israel Securities Authority, and on the MAYA site of the Tel Aviv Stock Exchange Ltd.

Credit Risks

For details regarding Credit risks, see the 2021 annual report (pp. 71-94).

Adoption of updates to the generally accepted accounting principles at banks in the U. S. – Allowances for credit losses

Starting with January 1, 2022, the Bank applies the directives of the Supervisor of Banks requiring adoption in full of the accounting principles accepted by US banks with respect to allowances for expected credit losses (CECL). (See also Note 1 e to the condensed financial statements).
For details regarding preparations made by the Bank for the implementation of the new rules, the First Quarter of 2022 Report (p. 47).
The new rules were initially implemented in the first quarter of 2022, in respect of the data as of January 1, 2022 (transition date) and the data as of March 31, 2022.
In the first half of 2022, the Bank continued to improve and develop the process for measuring the allowance for credit losses. The said improvement and development are expected to continue also in the coming quarters.
It is noted that application of the new rules requires the formation of a methodology and complex models as well as a new technological application. Naturally, also after the beginning of initial application, improvement and development of the process for the measurement of the credit loss allowances would be continued, and respectively, such activity may require certain changes in the measurement procedure.
It is further noted, that the new rules do not require the application of a uniform methodology, and therefore, banking corporations had determined their own methodology and models used in the implementation of the rules, while using discretion. Care is therefore required in comparing the effects of the initial implementation as reported by the banks.
The data of the problematic debts and allowances in this chapter below and in Notes 6 and 14 to the condensed financial statements are presented in accordance with the new rules. The comparative figures are presented according to the format that was valid until December 31, 2021. Therefore, caution should be exercised in examining changes between the data as of December 31, 2021 and the data as of June 30, 2022.

Debts whose terms have been changed within the framework of coping with the Corona virus

On April 21, 2020, the Supervisor of Banks issued a letter regarding the main supervisory emphasis with regard to the handling of debts, within the framework of the supervision policy for encouraging banking corporations to operate cautiously in order to support borrowers that are unable or that are likely to be unable to meet their contractual payment obligations due to the impact of the Corona virus outbreak. The letter specifies the terms which, when met, a change in terms for borrowers not in arrears, due to the Corona crisis, will not be considered a troubled debt restructuring. For further details, see Note 1 C 5 (2) in the 2021 Annual Report (p. 149). The letter specifies, inter alia, with regard to debts that were in arrears prior to granting a deferral, that the state of the calculated arrears will be frozen for the repayments deferral period, except in the case of a debt classified as an impaired debt or a debt subject to an accounting write-off. In addition, and further to the publication of the additional outlines for deferring payments, from November 30, 2020 and December 10, 2020, the Banking Supervision Department issued two more letters to the banking corporations in December 2020, titled “The Corona crisis – main points regarding the additional outline for deferring payments” and “The Corona crisis – main points regarding the additional outline for deferring payments for small businesses”, within the framework of which, it was specified that a banking corporation is entitled not to classify, as a troubled debt restructuring, housing loans, other loans to private individuals and loans to small businesses, which were not in arrears for 30 days or more at the time of deferring the payments, with regard to which a payments deferral was granted by March 31, 2021 within the framework of the additional outlines for deferring payments, even if the aggregate deferral exceeds six months.

As seen from the below data, until June 30, 2022, in respect of 94% of all loans (domestic activity), and in respect of 94% of housing loans (domestic activity), the deferral period had ended and repayment of loans has been resumed. Of the outstanding balance of the loans, the deferral period in respect of which had not ended, loans in the amount of NIS 25 million were classified as problematic - 5%. Of the outstanding balance of the loans, the deferral period in respect of which had ended, NIS 110 million which are in arrears of 30 days or more. The segment that has the highest amount of loans classified as problematic and loans in arrears is the private individuals – housing loans segment.
As seen from the below data, the volume of debts the repayment of which had been deferred is being constantly reduced.

Presented below are details regarding the balance of debts whose terms have been changed, in accordance with the Supervisor of Banks' letters in this matter, which were published in the past.

The balance of a debt whose terms have been changed, within the framework of coping with the Corona crisis, which has not been classified as troubled debt restructuring

Footnotes:
(1) Debts – balance of debts before accounting write-offs.
(2) The repayments deferral period is the aggregate period of deferrals granted for the debt from the beginning of dealing with Corona virus and does not include deferrals to which the borrower is entitled under the law.
(3) Of which: debts not accruing interest income amount to NIS 12 million (as of December 31, 2021 – NIS 30 million).

It is noted that the above Table does not include data regarding deferrals by MDB, due to the fact that the balance of such deferrals as of June 30, 2022, is at a negligible amount. It is further noted that the above Table does not include data relating to deferral initiated by IDB Bank, due to the fact that as of June 30, 2022, no deferral remained in IDB Bank.

Notes:
(1) Based on the final risk, net of the effect of guarantees, liquid collateral and credit derivatives.
(2) Balance sheet and off-balance sheet credit risk, are presented before the impact of the allowance for credit losses and before the impact of collateral that are deductible for the purpose of a borrower or a group of borrowers liability.
(3) Credit risk of off-balance sheet financial instruments as computed for the purpose of borrower indebtedness limitations.
(4) Portugal, Italy, Greece and Spain.
(5) Including the transfer of credit risk to a consortium of international insurers, as of June 30 2022 in the following countries: Switzerland – an amount of NIS 2,508 million and Germany – an amount of NIS 2,170 million, as of June 30, 2021 in the following countries: Switzerland – an amount of NIS 2,303 million and Germany – an amount of NIS 2,144 million, and as of December 31, 2021 in the following countries: Switzerland – an amount of NIS 2,471 million and Germany – an amount of NIS 2,539 million.
(6) The item "Total exposure to LDC countries" includes the total exposure to countries defined as less developed countries (LDC) which are countries classified by the world bank as having low or medium income.

Exposure to Russia and the Ukraine

The macro-environment risk/risk environment. The global economy is being adversely affected by the military conflict between Russia and the Ukraine, which creates a high uncertainty situation and increases fluctuations in the markets. The rises in commodity prices and impairment of the chain of supply that had started prior to the outbreak of the war, and which has gained acceleration in its wake, have caused a significant rise in inflation and in uncertainty. Share indices around the world traded in volatility on the background of the rise in uncertainty and the monetary restrictions adopted by the central banks.
Exposure to foreign countries. Balance sheet and off-balance sheet credit risk. As of June 30, 2022, exposure to Russia and to the Ukraine is at a negligible scope (a mere few millions of NIS).
Exposure in respect of sanctions. The war between Russia and the Ukraine has led to the imposition of economic sanctions on the part of the United States, the European Union, Britain and additional countries, on entities, individuals and separatist regions and on sectors, such as aviation, energy and diamonds, and to different restrictions on export and import to and from Russia, and all this in addition to the sanctions that had been imposed in earlier years on Russia and the Crimean Peninsula. The sanctions that had been imposed are relevant to activities and services, which banks may conduct with any of their customers to whom or to whose operations the sanctions are relevant.
As an entity that conducts business with international customers and other factors, such as correspondent banks and custodians, the Bank acts towards the implementation of the sanctions that might be relevant to customers and to such international factors or to their fields of operation.
In continuation of the above stated, the Bank has adopted a number of measures, including, inter alia, delays and even blocking of funds transfer operations or the deposit of funds by bodies and entities included in lists compiled under power of the international sanctions; the regulation of its operation in accordance with the sectorial sanctions,

including sanctions pertaining to the diamond sector. In addition, the Bank applies measures regarding the monitoring and control required for maintaining completeness and propriety of the lists of entities and individuals recognized in its systems, including by way of modifying them to the updated lists of the US Treasury Department (OFAC), of the European Union and of the United Nations Sanctions Committee, mapping of operations involving risk and implementation of additional controls, where required.

The transaction of business not in agreement with the sanctions may expose the Bank and any of its relevant customers to enforcement measures and loss of reputation. Frequent changes in sanctions and their complexity increase the sanction compliance risk and the inputs required for the implementation thereof.

Letter of the Supervisor of Banks. On June 8, 2022, the Supervisor of Banks issued a letter with respect to "risks involved in engagement with factors declared in international sanctions lists and in national sanctions lists of foreign countries". The letter states that banking corporations are required to determine a policy and procedures regarding the manner in which use should be made of international lists and national sanctions lists of foreign countries, and the manner of engagement or conduct of business with factors declared in the said lists. The letter further states that refusal to approve a transaction, refusal to engage in a contract or the termination of an engagement due to the implementation of the said policy, would be considered reasonable refusal to provide service regarding the Banking Act (Customer service). The Bank is acting for the implementation of the above stated.

Credit Exposure to Foreign Financial Institutions

General. Foreign financial institutions include: banks, investment banks, brokers/dealers, insurance companies, institutional entities and entities controlled by the said entities.

As opposed to the definition of the "financial services" economic sector for the purpose of disclosure in the Management Review concerning the "Overall credit risk according to economic sectors", the exposure in respect of foreign financial institutions presented in the table hereunder includes exposure to foreign banks and to foreign investment banks, which, on the one hand, are not included in credit to the public, and on the other hand, does not include exposure in respect of investment in asset backed securities and in respect of potential off-balance sheet exposure.

The Bank maintains a careful credit policy and is monitoring developments and volume of exposure to key markets and to markets of the countries at risk. This is performed on an ongoing basis and at the Group level, within the framework of an inter-division forum. The Bank's dealing room monitors these markets in order to obtain a comprehensive picture and to react in real time to currency risks in accordance with the risk profile of each customer and the approved credit facilities.

As seen from the data presented above regarding "Exposure to foreign countries", The Bank's direct exposure to countries at risk is not material.

For details regarding the manner of managing credit risk applying to foreign financial institutions, see the 2021 Annual Report (pp. 81-83).

Credit exposure to foreign financial institutions. The Bank's credit exposure to foreign financial institutions comprises mostly of exposure to banks and investment banks. As seen from the data presented hereunder, about 97% of the exposure as of June 30, 2022, is to financial institutions rated "A-"rating or higher, compared with about 94% as of December 31, 2021.

The states in respect of which the Bank has exposure as stated above as of June 30, 2022, include, inter-alia, the United States and Britain.

In the first half of 2022, no loss on impairment of securities was recorded in respect of exposure to financial institutions.

Details of present credit exposure to foreign financial institutions on a consolidated basis

	Balance sheet credit risk(2)(4)(5)	Present off balance sheet credit risk(3)(4)	Present credit exposure(4)
	In NIS millions		
	As of June 30, 2022

External credit rating(7)			
AAA to AA-	1,190	63	1,253
A+ to A-	4,511	672	5,183
BBB+ to BBB-	43	159	202
BB+ to B-	4	35	39
Not rated	110	25	135
Total present credit exposure to foreign financial institutions	**5,858**	**954**	**6,812**

Notes:

(1) Foreign financial institutions include: banks, investment banks, brokers/dealers, insurance companies, institutional entities and entities controlled by the said entities.

(2) Deposits with banks, credit to the public, investment in bonds, securities borrowed or purchased under agreements to resell and other assets in respect of derivative instruments.

(3) Mainly guarantees, including guarantees securing third party indebtedness.

(4) Credit exposures and problematic credit risk are presented before the effect of allowance for credit losses and before deductions as defined in Section 5 of Proper Conduct of Banking Business Directive No. 313.

(5) For further information regarding the composition of the credit exposure reflected in the table showing derivative instruments in relation to banks/dealers/brokers, see Note 11 to the condensed financial statements.

(6) Credit exposure does not include exposure to financial institutions that have explicit and full government guarantees, and does not include investment in assets backed securities (for additional details regarding assets backed securities, see Note 5 to the condensed financial statements).

(7) According to Moody's rating, and in its absence, the Fitch rating or S&P.

In addition to the exposure presented in the above table, as of June 30, 2022 and December 31, 2021 a potential off-balance sheet exposure exists in respect of derivative instruments of foreign banks (as defined in Section (4)(a) to the definition of indebtedness in Proper Conduct of Banking Business Directive No. 313 regarding "Restrictions on indebtedness of a single borrower and of a group of borrowers"), namely, variable percentage of the outstanding balance of a future transaction, in the amount of NIS 218 million and NIS 262 million, respectively.

Credit risk in housing loans

General. The data presented hereunder relate to all the activity of the Group in this field: the Bank, MDB and IDB Bank (hereinafter will be named together as "the Group"). It is noted though, that the data relating to IDB Bank are negligible (housing credit in the amount of NIS 308 million as of June 30, 2022 and NIS 228 million as of December 31, 2021).

Developments in the field of housing loans. A growth was recorded in recent years in the demand and in the volume housing loans granted. The growth in performance has been caused by both the increased demand in the residential market and the rise in prices, resulting from the shortage in the supply in residential units in relation to the said demand.

The growth recorded in the volume of housing loans granted by the banking industry, which exceeds the economic growth rates and the growth rates in the standard of living and in household income, together with a scenario of a rise in unemployment and in interest rates, may lead to impairment in the quality of the housing credit portfolio and may increase exposure to credit risk in the banking industry. In contrast to earlier quarters, the second quarter of 2022 recorded a slight decline, all across the system, in the volume of housing loans extended.

For details regarding the deferral of housing loan payments, against the background of the Corona crisis, see "Preparations by the Bank in the wake of the Corona crisis – credit risk" above.

For details regarding the measures taken by the Group, see 2021 Annual Report (p. 84).

The volume of the Group's housing loan portfolio as of June 30, 2022, amounted to NIS 61,071 million (December 31, 2021 - NIS 54,196 million).

Certain risk characteristics of the Group's housing loans portfolio

	June 30, 2022	December 31, 2021
	%	
Rate of housing loans financing over 75% of the value of the property	0.9	1.1
Rate of housing loans, the monthly repayment amount of each exceeds 35% of the income of the borrower	11.3	9.3
Rate of housing loans carrying variable interest rate of the total amount of the housing loan portfolio[1]	58.3	58.5

Footnote:

(1) Loans in which the interest rate change frequency exceeds five years were also included in computing the ratio.

Amount of loans and average financing ratios

	For the six months ended June 30,2022	For the year ended December 31,2021
Average amount of loan (in NIS thousands)	992	937
Average financing ratio for housing loans (in %)	56.6	56.0
Average financing ratio for general purpose loans (in %)	28.2	17.5

Division of housing credit balances according to size of credit to borrowers

	June 30, 2022		December 31, 2021	
Credit limit net[(1)(2)] (in NIS thousands)	In NIS millions	% of total Housing Credit	In NIS millions	% of total Housing Credit
Up to 1,200	40,369	66.4	38,162	70.8
Between 1,200 and 4,000	19,184	31.5	14,786	27.4
Over 4,000	1,283	2.1	990	1.8
Total	**60,836**	**100.0**	**53,938**	**100.0**
Of which:				
Housing loans that were granted abroad	295		227	

Footnotes:

(1) The balance of credit is after deduction of allowance for credit losses in the amount of NIS 235 million (31.12.2021: NIS 258 million).

(2) The outstanding balance of credit to the public includes housing loans in the amount of NIS 282 million, which are integrate in the transactions and security layout of the business of commercial borrowers, or which have been granted to acquisition groups, the projects being constructed by them are in stage of construction (December 31,2021: NIS 252 million).

Volume of problematic debts in housing credit

	Balance of credit to the public(1)(5)	Balance of problematic credit: Accruing	Balance of problematic credit: Non-accruing	Balance of problematic credit: Total	Balance of allowances for credit losses(2)(3)	Ratio of problematic debt
	In NIS millions					Change in %
June 30, 2022	61,071	75	(4)243	318	(2)235	0.5
December 31, 2021	54,196	-	(4)281	281	(2)257	0.5

Footnotes:
(1) Recorded amount.
(2) As of June 30, 2022, the balance of the allowance includes a group allowance computed in accordance with the instructions regarding allowance for current expected credit losses (CECL).
(3) As of December 31, 2021, the balance of the allowance includes a minimum allowance of NIS 61 million, computed according to the extent of arrears, a specific allowance in access of the minimum allowance in the amount of NIS 1 million, and a group allowance of NIS 195 million, comprising 0.36% of the balance of credit, in respect of which no minimum allowance according to the extent of arrears was recognized.
(4) As at June 30, 2022 the balance of the problematic credit in arrears of 90 days or more. As at December 31, 2021, total problematic credit
(5) The outstanding balance of credit to the public includes housing loans in the amount of NIS 282 million, which are integrate in the transactions and security layout of the business of commercial borrowers, or which have been granted to acquisition groups, the projects being constructed by them are in stage of construction (December 31, 2021: NIS 252 million).

Distribution of housing credit granted, according to financing ratios and as a ratio of credit granted

	For the six months ended June 30,				For the year ended December 31,	
	2022		2021		2021	
Loan to value (LTV) ratio(1)	In NIS millions	% of total Housing Credit	In NIS millions	% of total Housing Credit	In NIS millions	% of total Housing Credit
Up to 45%	2,599	24.5	1,919	26.7	4,351	25.7
Between 45% and 60%	3,631	34.2	2,438	33.9	5,885	34.7
Over 60%	4,386	41.3	2,831	39.4	6,719	39.6
Total	**10,616**	**100.0**	**7,188**	**100.0**	**16,955**	**100.0**

Footnote:
(1) The loan to value (LTV) ratio is computed in respect of the purchased asset and does not include additional collateral, if granted.

The average loan period of housing loans at the Bank (standalone) in the first half of 2022, was 23.2 years, compared with 23.6 years in the industry. The amount of credit for a period of over twenty years amounted to 54% of the whole credit portfolio of housing loans at the Bank.
The data regarding the distribution of extended credit as of June 30, 2022, by period of loan shows that the granting of loans for periods of over twenty years reached a rate of 67.2% of the portfolio.

Data regarding developments in housing credit balances according to linkage segments

	Non-linked credit			CPI linked credit			Foreign currency linked credit			
	Fixed interest	Variable interest		Fixed interest	Variable interest		Fixed interest	Variable interest		
	In NIS millions		% of total Housing Credit	In NIS millions		% of total Housing Credit	In NIS millions		% of total Housing Credit	Total Housing Credit (1)(2)
As at June 30, 2022	19,547	24,830	72.9	5,372	10,974	26.9	23	90	0.2	60,836
As at December 31, 2021	16,732	22,068	72.0	5,157	9,857	27.8	23	101	0.2	53,938

Footnotes:
(1) The outstanding balance of credit to the public includes housing loans in the amount of NIS 282 million, which are integrated in the transactions and security layout of the business of commercial borrowers, or which have been granted to acquisition groups, the projects being constructed by them are in stage of construction (December 31, 2021: NIS 252 million).
(2) The balance of credit is after deduction of allowance for credit losses of NIS 235 million (December 31,2021: NIS 257 million).

Most of the loans are granted for an initial period of up to 30 years. The average period of the loan at the Bank is slightly lower than that of the industry.
The outstanding balance as of June 30, 2022 of the housing loans portfolio according to the present period to maturity of over 20 years, amount to NIS 8,329 million, comprising 13.7% of the total housing loans portfolio (as of December 31, 2021, the balance amounted to NIS 6,446 million, comprising 12.0% of the total housing loans portfolio).

Composition of loans granted for housing purposes, divided by the ratio of repayments to earnings

	For the six months ended June 30				For the year ended December 31	
	2022		2021		2021	
Ratio of payment to income (PTI)[(1)]	In NIS millions	% of total Housing Credit	In NIS millions	% of total Housing Credit	In NIS millions	% of total Housing Credit
Up to 40%	10,052	99.4	6,673	99.8	15,833	99.7
Over 40%	57	0.6	14	0.2	41	0.3
Total	**10,109**	**100.0**	**6,687**	**100.0**	**15,874**	**100.0**

Footnote:
(1) The amount of loans granted do not include loans secured by a mortgage on a residential unit, balloon loans and bullet loans.

In accordance with the directives, the repayment ratio is restricted to 50%. The capital allocation required for loans with a repayment ratio in excess of 40% stands at 100%, with this not being connected to the requested financing rate. Against the background of these requirements, the granting of housing loans at a rate in excess of 40% is negligible.

Credit risk of private individuals (excluding housing credit risk)

General. The data presented in his section comprise data of operation in Israel, excluding housing loans, and they include the Bank and MDB. Certain data relating to credit to private individuals at ICC is presented separately hereunder, in accordance with available data of ICC.
Definitions. Following are the definitions used in the preparation of this report:
Amount of income per account – average income of a recurring pattern from salaries, annuities, transfers and deposits, after elimination of exceptional amounts.
Balance-Sheet credit upper limit – in accordance with the reporting to the Supervisor of Banks under Reporting to the Supervisor of Banks Directive No. 836 – current account balances, credit cards and loans. Excluding non-utilized facilities of current account and credit cards.
"Financial assets portfolio" – the financial assets portfolio related to the account of the customer: financial deposits (including current account balance), securities portfolio and other financial assets.

Development in balances

Distribution by customer's fixed income and by financial assets portfolio related to the account

	Balance Sheet Credit Risk				
	Financial assets portfolio				
	Less than NIS 50 thousand	Greater than NIS 50 thousand	Total balance credit risk	Total off-balance credit risk	Total credit risk
	Balance in NIS million				
	June 30, 2022

Balance of allowance for credit losses	446	399	11.8	2.4	2.2

Footnotes:
(1) The data as of December 31, 2021, relates to impaired credit risk. In the absence of possibility of comparison between the data, there is no significance to the rate of change.
(2) On an annual basis.

Credit risk regarding the purchase of motor vehicles. The balance of credit granted for the purchase of motor vehicles, pledged (in the Bank, in MDB and in ICC), amounted to NIS 1,515 million at June 30, 2022, compared to NIS 1,677 million as of December 31, 2021.

Additional details

Background

Credit products. The credit activity in this field is conducted in three principal channels: current account credit facilities, credit card facilities and loans.
The loans comprise the major part of consumer credit balances, and are usually granted in amounts of less than NIS 50 thousand and for short periods (mostly up to five years). The market share of loan operations conducted outside the branch premises rises gradually year by year and constitutes a central layer of the total consumer credit activity.
Credit underwriting. Over the years, the Bank has developed advanced models for the assessment of risk relating to a customer seeking credit. The underwriting processes in respect of consumer credit at the Bank are accompanied by wide use of the model products and are conducted in accordance with the Bank's credit policy, carefully modifying the product to the needs of the customer.

Credit underwriting at the branches is comprised of two layers: the one – underwriting under authority, performed at the discretion of an authorized factor using indications and products of models as to the risk rating of the customer, his repayment ability, as well as additional indications required in accordance with the customer's risk and the amount of the loan. The other – automatic underwriting, being performed generally in the case of loans in relatively small amounts and in accordance with the recommendation of the model, which takes into consideration the risk level of the customer, his repayment ability and the past experience of the Bank with the borrower.

Development of the risk

Starting with the previous decade, the credit granted to households doubled its ratio in the credit portfolios of the five large banking groups. Most of the growth in credit to households in Israel stems from housing loans (about two thirds of credit granted to households). At the same time, the credit to households granted by off-banking entities continued to grow, though its share is still low in relation to banking credit.
The Corona crisis, which broke out in the first quarter of 2020, caused a decline in the GDP, a rise in unemployment, as well as to assistance, mostly governmental, provided to private customers and to small businesses. Such assistance that was provided by way of grants, funds guaranteed by the Government and the deferral of loan repayments, which together with additional aspects, led to a decline in the number of problematic customers and to a decline in credit risk.
Also at the end of the first half of 2022, despite the return of the economy to a fully regular activity and the relative time that had passed since the assistance period, the credit loss indices remained at a relatively low level as compared to those that were pre-Corona period, although a part of the indices records an upward trend. Expectation exists of an increase in the risk environment in light of the volatility in the markets and in particular in light of the expected increase in interest rates, inflation and the potential for damage to certain economic sectors.

Risk mitigating measures

Determining underwriting thresholds. Within the framework of determining the risk appetite, underwriting thresholds have been set, which reflect the maximum level of risk in which new consumer credit may be provided. Deviation from these rules is possible only in exceptional cases and in limited amounts, while ascending the authorization scale.
Models and analytical tools. The process of determining the consumer credit risk at the Bank is accompanied by statistical models, which calculate the credit risk assessments (LGD and PD) that forecast the customer's risk level and the marginal transaction. The models are based upon variables referring to the characteristics of the customer, his repayment ability, financial stability and his banking past. The models are being updated from time to time in accordance with market changes, state of the borrowers and additional factors.
Effective measurement. All business units at the Bank are being measured on a current basis by the quality of the consumer credit portfolio under their responsibility, and by their adherence to the underwriting rules. All functions related to credit underwriting have defined indices, the aim of which is maintaining the quality of the portfolio and the wide distribution of credit to the extent possible.
Use of information obtained from the credit data base. Credit underwriting if performed using information obtained from the data base, subject to minimum levels of materiality, as defined by the Bank and to limitations set by law.

The fairness principle

In accordance with guidelines of the Supervisor of Banks, criteria for the initiation and marketing of credit to the private individual customer population were defined, in respect thereof the Bank is permitted to initiate offers for the granting of credit. The rules are based upon the risk level of the customer as well as on the advisability of accepting the loan on the part of the customer.
The approach to the customer is made according to conversation scenarios that include proper disclosure of the loan terms, needs of the customer and his characteristics as well as mention of the assets and liabilities stated in the customer's account.

It is noted that the fairness principle as regards the customer, has been defined both as part of the risk appetite of the Discount Group and as part of the credit underwriting policy regarding private customers.
The principle of fairness and decency as regards debtors is being applied both while they are being handled under the responsibility of the managing branch as well as after passing them on for legal proceedings by the law offices engaged by the Bank. The guideline is to try and reach an arrangement with each debtor in default, which meets his capabilities and his repayment ability.
The Bank implements the requirements of the Fair Credit Act, 1993.

Monitoring and control

The Bank performs on a current basis, control over the quality of underwriting, adherence to policy rules and proper disclosure rules. Control is performed by means of compliance officers in the business units, credit controllers and the internal audit.
Current monitoring is also performed with respect to the quality of the consumer credit portfolio at the Bank.

For details regarding loans to private individuals portfolio (excluding housing loans), see the risks report.

Quantitative data regarding credit granted to private individuals in ICC

A rise at the rate of 11.1% was recorded in the first half of 2022 in the balance of interest bearing credit granted to private individuals, in continuation of a rise of 11.9% in 2021. This credit amounted as of June 30, 2022, to NIS 6,414 million, compared with NIS 5,772 million as of December 31, 2021, and comprises 58.7% of total credit to private individuals at the responsibility of ICC, most of which is credit carrying variable interest rates regarding credit transactions, revolving credit card transactions, loans, designated credit for the purchase of vehicles and other transactions. The remaining credit to private individuals amounted to NIS 4,521 million, as compared to NIS 4,147 million as of December 31, 2021 (an increase of approx. 9%), reflecting balances of regular transactions, installment transaction on account of the trading house and other transactions. The major part of credit losses stems from interest bearing credit.
Credit losses in respect of private individuals amounted in the first quarter to NIS 31 million, compared to an expense release in the amount of NIS 15 million in the corresponding period last year.

Credit risk in relation to the Construction and Real Estate Sector

The construction and real estate sectors are a central component in the Bank's credit portfolio, and most of the credit to these sectors is managed by the Real Estate wing in the Corporate Division, which possesses a high level of expertise and considerable experience in this field. In this area, the Bank operates subject to the regulatory limitation and in accordance with mitigating instructions determined by the Supervisor of Banks, within the framework of the Provisional Instruction, in order to enable confronting the Corona crisis, according to which banks may increase the volume of credit extended to the construction and real estate sector, so that the rate of credit in this sector shall not exceed 26% of total credit, and after deduction of indebtedness of national infrastructure projects, shall not exceed 22%. The banks would be required to revert to a rate of 20% during a period of twenty-four months as from December 31, 2025, on condition that the rate of indebtedness during the said two years would not exceed the rate at December 31, 2025. The Bank conforms to the said limits and also to internal limits serving as alert levels.
The credit policy for the sector focuses on financing activities in Israel, while giving priority to long-established borrowers having a high level of financial strength, with whom the Bank has positive business experience. The financing of entrepreneur residential construction projects and income generating real-estate projects is conducted by the closed loan method, under minimum requirements, including equity capital, minimal estimated profitability, compliance with stress tests (inter alia, price reduction scenarios), price reduction absorption ability, early sales and more – for a fuller explanation, see the "Construction and Real Estate Activity" under "Additional Details Regarding the Business of the Banking Corporation and Management Thereof" chapter.

During the first half of 2022, the scope of exposure of the Bank to the construction and real estate sector grew at a slower pace than that of the corresponding period last year. It is noted, that in 2021 a significant growth regarding this sector was recorded in the banking system as a whole, accompanied by increased competition.
The Bank operates with a focus on financing residential building projects and the purchase of land. The Bank monitors and closely follows the growth in exposure, inter alia, in respect of new transactions having increased risk (see below), and where required, the Bank has made adjustments to the group allowance. It is noted that the Bank has increased the insurance coverage in 2021. The rate of exposure to credit in the construction and real estate sector at the Bank dropped from 17.12% at the end of 2021 to 16.65% in the end of the first half of 2022.

Reinforcement of monitoring and control procedures and expansion of disclosure regarding credit to the construction and real estate sector

The Supervisor of Banks issued on August 19, 2021, a letter in the matter of "Growth in credit risk pertaining to the construction and real estate sector", on the background of the significant growth that had taken place at the banking system during the first half of the year with respect to business credit balances in general and in credit balances to the construction and real estate sector in particular, and in view of the increase in competition and the growing risk appetite, and in consequence thereof, an increase in credit risk. The letter requires banking corporations to reinforce their monitoring and control procedures as regards the development of risks, especially with respect to new credit transactions. Within the framework of monitoring and control, as stated, banking corporations are required to determine criteria for credit underwriting defined by them as "increased risk" credit (on the basis of parameters stated in an Annex to the letter). Moreover, banking corporations are required to adjust the computation of the group allowance for credit losses following the fast growth of the credit portfolio and the relaxation in underwriting conditions.
In continuation to that stated above, and on the background of the growth in risks pertaining to the construction and real estate sector, banks were required by the Supervisor of Banks, on October 11, 2021, to expand, as from the report for the third quarter of 2021, the quantitative and qualitative disclosure regarding the construction and real estate sector presented in their Boards of Directors and Managements' reports, and accordingly, a Table was added detailing credit exposure and data regarding credit rated for granting and credit not rated for granting. In a further letter from the Banking Supervision Department, dated December 30, 2021, the banking corporations were required to make an adjustment to the group allowance in the 2021 financial statements in view of the rise in the risk and the level of exposure to the construction and real estate sector, as well as expanding the disclosure on this topic.
On March 20, 2022, the Supervisor of Banks published a letter headed "The rise in credit risk relating to the construction and real estate sector", in which the Supervisor informed of his intention to apply regulatory measures that include a demand for an additional capital allocation regarding the finance of highly leveraged land purchases, delivery of samples representing the underwriting and classification of credit and expansion of reports to the Supervisor regarding the construction and real estate sector.
In continuation thereof, an Amendment to Proper Conduct of Banking Business Directive No. 203, was published on May 22, 2022, in the matter of the standardised approach to the measurement of credit risk and capital adequacy, according to which the list of debts averaged at the rate of 150% risk would include loans intended to finance the purchase of land for development or building purposes at a rate exceeding 80% of the value of the purchased property, excluding loans financing the purchase of agricultural land having no planning horizon or intention to file a request for a change in zoning, and loans financing the purchase of land for the personal use of a borrower who is not classified to the construction and real estate sector. The Amendment takes effect on June 30, 2022, though the effect of the existing amount of loans on the capital adequacy ratio may be spread at fixed quarterly installments until June 30, 2023 (beginning with the third quarter of 2022).
A detailed analysis of transactions effected at Discount Bank, indicates a decline in the volume of new credit matching the criteria of increased risk, in the first half of 2022 as compared to the second half of 2021, especially with respect to credit of this type extended to finance the purchase of land for construction.
During the reported period, MDB extended an insignificant amount of credit to the construction and real estate sectors, which matches the definition of increased risk credit, in accordance with parameters defined by this bank.

As of June 30, 2022, MDB has an outstanding balance of credit extended to the construction and real estate sectors at a negligible amount, answering to the definition of "intensified credit risk" in accordance with parameters defined by this bank.
The data presented hereunder relate to operations conducted in Israel (operations by Discount Bank and by MDB).

Development of credit risk relating to the construction and real estate by principal characteristics

Distribution of credit risk and problematic debts in the construction and real estate sector

	June 30, 2022					December 31, 2021					
Sector	Credit for the public	Guarantees	Unutilized facilities	Total Credit Risk	Of which: problematic credit	Credit for the public	Guarantees	Unutilized facilities	Total Credit Risk	Of which: problematic credit	Change in total credit risk
	in NIS million										%
Income generating real estate	12,722	231	1,827	14,780	358	11,487	197	1,774	13,458	336	9.8
Construction – general building contracting	692	367	295	1,354	43	1,019	565	335	1,919	56	(29.4)

Acquisition of building land	11,441	386	491	12,318	393	10,424	347	425	11,196	145	10.0
Subcontracting	1,584	1,159	572	3,315	98	1,519	1,071	622	3,212	108	3.2
Civil engineering work	1,480	1,915	1,163	4,558	47	1,625	1,766	857	4,248	100	7.3
Other	1,305	451	654	2,410	87	1,346	382	408	2,136	79	12.8
Total	**34,868**	**10,848**	**15,156**	**60,872**	**1,061**	**32,319**	**9,879**	**15,187**	**57,385**	**995**	**6.1**

The credit risk relating to the construction and real estate sector grew in the first half of 2022 at a rate of 6.1%, in continuation to an increase at a rate of 24.4% in 2021.

Breakdown by quality of credit portfolio

	June 30, 2022	December 31, 2021	
	in NIS million		Change in %
Non-accruing debts	663	239	177.4
Impaired debts in Arrears of 90 Days or More	9	7	28.6
Other problematic debts	389	749	(48.1)
Total problematic debts	**1,061**	**995**	**6.6**
Non-problematic debts ranked as "performing"	58,422	(2)55,453	5.4
Non-problematic debts not ranked as "performing"	1,389	937	48.2
Total Credit	**60,872**	**57,385**	**6.1**
Debts whose settlement date has been deferred, at the customer's request(1)	-	9	(100.0)

Footnote:
(1) Requests for deferment of loan settlement dates due to the economic crisis that developed as a result of the "Corona virus" event.
(2) Reclassified – due to improvement of data.

As shown by the Table, the credit risk for non-accruing debts for the construction and real estate sector increased in the first six months of 2022 by approx. 177.4%. Other problematic debts decreased by 48.1% and performing credit which is not at credit rated for granting increased by approx. 48.2%.

For details regarding the purchase of a policy to insure against credit risk related to Sale Act guarantees and performance guarantees and with respect to the purchase of credit risk insurance in the real estate field, see the risks report.

Breakdown by type of financing

	June 30, 2022	December 31, 2021	
	in NIS million		Change in %

Without real estate collateral	15,289	15,545	(1.6)
Total	**60,872**	**57,385**	**6.1**

Credit risk in respect of leveraged finance

Definition of leveraged finance. Defined as credit for the finance of capital transactions by corporations, granted at a high financing ratio and credit granted to borrowers typified by a high leverage finance level which significantly exceeds accepted norms in this sector of operations. According to Proper Conduct of Banking Business Directive No. 327 the definition of leveraged loans has been set, and it includes, among other things, transactions for the acquisition of another corporation, purchase of own shares and the distribution of capital.

Credit risk in respect of leveraged finance. The Bank's credit policy determines strict guidelines regarding underwriting and restrictions on the scope of exposure to leveraged finance. In addition, developments in leveraged finance and compliance with the determined limitations are reported once in each quarter to the Bank's Management and the Board of Directors, this, in order to monitor the risks inherent in such financing.

Proper Conduct of Banking Business Directives determined restrictions regarding the finance of capital transactions, which the Bank abides by.

Following are data regarding credit risk pertaining to leveraged finance as of June 30, 2022. The disclosure is focused on exposure leverage transactions, each of which exceeds the threshold set in the Bank's policy and subject to Proper Conduct of Banking Business Directives.

The Bank's exposure to leveraged finance according to economic sector of the acquired corporation

	June 30, 2022				December 31, 2021			
	Balance sheet exposure	Off-Balance sheet exposure	Total exposure	Specific allowance for credit losses	Balance sheet exposure	Off-Balance sheet exposure	Total exposure	Specific allowance for credit losses
Sector	In NIS millions							
Construction and real estate	303	-	303	-	118	-	118	-
Commerce	81	-	81	-	-	-	-	-
Renting activity and Other Business Services	101	-	101	-	262	4	266	-
Public and Community Services	262	4	266	-	-	-	-	-
Total	**747**	**4**	**751**	**-**	**380**	**4**	**384**	**-**

Exposure to leveraged finance as of June 30, 2022 amounted to NIS 747 million, compared with NIS 380 million as of December 31, 2021. The balance of exposure presented in the table above, is after accounting write-offs.
The off-balance sheet exposure in respect of leveraged finance transactions as of June 30, 2022, amounted to NIS 4 million, similarly to that of December 31, 2021.
For additional details, see "Credit risk" in the document "Disclosure according to the third pillar of Basel and additional information regarding risks", which is available for review on the MAGNA website of the Israel Securities Authority and on the MAYA website of the Tel Aviv Stock Exchange as well as on the Bank's website.

Additional disclosure regarding credit risk in respect of significant exposure to borrower groups

With a view of assessing credit risks at the Group's level, the Bank holds an ongoing monitoring and follow-up of the Discount Group's exposure to large borrowers/groups of borrowers with indebtedness exceeding 6% of the Bank's equity and compliance with the limitations set by the Bank of Israel, as well as with heavier internal limitations determined by the Bank in respect of each of the groups. In addition, the Bank conducts in-depth examinations and periodic discussions regarding the large borrower groups.
The Bank complies with the Bank of Israel limitations in respect of a single borrower and in respect of the large borrower groups.
One borrower group has an indebtedness of 15.29%, as against a restriction at a rate of 25% determined in Proper Conduct of Banking Business Directives. Indebtedness of the group complies also with the internal limitation determined by the Bank's Board of Directors, within the framework of credit risk management regarding groups of borrowers.

Significant exposure to borrower groups

	June 30, 2022						
Borrower group	Balance sheet credit risk(1)	Off-balance sheet credit risk(1)	Of which: off-balance sheet credit risk in respect of derivative instruments	Gross indebtedness	Deductions(1)	Net indebtedness(2)	Ratio of regulatory capital
	In NIS millions						In %
A	2,677	985	178	3,662	73	3,589	15.29%

Footnotes:
(1) After deduction of the balance of accounting write-offs and the balance of allowances for credit losses computed on a specific basis.
(2) The data presented above reflects exposure to borrower groups and is stated net of deductions permitted under Directive 313, and net of the allowance for credit losses computed on a specific basis. Accordingly, such data is not comparable with the data regarding borrower indebtedness presented in other disclosures in this report.

Group "A" includes a large Government corporation engaged in infrastructure, constituting a monopoly in its field, as well as many borrowers, the main source of credit repayment of whom, relies upon their business with this corporation. The major part of the credit of this group is granted as project financing, which is considered by the Bank as having a low risk level.
Proximately subsequent to the date of this Report, the group has repaid credit to the tune of approx. NIS 300 million, and at date of publication of this Report, indebtedness of the Group is lower than 15% of the Tier I capital of the Bank, though the Bank may continue and increase its exposure to this group, all subject to the internal limitations set by the Bank's Board of Directors, which, as stated, are stricter than the regulatory limitations.

Market Risks

Market risks are presented in this review on a Group basis that includes the Bank, Mercantile Discount Bank, IDB Bank, ICC and the severance pay fund for the Bank's employees (hereafter in this section: "the Group"). Other Group companies do not have any material market risk.

For general details regarding market risks, see the 2021 Annual Report (pp. 94-104).

Quantitative information regarding interest risk – sensitivity analysis

Net adjusted fair value of financial instruments

Interest decline in the short-term	(160)	73	(87)	(307)	(216)	(523)	(202)	(167)	(369)

Footnotes:

(1) Net fair value of financial instruments, excluding nonfinancial items and net of the effect of liability for employee rights and allocation to periods of on-call deposits.

(2) Curving – decline in interest in the short-term and increase in interest in the long-term.

(3) Flattening – increase in interest in the short-term and decline in interest in the long-term.

(4) Including Israeli currency linked to foreign currency.

(5) After offsetting effects.

Foreign currency - The change in interest rate exposure in the interest scenarios stemmed mainly from the effect of the increase in yields on the exposure of interest rates, mainly on the deposits side, in a manner that their contribution to exposure in the interest rate increase scenario, decreased more than the decrease in assets. In the scenario of a decrease in interest rates, there was a significant decrease in exposure.

It is noted, that the absence of symmetry between the results of a rising interest scenario and a declining interest scenario, stems, mostly, from the fact that a "minimum interest rate" applies to a part of the deposits with IDB New York, a minimum rate of interest payable on a certain class of deposits irrespective of the prevailing market interest rate. The assumption is that under a scenario of declining interest rates, the interest payable on the said deposits is not reduced and does not reduce the interest expense.

Israeli currency – Most of the change in exposure stems from the effect of the increase in yields on the exposure of interest rates and the continued growth in the operations of the Bank, particularly in the mortgages field.

The impact of scenarios of changes in interest rates on net interest income and on non-interest financing income

Sensitivity of the income is calculated on the basis of various assumptions regarding the effect of a change in interest on the return on assets and the cost of the deposits (Beta) and application of minimum interest levels for pricing.
The rise in sensitivity of the income to changes in interest in the first half of 2022 stemmed from an increase in the volume of current account deposits, which were used to increase credit and to enlarge liquidity balances.
For additional quantitative and qualitative details about the interest risks, see the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which is available for perusal on the Bank's website, on the MAGNA website of the Israel Securities Authority and on the MAYA website of the Tel Aviv Stock Exchange Ltd.

Sensitivity analysis to the effect of changes in interest rate based on the fair value of financial instruments

Fair value of financial instruments. Most of the Bank's balance sheet financial instruments do not have a quoted "market price" as they are not traded on an active market. Accordingly, in accordance with the directive, the fair value is estimated using accepted pricing models, and in particular through the calculation of the present value of the discounted cash flows using a discount interest rate appropriate to the level of risk embodied in the instrument.
The determination of the discount interest rate is subjective. Thus, for most of the financial instruments, the fair value estimate presented below does not necessarily constitute an indication of the realizable value of the financial instruments on the reporting date.
The assessment of the present value of future cash flows was done in accordance with the interest rates in effect on the reporting date, without taking into consideration fluctuations in interest rates. Using different discount rates assumptions, may result in significantly different fair value amounts. This relates particularly to financial instruments bearing a fixed interest rate or non-interest bearing.
It should be further noted, that the differential between the book value of the financial instrument and its fair value, may never be realized, as the Bank usually holds the financial instrument to maturity.
In consequence of the above, it should be stressed that the data included in this Note, is no indication of the Bank's value.
Furthermore, due to the broad spectrum of possible assessment techniques and estimates in implementing the reporting directives with regard to the fair value, care should be taken when examining the fair value data itself as well as when comparing it with the fair value data presented by other banks.

Hybrid financial instruments are debt instruments, in which are embedded derivative components that have not been separated there from. In providing information regarding fair value, the Bank is not required to classify financial instruments as hybrid financial instruments, because, according to the Bank of Israel's guidelines, the interest rate exposure of these instruments included the division of such transactions according to maturity dates, while separating the option component from these instruments. Following are details of the hybrid financial instruments, where in the disclosure regarding exposure to changes in interest rates, the separated option and the host instrument have been treated as standalone instruments (the effect on the financial statements is not material): deposits with the option of a fixed rate of interest or of a variable rate of interest, savings deposits linked to the CPI or linked to foreign currency with an option for changing the linkage base and an option securing the Shekel principal sum deposited, deposits and loans linked to the CPI or linked to foreign currency with an option for securing the Shekel principal sum.

For further details regarding the main methods and assumptions used in assessing the fair value of financial instruments, see Note 34 to the financial statements as of December 31, 2021 (pp. 299-301).

Following are certain updates as of June 30, 2022:

- The fair value of problematic debts - increasing the discount interest rate by 1 basis point would have reduced the fair value of the problematic debts by NIS 0.9 million. Increasing the discount interest rate by 0.1 basis point would have reduced the fair value of the problematic debts by NIS 1 million (compared to no effect and a reduction of NIS 1 million, respectively, as of December 31, 2021);
- Cash flows in respect of mortgages have been evaluated on the basis of an early redemption forecast based on a statistical model. Discounting the said cash flows in accordance with expected redemption dates instead of the contractual redemption dates, increased the fair value of the mortgages, particularly in the CPI linked segment, by NIS 888 million (compared to a reduction of NIS 125 million as at December 31, 2021);
- The average period to maturity of assets in the CPI-linked segment, based on the original cash flow, which does not take into consideration early redemptions, reached 3.62 years on June 30, 2022, compared to 3.24 years, taking into consideration the forecast for early redemptions (compared to 4.14 years and 3.63 years, respectively, as of December 31, 2021);
- Cash flows in respect of deposits were evaluated on the basis of an early redemption forecast based on a statistical model. Discounting the said cash flows in accordance with expected redemption dates instead of the contractual redemption dates, decreased the fair value of the deposits by NIS 413 million (compared to a reduction of NIS 90 million at December 31, 2021);
- The average period to maturity of liabilities in the CPI-linked segment, based on the original cash flow, which does not take into consideration early redemptions, reached 2.91 years on June 30, 2022, compared to 2.77 years, taking into consideration the forecast for early redemption (compared to 3.07 years and 2.95 years, respectively, as of December 31, 2021).

For details regarding the effect of changes in interest rates on the fair value of problematic debts, see Note 34 C to the financial statements as of December 31, 2021 (p. 390).

The net changes in fair value, in the different linkage segments, stem from the active management of the active capital and the decision to move it in accordance with returns expected in the different linkage segments.

No weekly cumulative change occurred in the past ten years, which had it occurred in the reported period would have adversely affected the "going concern" assumption used at the basis of preparation of the financial statements.

Sensitivity analysis according to data used for interest exposure management (hereinafter: "economic exposure")

The data presented above, was computed on the basis of fair value, as required by the public reporting directives of the Supervisor of Banks and in accordance with the calculation of the table "Exposure to interest rate changes", which is presented within the framework of the document "Disclosure according to the third pillar of Basel and additional information regarding risks".

The current management of exposure to interest rates applies to all of the Bank's operations, and takes into consideration additional data that represent the economic approach to the management of exposure of the economic value of the Bank's equity to changes in interest rates.

The principal differences between the computation of exposure according to accounting fair value and the managed economic exposure are as follows:

(a) The computation of the accounting fair value made use of graphs that take into consideration credit margins. Computation of the economic exposure made use of graphs representing the transfer prices;

(b) Items relating to liabilities for employee rights are included in the economic measurement in the CPI-linked segment, while in the accounting measurement they are presented in the unlinked segment;

(c) Economic exposure takes into consideration expected future cash flows, such as deposits in savings schemes, in contrast to the calculation on the fair value basis, which does not take into account such future deposits;

(d) A non-accruing debt is related in economic exposure to the non-linked segment, as it does not carry interest, while in fair value calculations, it is presented in its original segment;

(e) Optional savings schemes are presented at fair value in their principal linkage segment, while in economic exposure each component is presented in its related linkage segment.

Effect of hypothetical changes in interest rates of 100 base points on the Group's economic value

The change in interest rates	Non-linked	CPI linked	US dollar	Other foreign currency	Total
			In NIS millions		
			As of June 30, 2022		
An increase of 100BP in interest rates	(586)	(233)	(46)	20	(845)
A decrease of 100BP in interest rates	601	141	(3)	(21)	718
			As of December 31, 2021		
An increase of 100BP in interest rates	(654)	(78)	21	44	(667)
A decrease of 100BP in interest rates	633	114	(259)	(53)	436

The changes between the effect of the changes in interest in this table and the changes presented in the table "the impact of scenarios of changes in interest rates on the net adjusted fair value" shown above are due mainly to the use of different discounting curves in the two measurements, as set forth above. This effect is expressed primarily in the non-linked segment, as there is a significant gap in the results in this segment when use is made of the cost of credit rather than using the transfer price, this is because most of the interest exposure derives from the credit portfolio. In the dollar segment (including foreign currency) there is no material gap between the two tables, since most of the interest exposure in this segment derives from the deposits, which are not affected by the gap between the transfer price and the cost of credit.

In addition to a scenario of a parallel move in the interest graphs, the exposure to non-parallel changes in the various interest graphs is also being studied.

Replacement of foreign interest benchmarks (base rates) and its repercussions

General. On March 20, 2019, the Supervisor of Banks addressed a letter to the banking corporations, in which they are requested to prepare for the anticipated discontinuation of the publication of interest benchmarks existing around the world and their replacement with other benchmarks. On February 13, 2020, the Supervisor of Banks published a letter regarding disclosure of the preparations made with respect to the discontinuation of the use of the LIBOR rate, on the background of disclosure guidelines published by the SEC in the matter.

Discontinuation of the use of LIBOR interests. In accordance with the pronouncement made by the UK's Financial Conduct Authority (FCA) in July 2017, it has been decided to gradually terminate the use of the LIBOR interests in stages through the end of 2021. Further to this decision, various work teams have been set up around the world in order to determine interest indices, as an alternative to the LIBOR interest rates. In May 2020, the Bank informed the relevant customers with respect to the anticipated change and the preparations made by the Bank in the matter.

ICE Benchmark Administration Company, the administrator for the dollar LIBOR interest, announced on November 30, 2020, its intention to defer to June 2023, the termination of publishing the US dollar LIBOR interest in respect of the most material tenors (one month and three months).

Furthermore, the International Swaps and Derivatives Association (ISDA), published on October 23, 2020, the ISDA 2020 IBOR Fallbacks protocol, which includes swap mechanisms for LIBOR interest. The Bank adopted the said protocol on February 1, 2021.

The main risks and the Bank's preparations therefor. The discontinuation of the use of LIBOR interests and the transition to alternative interest indices create various risks - operational, IT systems, the Bank-customer relations, financial and legal, that arise from the Bank's operations with its customers. The Bank is making preparations to identify the risks, inter alia, by means of mapping all the relevant forms, contracts and exposures.

The Bank has examined the expected effect of discontinuing to publish the LIBOR interest and has implemented the transition to new interest indices in relation to each of the relevant currencies.

In December 2021, the Bank completed its operational and legal preparations for the transition to the new interest indices for the credit products and derivatives. In addition, the loan forms and contracts to be used with the new interests have been updated. The Bank has held training sessions for employees to be able to support customers using foreign currency credit products and has sent notices and announcements to the relevant customers in accordance with the requirements of Proper Conduct of Banking Business No. 250A.

Material exposures. The Bank has various contracts that continue beyond 2021 which relate to LIBOR interests.

Discount's exposure to the LIBOR interest rate in respect to exposures that will continue beyond June 30, 2023 – in US$ currency

	June 30, 2022		December 31, 2021	
	Number of transactions	Book value in NIS million	Number of transactions	Book value in NIS million
Loans	1,270	9,398	1,338	8,924
Securities	21	645	21	575
Total	**1,291**	**10,043**	**1,359**	**9,499**
Derivatives (volume transactions)	1,208	52,762	1,239	46,958

The Discount Group is no longer exposed to the LIBOR interest with respect to other currencies.
The Table includes data of Discount Bank, MDB and of IDB Bank.

For additional details, see the 2021 Annual Report (pp. 100-101).

Inflation and exchange rate risk

Exposure to base risk is measured in the CPI linked segment and in the foreign currency segment (including Israeli currency linked to foreign currency). For details regarding assets and liabilities according to linkage terms, see Note 15 to the condensed financial statements.

Capital sensitivity to changes in exchange rate. The capital's sensitivity to changes in exchange rate is presented in the following table, which provides details regarding the impact of changes in exchange rates of the major currencies on the capital as of June 30, 2022.

Effect of hedging relations and transactions in derivative instruments on the exposure. The exposure in the CPI-linked segment is created due to an excess of applications in relation to sources in this segment. In order to hedge the exposure in the CPI-linked segment, the Bank makes use of contracts on the consumer price index. As a general rule, the Bank's policy is not to create an exposure to foreign currency exchange rates in its ongoing activity. Coverage of the built-in foreign currency position, which arises from the investment in IDBNY, was canceled several years ago, in order to reduce the sensitivity of the capital ratio to changes in exchange rates (see above "Exposure regarding the investment in Discount Bancorp Inc." in section "Capital and capital adequacy").

The Bank's capital sensitivity of changes in exchange rates

	For the Second Quarter ending on June 30, 2022			
	in NIS millions			
Segment	10%	5%	-5%	-10%
USD	412	206	(199)	(395)
EUR	67	33	(34)	(70)
Other Foreign Currencies	6	3	(3)	(6)

This effect has been computed on the basis of the expected change in the fair value of the Group in the various currencies, given the scenario determined by the Supervisor of Banks.

Sensitivity of the capital to changes in the CPI. The sensitivity of the capital to changes in the CPI is presented in the following Table, which details the effect of a 3% change on the capital as of March 31, 2022.

Sensitivity of the capital to changes in the CPI

	As of June 30, 2022	
	in NIS millions	
	increase of 3%	increase of 3%
	268	(268)

This effect has been computed as the difference between the net fair value based on the "known" CPI, including off-balance sheet items, and the net fair value after raising/reducing the CPI by 3%.

For quantitative and qualitative details about share price risk, see the 2021 Annual Report (p. 103) and in the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which is available for perusal on the Bank's website, on the MAGNA site of the Israel Securities Authority and on the MAYA site of the Tel Aviv Stock Exchange Ltd.

Liquidity and financing risks

Liquidity risk is a risk to the stability of the Group, stemming from the inability to provide for its liquidity needs and the difficulty to honor its obligations, due to unexpected developments, as a result of which, the Group would be forced to raise funds and/or dispose of assets in a manner that would cause it a material loss. The Bank has determined the limitation of maximum exposure to liquidity risk. In addition, the regulatory coverage ratio is being examined and managed on a current basis, as required by Proper Conduct of Banking Business Directive No. 221.
No deviation from the said restrictions was recorded in the second quarter of 2022.
For further details regarding the management of the Liquidity and financing risks, see the 2021 Annual Report (pp. 104-107).

Liquidity coverage ratio

As of the second quarter of 2022, the liquidity coverage ratio of the Discount Group, on the basis of 71 observations average, stood as of June 30, 2022, at 121.28%, compared with 123.05% as of December 31, 2021, higher than the minimum requirements according to the instructions.
For additional details, see Note 9 to the condensed financial statements.

Liquidity and the raising of resources in the Bank

The year 2022 was opened with a liquidity surplus following the raising of debt capital at the end of 2021. The liquidity surplus increased in the first quarter of 2022 due to the growth of deposits from the public exceeding the growth in credit, as well as due to the issue of share capital of approx. NIS 1.4 billion, at the end of March.
In the course of the second quarter of 2022, the Bank used the accumulated liquidity surplus for an accelerated growth in credit.
Transferability of liquidity within the Group. The transfer of liquidity between the Group companies and the Bank is based on the money price mechanism established at the Bank. As stated, the subsidiary companies may not rely upon the transfer of liquidity where no liquidity framework had been defined which is taken into account in the liquidity model at the counterparty.
During the first half of 2022, the Bank maintained liquid assets in a volume larger than that of its liquid liabilities and its internal liquidity model indicated a significant liquidity surplus.
An analysis of the changes during the period in deposits from the public according to linkage bases reveals that most of the growth is due to a rise in the scope of the non-linked and CPI-linked shekel deposits. A growth in retail and wholesale deposits was recorded by the Bank during the first half, stemming, as estimated by the Bank, from the growth in economic activity.

Deposits from the public

	June 30, 2022	June 30, 2021	December 31, 2021	Change compared to June 30, 2021		Change compared to December 31, 2021

For additional details regarding liquidity risks and the management thereof, see the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which is available for perusal as stated, and also Note 15 regarding assets and liabilities according to linkage terms.
For additional details regarding financial risk, see the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which is available for perusal on the Bank's website, on the MAGNA site of the Israel Securities Authority and on the MAYA site of the Tel Aviv Stock Exchange Ltd.

Operational Risks

For details regarding Operational risks and the manner of management thereof, including in the matter of business continuity, see the 2021 Annual Report (pp. 107-108) and the document "Disclosure according to the third pillar of Basel and additional information regarding risks" available for perusal as stated.

Environmental Risks

Environmental and climate risks

Recently the topic of environmental and climate risk has received a high degree of focus from the regulatory authorities, who understand that the materialization of environmental and climate risks could affect the banking system and, in extreme circumstances, could even have global and systemic effects. Accordingly, various regulators around the world, including the Banking Supervision Department, are preparing to map the activities relating to this topic in the banking systems towards future regulation in this field.
In 2009, following a regulatory expectation letter concerning this topic sent to the banking system, the Bank's activities in this field were put in order, including as part of the credit policy and as part of the specific credit approval processes.
The Bank has an organized credit methodology regarding environmental risks that is intended to monitor the risk of credit losses that might be caused as a result of provisions pertaining to environmental quality hazards and the enforcement of such provisions (such as a deterioration in a customer's business position due to penalties resulting from non-compliance with the provisions of the law). Within the framework of the methodology, the Bank has defined an evaluation process for the environmental risk level of customers in economic sectors that might be exposed to environmental risks and for the quality of risk management conducted by these customers. This process is conducted upon the granting the credit and at the time of the periodic assessment of the quality of customers and the quality of the collateral and in accordance with the level of materiality.

On December 1, 2020, a letter regarding environmental risk management was sent to banking corporations and credit card companies by the Supervisor of Banks. The Banking Supervision Department views with great importance the promotion of the environmental risk issue, and sees in the banking corporations important partners in the transition to sustainable environmental economy, inter alia, by way of formation of appetite for environmental risk, credit policy, investments, allocating capital to ”green” financing and investments, etc.
Within the framework of a Bank of Israel circular dated December 2, 2021 regarding the public disclosure of environmental, social and governance (ESG) aspects, it is necessary – inter alia – to examine the need to expand the disclosure concerning the risks in this field to which the Bank is exposed, including due to developments associated with climate change and transition risks, and in order to reflect material changes in the way that such risks are managed and to include, inter alia, quantitative indices for measuring the exposure to these risks.
The Bank is studying the subject in order to prepare for the rise in level of managing environmental risks, climate risks and transition risks, while examining international management and reporting frameworks.

Compliance risks

Prohibition of money laundering and terror financing

Discount Group's activities with banks acting in the Palestinian Authority. In 2018, the Bank received immunity letter and indemnity letter signed by the State of Israel. The letter of indemnity and the letter of immunity are extended from time to time.
Validity of the letters of indemnification and immunity were extended at the beginning of July, 2022 until March 31, 2023. In light of the aforesaid, the Bank for the moment is continuing to provide services to banks operating in the Palestinian Authority.

For further details regarding compliance risks including Discount Group's activities with banks acting in the Palestinian Authority, see the 2021 Annual Report (pp. 112-113).

Other risks

For additional details regarding other risks, see 2021 Annual Report (including: Cross-border risks – pp. 109-110; Information technology risks – p. 110; Strategic risk - p. 110; Reputation risk – pp. 110-111; Data and cyber protection risks - p. 111; Legal risks - p. 112; Conduct risks – p. 113).

Risk Factors Table

The assessment of Model risk impact was reduced from “Medium-High” to “Medium”, in light of improvements made to the models, the range of steps taken by the Group to address the effects of the corona crisis on Model risks, as well as models' development and validation.
The assessment of the effect of the liquidity risk was increased from ”low” to ”low-medium” in view of the rise across the whole system in the cost of raising liquidity in Israel and the world over.
For additional details, see the 2021 Annual Report (pp. 113-117).

Chapter "D" - Accounting policy and critical accounting estimates, controls and procedures

Critical Accounting Policies and Critical Accounting Estimates

The Bank's financial statements are prepared according to generally accepted accounting principles (summarized in Note 1 to the financial statements as of December 31, 2021, pp. 148-166) and according to instructions and guidelines of the Supervisor of Banks.

The level of regulation regarding the financial reporting of banking corporations is among the highest in the financial reporting fields in Israel. The instructions and guidelines of the Supervisor of Banks are comprehensive, detailed and at times even dictate the wording to be used by banking corporations. Nonetheless, there are areas where implementation of the accounting policy involves a high level of evaluation and assessment performed by management of the banking corporation in the course of the preparation of the financial statements.

Implementation by management of the accounting principles and the instructions and guidelines of the Supervisor of Banks, sometimes requires various assumptions, evaluations and assessments that affect the reported amounts of assets and liabilities, including contingent liabilities, as well as the financial results reported by the Bank. It is possible that when the evaluations and assessments materialize in the future, their results may be different than those anticipated at the time the financial statements were prepared.

Certain of the evaluations and assessments applied involve uncertainty or sensitivity to various variables to a large extent. Such evaluations and assessments, changes in which might have a considerable effect on the reported financial results, are considered evaluations and assessments of "critical" matters.

The Bank's Management believes that the evaluations and assessments used in the preparation of the financial statements are fair and were made in accordance with the best of its knowledge and professional judgment.

A summary review of evaluations and assessments made regarding "critical" matters is included in the 2021 Annual Report (pp. 117-124).

Allowances for current expected credit losses (CECL)

Starting with January 1, 2022, the Bank implements the directives of the Supervisor of Banks, which require adoption in full of the accounting principles accepted by US banks with respect to current expected credit losses (CECL), as described in Note 1 E regarding the accounting policy.

In accordance with the new rules, the allowance for credit losses is computed in accordance with the loss expected all along the life of the credit. In assessing the allowance for credit losses, significant use is being made of forward looking information reflecting reasonable and supportable forecasts regarding future economic events. Assessment of the expected loss, as stated, is based on the methodology and models developed by the Bank.

As stated, the process is based upon significant assessments involving uncertainty and on subjective estimates. Changes in assessments or estimates may have a significant impact on the allowance for credit losses presented in the Bank's financial statements.

The Bank examines the overall adequacy of the allowance for credit losses. The said adequacy evaluation is based on discretion of Management, which, inter alia, takes into consideration the assessment methods applied in determining the allowance.

Impairment of Available for Sale Bonds

As from January 1, 2022, the Bank is implementing the Directives of the Supervisor of Banks requiring the adoption in full of accounting principles accepted by US banks in the matter of "financial instruments – credit losses", as described in Note 1 E regarding accounting policy.

In accordance with the new rules, impairment of bonds attributed to credit losses, is recognized by way of an allowance for credit loss, while impairment attributed to other factors, not recognized by way of a credit loss allowance, is to be recognized, net of tax, in other comprehensive income.

Management of the Bank is therefore required to test and assess whether impairment should be attributed to a credit loss, as well as its amount.

In order to test whether a credit loss exists, Managements of the Bank and of the relevant subsidiaries base themselves on different characteristics of the bonds and the issuing companies thereof, such as: the ratio of loss to the amortized cost, the credit rating of the bonds and changes that had taken place in the rating and the attribution of the impairment to an adverse change in the condition of the issuer or to a change in market condition in general, and more.

Furthermore, in assessing the allowance for credit losses, the Bank takes into consideration available relevant information regarding ability of redemption of the bonds, including data relating to past events, present conditions and supportable reasonable forecasts.

The said assessments and characteristics are largely subject to subjective considerations, and accordingly, to changes in assessments and assumptions, in the characteristics supporting them, which in essence may have a significant effect on the allowance for impairment and its classification.

Measurement of financial instruments according to their fair value

The credit risk. In the first half of 2022, the Group recorded income in a negligible amount with respect to the credit risk coefficient (CVA/DVA).

Adjustments made to assets and liabilities in respect of derivative instruments

	June 30, 2022	December 31, 2021
	in NIS millions	
Assets in respect of derivative instruments	11,028	5,529
Adjustment in respect of credit risk regarding assets relating to derivative instruments	(38)	(40)
Liabilities in respect of derivative instruments	9,314	6,328
Adjustment in respect of credit risk regarding liabilities relating to derivative instruments	(8)	(8)

For additional details regarding the measurement of financial instruments according to their fair value, see the 2021 Annual Report (pp. 121-123).

Employee Rights

Updated actuarial opinion. The Bank has ordered an updated actuarial assessment as of June 30, 2022. For details regarding the computation of the actuarial provision amount that would have been required were the cap rate to be determined in accordance with the Israeli Securities Authority's "deep market" guideline, see the actuarial assessment appended to the annual report for 2021.
Presenting the actuary's opinion for perusal. The opinion of the Actuary[5] is available for perusal on the MAGNA website of the Israeli Securities Authority and on the MAYA website of the Tel Aviv Stock Exchange Ltd. together with the 2022 Second Quarter Report (this Report).
The actuarial estimate as of June 30, 2022, as compared with the estimate of December 31, 2021, has been mostly affected by the increase in the discounting rate. The principal change stemmed from an increase in the international margin and from an increase in the rates of yields to redemption of CPI-linked governments bonds.

Controls and Procedures

Disclosure controls and procedures

The Bank's President & CEO and its Chief Accounting Officer have evaluated in conjunction with the Bank's Management, the efficiency of the controls and procedures relating to disclosure at the Bank as of the end of the reporting period. Based on this evaluation, the President & CEO and Chief Accounting Officer have reached the conclusion that as of the end this period, the controls and procedures relating to disclosure at the Bank operate efficiently in order to record, process, summarize and report the information that the Bank is required to disclose in its quarterly report, in accordance with the directives of the Supervisor of Banks in the matter of reporting to the public and at such date indicated therein.

Changes in Internal Control

During the reporting period, no change has occurred in the Bank's internal control over financial reporting, which materially affected, or is reasonably expected to materially affect, the Bank's internal control over financial reporting, except for the change as detailed below.
Changes in internal control. Starting with January 1, 2022, the Bank applies the directives of the Supervisor of Banks requiring adoption in full of the accounting principles accepted by US banks with respect to allowances for expected credit losses (CECL) (see also Note 1 E to the condensed financial statements). Application of the new directives involved prolonged and complex preparations, which inter alia included development and integration of new methodology, improvement of models and definition of new models, the structure of data bases and interfaces, integration of the selected technological application, and more. Following the initial application of the directives of the Supervisor of Banks, a significant change had taken place during the reporting period, in the process of computing the allowance for credit losses. For the purpose of preparing the data for the allowance for credit losses in the financial statements in its new format, and in order to assess the effectiveness of the controls and procedures regarding their disclosure, the Bank had made timely preparations for the mapping of the control environment related to the work procedures regarding the computation of the credit loss allowance. Within the framework of these preparations, examination had been made of the work processes related to the measurement of the credit loss allowances, and the control and risk maps had been updated. Most of the new and updated controls, especially those related to the completeness of the data and to the analysis and reasonableness of the results, had been integrated already within the framework of the preparation of the financial statements for December 31, 2021. Additional controls, including such that relate to the new disclosure required in financial reporting, had been integrated as part of the preparation of the financial statements as of March 31, 2022. Furthermore, during the preparations for the

5 The English translation of the Opinion is available for perusal at the Bank's website.

application of the new instructions, the Bank adopted means of control designed to ensure the proper integration of the new rules. Included in that stated above, parallel runs were made in the third and fourth quarters of 2021, of the designated module developed in the production environment, which included the data bases and interfaces required in the Bank's systems, as well as the computation of the allowance according to defined segments. The Bank has analyzed the parallel runs, has drawn conclusions and has made corrections where required. The Bank continues in the development of the reporting and the required reports, and continues improving and developing the process of measuring the allowances for credit losses, which includes the mapping of controls and risks.

Internal Control over Financial Reporting

Certification

I, Uri Levin, certify that:

1. I have reviewed the quarterly report of Israel Discount Bank Ltd. (hereinafter: "the Bank") as of June 30, 2022 (hereinafter: "the Report").
2. Based on my knowledge, the Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the Report.
3. Based on my knowledge, the interim financial statements, and other financial information included in the Report, fairly present in all material respects the financial condition, results of operations (including the comprehensive income), changes in equity and cash flows of the Bank as of, and for, the periods presented in this report.
4. Other officers of the Bank providing this certification and I are responsible for establishing and maintaining disclosure controls and procedures and to the internal control of the Bank over financial reporting (as defined in the public reporting instructions regarding "Directors' Report"), and have:
   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Bank, including its consolidated subsidiaries, is made known to us by others within the Bank and those entities, particularly during the period of preparing this report;
   b) We established such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accepted accounting principles and directives and guidelines of the Supervisor of Banks;
   c) Evaluated the effectiveness of the Bank's disclosure controls and procedures and presented in the Report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by the Report based on such evaluation;
   d) Disclosed in the Report any change in the Bank's internal control over financial reporting that occurred during this quarter that has materially affected, or is reasonably likely to materially affect, the Bank's internal control over financial reporting; and
5. The other officers of the Bank providing this certification and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Bank's Auditors, to the Board of Directors and to the Audit Committee of the Board of Directors:
   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Bank's ability to record, process, summarize and report financial information; and
   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Bank's internal control over financial reporting.

Nothing in that stated above derogates my responsibility or the responsibility of any other person under any law.

Uri Levin
President & Chief Executive Officer

Condensed Financial Statements

Review Report of the independent auditors to the shareholders of Israel Discount Bank Ltd.

Introduction

We have reviewed the accompanying financial information of Israel Discount Bank Ltd. and its subsidiaries (hereinafter: "the Bank") comprising of the condensed consolidated interim balance sheet as at June 30, 2022 and the related condensed consolidated interim statements of income, comprehensive income, changes in equity and cash flows for the three and six months periods then ended. The Board of Directors and management are responsible for the preparation and presentation of the financial data for these interim periods in accordance with Israeli GAAP regarding financial reporting for this interim period and in accordance with the guidelines and directives of the Supervisor of Banks. Our responsibility is to express a conclusion on the financial information for these interim periods based on our review.

Scope of Review

We have conducted our review in accordance with Standard on Review Engagements (Israel) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" of the Institute of Certified Public Accountants in Israel, and a review standard applied in the review of banking institutions according to the guidelines and directives of the Supervisor of Banks. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards in Israel and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying financial information was not prepared, in all material respects, in accordance with Israeli GAAP regarding financial reporting for interim periods and in accordance with the instructions and directives of the Supervisor of Banks.

Emphasis of a matter

Without qualifying our above conclusion, we call attention to the Note 10 section 4 regarding class actions and other legal actions that cannot be estimated.

Notes to the Condensed Financial Statements

1. Accounting Policies

A. **General.** Israel Discount Bank Ltd. (hereinafter: "the Bank") is a banking corporation incorporated in Israel. The Bank's condensed consolidated interim financial statements (hereinafter: "the interim financial statements") as of June 30, 2022, include the financial statements of the Bank and of its subsidiaries (hereinafter: "the Group") as well as the rights of the Group in associates. The interim financial statements do not include all the information required to be presented in full annual financial statements. These financial statements should be read in conjunction with the annual financial statements as of December 31, 2021 and the accompanying notes. The interim financial statements have been prepared on the basis of the same accounting principles used for the preparation of the audited financial statements as of December 31, 2021 except as detailed in section E hereunder.

B. The interim financial statements were approved for publication by the Bank's Board of Directors on August 11, 2022.

C. **Principles of financial reporting.** The interim financial statements are prepared in accordance with accounting principles determined in directives of the Supervisor of Banks applying to the preparation of an annual financial report of a banking corporation, with required changes in the circumstances of the matter, and in accordance with U.S. GAAP applying to financial reporting for interim periods, and the reporting principles determined in directives and guidelines of the Supervisor of Banks. In most of the subjects, the Supervisor's instructions are based on accounting principles accepted by U.S. banks.

D. **Use of assessments and discretion.** In preparing the interim financial statements in accordance with the rules, instructions and guidelines, as stated, the Management of the Bank and of the investee companies are required to use discretion and apply assessments, evaluations and assumptions that affect the implementation of the accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from such assessments. Discretion of Management in applying the accounting policy and the principal assumptions used in assessments involving uncertainty, are consistent with those applied in the preparation of the annual financial statements.

E. **Initial implementation of accounting standards, updates of accounting standards and Directives of the Supervisor of Banks**

Starting with the period beginning January 1, 2022, the Bank implements accounting standards and instructions as detailed hereunder:

- Allowances for current expected credit losses (CECL) (see section 1 below).

  Following is a description of the nature of changes made to the accounting policy applied in these condensed interim financial statements, as well as a description of the manner and effect of the initial implementation, if at all:

(1) **Adoption of updates to accounting principles accepted by US banks – allowances for credit loss and additional instructions**

On March 28, 2018, the Supervisor of Banks issued a letter in the matter of "adoption of updates to accounting principles accepted by US banks – allowances for credit loss and additional instructions", in which, inter alia, it is required to implement the accounting principles accepted by US banks with respect to allowances for credit losses. The initial implementation is to be made in accordance with transitional instructions stated in the US rules.

The aim of the new rules is to improve the quality of reporting the financial condition of a banking corporation, by means of the early recognition of allowances for credit losses, in a manner that strengthens the anti-cyclicality in the conduct of the allowances for credit losses, which supports a more rapid response by banks to a deterioration in borrowers' credit quality, , and strengthens the connection between the manner in which credit risks are managed and the manner in which these risks are reflected in the financial statements , while basing it on existing methods and processes.

The principal changes in the accounting treatment in the financial statements of banking corporations, following the implementation of these principles, are, inter alia:

- The credit loss allowance is computed based on the loss expected over the life of the credit, instead of estimating the loss incurred but not yet identified;
- In assessing the credit loss allowance significant use is made of forward looking information, which reflects reasonable and supportable forecasts regarding future economic events;
- disclosure was expanded regarding the effect of the date of granting the credit over the credit quality of the credit portfolio;
- The manner of recording the decline in value of bonds in the available-for-sale portfolio was changed;
- The new rules for the computation of the credit loss allowance shall apply to credit (including housing loans), bonds held for redemption, and certain off-balance sheet credit exposure.

A Q&A file was published in the matter on January 31, 2021, which contained, inter alia, clarifications regarding the manner of classification and reverting restructured debts to the accruing track.

1. Accounting Policies (continued)

On December 1, 2020, a circular was published in the matter of "regulatory capital – effect of implementation of accounting principles regarding current expected credit losses". The circular states transitional instructions that would apply to the effect of the initial implementation of the new rules, this in order to reduces unexpected effects of the implementation of the rules on the regulatory capital, in accordance with guidelines of the Basel Committee for Supervision of Banks and of the bank supervisory authorities in the US and in other countries.

On February 2, 2021, a circular was published in the matter of " current expected credit losses on financial instruments", within the framework of which, inter alia, requirements were abolished for recognition of a group allowance, at a minimum rate of 0.35%, in respect of housing loans, and for the recognition of a minimum allowance based on the extent of arrears method. In addition, an update was made to Proper Conduct of Banking Business Directive No. 202 regarding "regulatory capital", according to which, banking corporations are required to deduct from the Common Equity Tier 1 amounts in respect of housing loans classified over a time as non-accruing loans, in accordance with the manner of computation determined in Appendix "H" to Proper Conduct of Banking Business Directive No. 202.

The Bank and its banking subsidiaries are implementing the new rules as from January 1, 2022. ICC will implement the new rules as from January 1, 2023.

Following the implementation of the Standard, certain processes have been changed that relate to the classification and examination of problematic credit, the definition of credit as not accruing interest income, write-off rules and methods for the measurement of the allowance. Furthermore, the disclosure requirements have been modified to the requirements of the US accounting standards, as adopted by the Supervisor of Banks within the framework of the public reporting instructions, all as detailed below.

The initial implementation of the new rules as from January 1, 2022, was made with the recognition of the cumulative effect of the change in the balance of retained earnings at date of initial implementation. Furthermore, certain mitigations were adopted at date of initial implementation, as provided in the transitional instructions, including distribution of the effect of initial implementation in everything related to its effect on the Common Equity Tier 1 ratio, over a period of three years: 75% in the first year of implementation, 50% in the second, and 25% in the third year.

The major part of the effect, as presented below, stemmed from the updating of the measurement methods of the credit loss allowance, from the treatment of housing loans in a non-accruing status, and from accounting write-offs of interest or principal, updating the related deferred tax balances as well as from the effect on the regulatory capital resulting from deduction from capital of housing loans in the status of non-accruing for a prolonged period, and the recognition of the increase in the credit loss allowance over a period of time in accordance with the transitional instructions, determined as described above.

The cumulative effect recognized in the balance of retained earnings at date of initial implementation on January 1, 2022, amounts to NIS 139 million (a total of NIS 179 million, before tax), net of the related tax effect, stemming from the increase in the balance of the allowance for credit losses, in the amount of NIS 160 million, as detailed below, as well as from the increase of NIS 19 million in the balance of accounting write-offs in respect of debts, which until the implementation of the new Standard had been treated by the specific examination method, and following the implementation of the new Standard were moved to the group examination method.

It is noted that application of the new rules requires the formation of a methodology and complex models as well as a new technological application. Naturally, also after the beginning of initial application, improvement and development of the process for the measurement of the credit loss allowances would be continued, and respectively, such activity may require certain changes in the measurement procedure.

1. Accounting Policies (continued)

(2) **Updating of the accounting policy implemented following the initial implementation of the new accounting principles in the matter of current expected credit losses**

Identification and classification of non-accruing debts (replacing impaired debt). The Bank has introduced procedures for the identification of problematic credit and for the classification of debts distinguishing between debts classified as problematic, including non-accruing debts and performing debts. In accordance with such procedures, the Bank classifies all of its problematic debts and off-balance sheet items under the following classifications: special mention, substandard or non-accruing. A debt is classified as non-accruing when, based upon information and up to date events it is expected that the Bank would not be able to collect all amounts due in accordance with the contractual terms of the debt.

For the purpose and classification and treatment of problematic credit, the Bank distinguishes between:

A. **Commercial credit in respect of a debt the contractual balance of which amounts to NIS 1 million or over** – the decision regarding classification of the debt and the required allowance is based, inter alia, on the arrears situation of the debt, evaluation of the debtor's financial condition and repayment ability, evaluation of the primary source for the repayment of the debt, existence and condition of the collateral, financial condition of the guarantors, if at all, and their commitment to support the debt, and the ability of the borrower to obtain third party finance. In any event, a commercial debt as above, is classified as non-accruing when repayment of principal or interest is in arrears for 90 days or more, except where the debt is well secured and is in the process of collection, or if the debt has undergone troubled debt restructurings but does not comply with the terms for accrual of interest income.

Starting with the date of classification as a non-accruing debt, the debt is treated as a debt not accruing interest income (such debt designated as "non-accruing debt"), unless the debt had undergone troubled debt restructurings and complies with the terms for accrual of interest income.

For details regarding the accounting write-off rules with respect to such debts, see "Accounting write-offs" below.

1. Accounting Policies (continued)

B. **Credit to private individuals, housing loans and commercial credit in respect of a debt the contractual balance of which is lower than NIS 1 million** – the decision regarding the classification of the debt is based upon the arrears situation of the debt. For this purpose, the Bank monitors the number of days in arrears determined in relation to the contractual repayment terms of the debt. Such debts, which are in arrears for 90 days or over, are classified as substandard, though accrual of interest income is not interrupted. This, with the exception of housing loans, which are classified as debts not accruing interest income when the repayment of principal or interest is in arrears of 90 days or over.

Debts included in the group track, which had undergone restructure of a troubled debt restructurings and do not accrue interest income, are classified as non-accruing substandard debts.

As part of the implementation of the new rules, all debts included in the private individuals segment had been transferred to the group examination and allowance track.

For details regarding the accounting write-off rules with respect to such debts, see "Accounting write-offs" below.

Debt arrangement policy and treatment of restructured troubled debts. With a view of improving the management of credit and the collection thereof, and with the aim of avoiding failure situations or seizure of pledges assets, the Bank had determined and is applying a policy for arrangement of problematic debts and for a change in terms of debts not identified as problematic. Methods for changes in terms of debts may include, inter alia, deferment of repayment dates, reduction in the rate of interest or in the amounts of periodic repayments, changing the terms of the debt in order to modify them to the financing structure of the borrower, consolidation of the borrower's debts, transfer of the debt to other borrowers in case of a group of borrowers under joint control, reexamination of the financial yardsticks applying to the borrower, and more.

The Bank's policy is based upon criteria, which allows Management of the Bank to apply judgment as to whether repayment of the debt is expected, and the policy is applied only if the borrower proves his ability and wish to repay the debt and if he is expected to abide by the terms of the new arrangement.

In order to determine whether a debt arrangement made by the Bank constitutes troubled debt restructurings, the Bank performs a qualitative test of all terms and conditions of the arrangement and of the circumstances under which it had been made, with a view of determining as to whether:

(1) The borrower is under financial difficulties; and

(2) Has the Bank granted a waiver to the borrower as part of the debt arrangement.

In order to determine as to whether the borrower is under financial difficulties, the Bank examines whether there are signs indicating financial difficulties of the borrower at date of the arrangement, or existence of a reasonable possibility of the borrower experiencing financial difficulties were it not for the arrangement.

In addition, the Bank considers that a waiver is being granted to the borrower, as part of the arrangement, even if the contractual interest is raised under the arrangement, if one or more of the following conditions exists:

- As a result of the restructure, the Bank is not expected to collect the full amount of the debt (including the interest accrued under the contractual terms);
- The present fair value of the collateral, in case of debts that are collateral-dependent, does not cover the contractual balance of the debt, indicating inability to collect the full amount of the debt;
- The borrower has no possibility of obtaining finance at accepted market rates, in respect of a debt having characteristics similar to the debt being the subject matter of the arrangement;
- Where the banking corporation does not conduct an additional underwriting process upon renewal of a substandard debt, or where there is no change in the pricing of the debt, or if the pricing had not been adjusted so as to match the risk prior to renewal, or where the borrower does not provide additional means compensating the growth in risk stemming from his financial difficulties, then the renewal is strongly considered to be troubled debt restructuring.

The Bank does not classify a debt as a restructured troubled debt, where the restructure leads to an insignificant delay in repayment, taking into consideration the frequency of repayments during the contractual repayment period and during the expected original lifespan of the debt. In this respect, where several arrangements had been made involving changes in the loan terms, the Bank takes into account the cumulative effect of prior arrangements, when determining whether the delay in repayment, stemming from the restructure of the debt, is insignificant.

As a general rule, restructure leading to a delay in repayment of 90 days or more, as compared with the contractual terms, would be considered restructure leading to a delay in repayment that is not insignificant.

1. Accounting Policies (continued)

Treatment of restructured debts and consecutive restructure. Debts, the terms of which had been changed under the restructure of a troubled debt, are classified as non-accruing debts. Under special circumstances, when a debt had been restructured as a troubled debt, and at a later date, the banking corporation and the debtor enter into an additional restructure agreement, the banking corporation is no longer required to treat the debt as one that had undergone restructure of a troubled debt if the following two conditions exist: (1) the debtor is no longer under financial difficulties at date of the consecutive restructure; and (2) in accordance with the terms of the consecutive restructure, no waiver had been granted to the borrower by the banking corporation (including no waiver of principal on a cumulative basis since date of extending the original loan).

Reversal of a non-accruing debt to the status of an accruing debt. As a general rule, a non-accruing debt reverts to be classified as an accruing debt if one of the two following conditions exists:

- There are no principal or interest components in respect of the debt that are due and had not been repaid, and the Bank expects the repayment in full of the remaining balance of principal and interest in accordance with the terms of the agreement (including amounts which had been written-off accounting wise or an allowance was made in their respect);
- Where the debt is now well secured and is in the process of collection.

Moreover, with respect to a debt which had formally been restructured as a troubled debt, and classified as non-accruing at date of change in terms, the Bank may reinstate the debt as an accruing debt, on condition that an updated and well documented credit analysis is performed supporting reversal to accruing status, based on the financial condition of the borrower and prospects of repayment according to the updated terms. The evaluation should be based upon the historical consecutive repayment performance of the borrower, in cash or cash equivalents, over a reasonable period of at least six months, where the Bank may take into account repayments made during a reasonable period prior to the restructure, if the payments comply with the updated terms. Otherwise, a debt that had undergone restructure of a troubled debt must continue to be classified as non-accruing debt.

Furthermore, with respect to a debt that had formally undergone restructure of a troubled debt, and which had been classified as accruing debt prior to the restructure, the Bank may continue to accrue interest on condition that following the restructure, collection of principal and interest in accordance with the updated terms is reasonably secured, based on an updated and well documented credit analysis, on condition that the borrower has a history of continuous repayment performance over a reasonable period prior to the changes, and that the restructure has improved the prospects of collection of the loan in accordance with a reasonable repayment schedule.

Starting with January 1, 2022, the above instructions pertaining to the treatment of a restructured troubled debt, apply also to housing loans, and they are being applied to housing loans as from January 1, 2022, onwards.

Allowance for credit loss – measurement. The Bank has determined procedures for the classification of credit and for measurement of the allowance for credit losses in order to maintain an appropriate level of allowance to cover current expected credit losses in relation to its credit portfolio. In addition, the Bank has determined procedures required to maintain an allowance at an appropriate level in order to cover current expected credit losses related to bonds held-to-maturity, bonds held in the available-for-sale portfolio as well as certain off-balance sheet exposure (see below).

Assessment of the allowance for current expected credit losses is computed over the contractual period of the financial asset. The contractual period is not adjusted in respect of extensions, renewals and expected changes, unless one or more of the following applies: (a) at date of reporting, the Bank has reasonable expectations for an agreement with the borrower for a restructure of a troubled debt; or (b) the original loan agreement or the updated agreement at date of reporting include the option for extension or renewal of the loan, which may not be unconditionally revoked by the Bank.

In general, computation of the allowance for current expected credit losses is assessed on a group basis (by means of statistical models) where the assets have similar risk characteristics. Such characteristics comprise, inter alia: (1) the business activity of the borrower; (2) the borrower's conduct of his banking operations; (3) classification of the borrower; (4) type of the financial asset; (5) type of collateral; (6) size; (7) age of the loan.

The Bank has divided the credit portfolio into segments in accordance with its business viewpoint, while distinguishing between commercial credit, SME, housing loans, private individuals - other, and credit not to the public. The Bank has determined models and methodologies to be used in measuring the required allowance in each segment. The determined models are risk rated based (PD and LGD) that assess the amount of the expected loss in case of materialization of failure.

1. Accounting Policies (continued)

Where the reasonable and supportable period as determined by the Bank, is shorter than the lifespan of the financial asset, the Bank reverts to the use of historical information that is not modified to the risk of the specific borrower and is not modified in respect of existing economic conditions or in respect of anticipated future economic conditions, such as: changes in rate of unemployment, GDP, interest, etc.

Credit loss allowance – SME credit. In respect of the SME credit portfolio, the Bank measures the expected credit loss allowance on the basis of the PD LGD method while dividing the credit portfolio into segments having similar risk characteristics, such as the rating models, type of financial asset and type of collateral.

For the purpose of modifying the historical data to present economic conditions and to expectations regarding future economic conditions, the Bank determined that the reasonable and supportable period is one year. In case of assets having a contractual lifespan exceeding this period, the Bank reverts to the use of historical information that is not modified, by means of a method divided into two layers. The first layer refers to a macro-economic modification; the reversal in respect thereof is immediate at the end of the first year. The second layer refers to reversal to historical data regarding losses and/or defaults. This reversal is performed during a period of two additional years by means of half-yearly modification formulas for the PD data, which in fact would reflect, on the basis of historical data, a modification of the PD rate for one year for the two coming years also.

Credit loss allowance – credit to private individuals (excluding housing loans). In respect of the private individuals credit portfolio, excluding housing loans, the Bank measures the allowance for current expected credit losses using the PD LGD method, while dividing the credit portfolio into segments having similar risk characteristics, such as the rating models, type of financial asset and type of collateral.

For the purpose of modifying the historical data to present economic conditions and to expectations regarding future economic conditions, the Bank decided that the reasonable and supportable period is one year. In case of assets having a contractual lifespan exceeding this period, the Bank reverts to the use of historical information that is not modified, by means of a method divided into two layers. The first layer refers to a macro-economic modification; the reversal in respect thereof is immediate at the end of the first year. The second layer refers to reversal to historical data regarding losses and/or defaults. This reversal is performed during a period of two additional years by means of half-yearly modification formulas for the PD data, which in fact would reflect, on the basis of historical data, a modification of the PD rate for one year for the two coming years also.

Credit loss allowance – housing loans. In respect of the housing loan portfolio, the Bank measures the allowance for current expected credit losses using the PD LGD method, while dividing the credit portfolio into segments having similar risk characteristics, such as the rating group and the age of the loan.

For the purpose of modifying the historical data to present economic conditions and to expectations regarding future economic conditions, the Bank decided that the reasonable and supportable period is one year. As distinguished from other credit portfolios of the Bank (consumer and commercial), the defaults curve is based entirely on historical data, while the rating models are used solely for segmentation purposes. In view of this, where assets having a contractual lifespan longer than the reasonable and supportable period are involved, then reversal is made only in respect of the macro-economic adjustment component. This reversal is made immediately at the end of the first year.

Credit loss allowance – commercial credit. In respect of the commercial credit portfolio, the Bank measures the allowance for current expected credit losses using the PD LGD method, while dividing the credit portfolio into segments having similar risk characteristics, such as the rating models, type of financial asset and type of collateral.

For the purpose of modifying the historical data to present economic conditions and to expectations regarding future economic conditions, the Bank decided that the reasonable and supportable period is one year. In case of assets having a contractual lifespan exceeding this period, the Bank reverts to the use of historical information that is not modified, by means of a method divided into two layers. The first layer refers to a macro-economic modification; the reversal in respect thereof is immediate at the end of the first year. The second layer refers to reversal to historical data regarding losses and/or defaults. This reversal is performed during a period of four additional years by means of transfers matrix.

In addition to that, the Bank has determined criteria and factors that are taken into account in determining that in respect of certain exposure to governments, the current expected credit losses reflect a zero loss.

1. Accounting Policies (continued)

Credit loss allowance – off-balance sheet credit exposure. Off-balance sheet credit exposure includes credit exposure in respect of commitments to extend credit, documentary credit, financial guarantee not treated as insurance, and other similar instruments. The credit loss allowance for off-balance sheet exposure is assessed in the same way that the allowance for balance sheet credit is assessed, while taking into account the expected materialization of the credit. For the purpose of assessing the expected rate of materialization, a methodology has been determined, assessing the conversion coefficients of off-balance sheet credit into balance sheet credit, which are based on the rate of utilization respecting each type of off-balance sheet exposure, based on past experience.

The Bank does not assess an expected credit loss allowance in respect of off-balance sheet commitments to extend credit, which may be unconditionally revoked by the Bank.

Credit loss allowance – bonds in the held-to-maturity portfolio. The Bank does not measure current expected credit losses in respect of government bonds of the Government of Israel or the US Government, because the information regarding historical credit losses, following modification to existing conditions and to reasonable and supportable forecasts, leads to expectations that the non-payment of the basic amortized cost equals zero.

The remaining balance of the bonds, non-government as stated, is of a negligible amount.

Credit loss allowance – Available-for-sale bonds. The Bank assesses current expected credit losses in respect of available-for-sale bonds at each reporting date, where the fair value of the bonds is lower than the amortized cost. The Bank tests whether the decline in fair value stems from credit losses or from other factors. Impairment related to credit loss is recognized by means of an allowance for credit losses, while impairment not recognized by means of a credit loss allowance, is taken to other comprehensive income, net of tax.

In accordance with guidelines stated in Topic 326 of the Codification, the Bank computes on a specific basis, the allowance for current expected credit losses regarding available-for-sale securities, using the discounted cash flow method, through which the Bank compares the present value of expected future cash flows, determined on basis of past events, present conditions and reasonable and supportable forecasts (such as: sectorial, geographic, economic and political factors, relevant to the collection ability respecting the bond), to the basic amortized cost of the security and to its fair value. The allowance, as stated, is recognized against a credit loss expense, in order to reflect the credit loss component of the decline in fair value to below the amortized cost. The allowance for credit loss in respect of an available-for-sale bond is limited so as not to exceed the amount of the difference between the amortized cost and the lower fair value (the fair value floor).

If over a period of time, the fair value of the security rises, then all the allowance for credit losses that had not been written-off accounting wise, is reversed by credit loss expenses release.

Credit loss allowance – credit assessed on a specific basis. In accordance with guidelines stated in Topic 326 of the Codification, when the Bank identifies that a financial asset does not have joint risk characteristics similar to those of other financial assets, the Bank assesses the allowance for credit losses in respect of such assets on a specific basis, using the discounted cash flow method and/or on the basis of the value of the collateral, for loans that are collateral dependent.

In addition, with respect to commercial credit, the contractual balance of which amounts to NIS 1 million or over, and which is classified as non-accruing, the Bank applies the discounted cash flow method or on the basis of the value of the collateral.

Qualitative modifications. The Bank performs qualitative modifications intended to reflect, in computing the allowance for credit losses, assessments regarding characteristics that are not adequately reflected in the models used.

Expected collections. The allowance for credit losses includes also an assessment of expected collections in respect of accounting write-offs.

Testing the overall adequacy of the allowance. In addition to the above stated, the Bank tests the overall adequacy of the allowance for credit loss. The adequacy test, as stated, is based on Management's judgment, which takes into account the risks inherent in the credit portfolio and the deficiencies and limitations of the assessment methods applied by the Bank in determining the allowance.

Accounting write-offs. The Bank writes-off accounting wise, any debt or a part thereof considered as uncollectible and having a low value, the stating of which as an asset is not justified, or a debt regarding which the Bank conducts collection efforts over a long period (defined generally as a period exceeding two years).

In respect of debts the collection of which is collateral dependent, the Bank immediately writes-off against the balance of allowance for credit losses, that part of the recorded amount of the debt exceeding the fair value of the collateral.

1. Accounting Policies (continued)

With respect to commercial credit, the contractual balance thereof is lower than NIS 1 million, and credit to private individuals that is not for housing purposes, the Bank records an accounting write-off when the arrears period of the debt reaches 150 days or more. It is noted that, where the debt is secured by collateral that is not a residential property, and seizure of the pledged asset had begun and is secured, the Bank writes-off accounting wise only that part of the recorded amount of the debt exceeding the value of the collateral (net of selling expenses).

With respect to housing loans secured by residential property, the Bank performs a up-to-date assessment of the value of the collateral, no later than the debt becoming in arrears of 180 days or over, and writes-off accounting wise that part of the recorded amount of the loan exceeding the value of the collateral (net of selling expenses).

It is clarified that accounting write-offs do not involve a legal waiver, and they reduce the reported balance of the debt for accounting purposes only, while creating a new cost basis for the debt in the books of the Bank.

Disclosure requirements. The Bank has modified disclosure to the new disclosure format and to disclosure regarding non-accruing debts instead of impaired debts. The comparative data are presented in accordance with the format that was in place until December 31, 2021.

D. The securities portfolio, as of June 30, 2022, includes investments in asset backed securities, primarily investment in mortgage-backed-securities (MBS), which are held mainly by a consolidated subsidiary abroad. Details regarding the terms "Mortgage-backed-securities - MBS", A real estate mortgage investment conduit (REMIC), a stripped MBS, "Mortgage Pass - Through" and "Collateralized Mortgage Obligation - CMO" were brought in Note 12 to the financial statements as of December 31, 2021.

E. Unrealized losses

Available-for-sale bonds. As from January 1, 2022, the Bank is applying the directives of the Supervisor of Banks requiring the adoption in full of accounting principles accepted by US banks in the matter of "financial instruments – credit losses", as discussed in Note 1(e), by which the Bank is required to recognize an allowance for credit losses in respect of impairment related to credit loss.

Whereas the Bank and the relevant subsidiaries have no intention of selling available-for-sale bonds that are in a unrealized loss position, no impairment in value has been recognized in their respect in the profit and loss statement. Furthermore, based on a performed assessment, the Bank and the relevant subsidiaries have not recognized an allowance for credit loss in respect of the said bonds.

Held-to-maturity bonds. As from January 1, 2022, the Bank is applying the directives of the Supervisor of Banks requiring the adoption in full of accounting principles accepted by US banks in the matter of allowance for current expected credit losses (CECL), as discussed in Note 1 (e). The Bank and the relevant subsidiaries have not recognized an allowance for credit loss in respect of most of the bonds held in the held-to-maturity portfolio, principally Israeli government bonds and US government bonds. As of June 30, 2022, the allowance for credit loss exists in respect of other bonds is a negligible amount.

F. **Fair value presentation.** The balances of securities as of June 30, 2022, June 30, 2021, and December 31, 2021, include securities amounting to NIS 27,605 million, NIS 36,555 million and NIS 32,342 million, respectively, that are presented at fair value.

5. Securities (continued)

J. Zim shares

The Bank and MDB had received in the past shares in ZIM Combined Shipping Services Ltd. (hereinafter: "ZIM"), as part of a debt arrangement, which were recorded at zero value. In accordance with a report by ZIM, the issue of ZIM shares on the New York Stock Exchange (NYSE) was concluded on February 1, 2021. Blocking arrangements applied to the said shares, which terminated on July 26, 2021, and the process of realization of these shares began. MDB and Discount Bank have realized their shareholdings in full. In respect of these realizations, a pre-tax gain of NIS 124 million was recorded in 2021 (in the interim financial statements as of June 30, 2021, the shares are presented at their fair value, in an amount of NIS 126 million).

K. VISA Inc. shares

Note 12 K to the financial statements as of December 31, 2021, described the holding of VISA Inc. shares by ICC and the Bank. Recently, ICC received notice of an additional release of blocked shares, second in number, during the year 2022. On August 3, 2022, ICC realized the said blocked shares of ICC and of the banks holding it, in consideration for an amount of approx. NIS 57 million. Accordingly, the Bank and ICC assess that a net gain of approx. NIS 31 million (net of the tax effect and FIBI's share) will be recorded in the third quarter of 2022. Following the aforementioned release, ICC will retain non-listed preferred shares, the total value of which (including the share of the ICC owner banks) at the reporting date is assessed at approx. NIS 65 million ("naïve value"). The equity value of these shares, which are stated at the cost method, is NIS 14 million. It is clarified that the conversion ratio of the preferred shares may decrease in the future, depending on pending claims existing against VISA, relating to the operations of VISA Europe.
The division is made and would be made in the future in accordance with an agreed division mechanism established by the parties.

L. Moving bonds to the held-to-maturity portfolio

On May 17, 2022, the Bank, IDB Bank and MDB moved bonds from the available-for-sale portfolio to the held-to-maturity portfolio, in a total amount of approx. NIS 4.5 billion. As required by the reporting instructions, the unrealized loss on adjustment to fair value of the said bonds at the transfer date, in a total amount of NIS 450 million, is continued to be presented in other comprehensive income and is amortized to profit and loss over the remaining lives of the bonds as an adjustment of yield. Until June 30, 2022, a total of NIS 9 million was amortized to profit and loss.

6. Credit risk, credit to the public and allowance for credit losses

General. As from January 1, 2022, the Bank is applying the directives of the Supervisor of Banks requiring the adoption in full of accounting principles accepted by US banks in the matter of allowance for current expected credit losses (CECL). For details regarding the updated accounting policy and regarding the identification and classification of non-accruing debts, a term that has replaced the term impaired debts, see Note 1 (e) above. The comparative figures are presented in accordance with the format that was valid until December 31, 2021.
Debts – in this Note: Credit to the public, credit to Governments, deposits with banks and other debts, excluding bonds, securities borrowed or purchased under agreements to resell and assets in respect of the " Maof" market activity.

It is noted, that Note 14 presents the details included in this Note, as well as an extended discussion thereof.

C. **The 2020 retirement plan.** Note 23 I to the financial statements as of December 31, 2020, contains a description of the 2020 retirement plan applying to the Bank, MDB and ICC.

75 retirees of the Bank completed the retirement process until the end of the first quarter of 2021, within the framework of the retirement plans. Accordingly, the amount of the settlement charged to profit and loss in the first quarter of 2021, amounted to NIS 115 million (before tax effect). The balance will be spread over the average duration of the liability, which currently stands at approx. 13 years, in accordance with the accounting principles applicable to the Bank.

9. Capital Adequacy, leverage and liquidity in accordance with Directives of the Supervisor of Banks

1. Capital adequacy according to Directives of the Supervisor of Banks

(a) **Adoption of Basel III instructions.** Details in this matter were brought in Note 25, section 1 a, in the 2021 Annual Report.

(b) **Additional capital requirements in respect of housing loans.** On September 28, 2014 the Supervisor of Banks issued an amendment to Proper Conduct of Banking Business Directive No. 329, in the framework of which, a banking corporation is required to increase their Common equity tier 1 target and the total capital target by a rate which expresses 1% of the outstanding housing loans. The said requirement increased the total minimum equity capital requirement and the total capital by approx. 0.18%. It is noted that in accordance to the Provisional Instruction from April 27, 2020, the said requirement shall not apply to housing loans approved as from March 19, 2020 and until date of expiry of the Provisional Instruction. Housing loans approved as from the effective date of the provisional instruction, and in respect of which, the additional capital requirement does not apply, as stated, amounted at June 30, 2022 to NIS 18,524 million. In reply to an approach by the Bank, the Supervisor of Banks clarified on June 2, 2021, that the said requirement relates only to the Common Equity Tier 1 goal, and that it is not required to apply it also with respect to the total capital goal.

On December 27, 2021, within the framework of updating Proper Conduct of Banking Business Directive No. 329, "Limitations on Issuing Housing Loans", it was prescribed that the aforesaid additional capital requirement would apply solely to loans for the purpose of housing and would not apply to a housing loan not for the purpose of acquiring a land right and a housing pledge ("an 'any purpose' loan").

(c) **Relief regarding the retirement plan**

(1) **Relief regarding the retirement plan 2018.** The Supervisor of Banks granted the Bank a relief regarding its 2018 efficiency plan. Costs in a total amount of approx. NIS 145 million (before taxes; an amount of NIS 95 million net of tax) have been eliminated in computing capital adequacy in the report for the second quarter of 2018, and are gradually amortized, as from the third quarter of 2018, on a quarterly straight-line basis (5% per quarter) over a period of five years. Costs in the amount of NIS 76 million have been amortized to June 30, 2022. Additional details regarding this matter are given in Note 25 section 1 c (1) to the 2021 annual report.

(2) **Relief regarding the retirement plan 2020.** The Supervisor of Banks granted the Bank a relief regarding its 2020 retirement plan. Costs in a total amount of approx. NIS 257 million (before taxes; an amount of NIS 169 million net of tax) have been eliminated in computing capital adequacy in the report for the second quarter of 2020, and are gradually amortized, as from the third quarter of 2020, on a quarterly straight-line basis (5% per quarter) over a period of five years. Costs in the amount of NIS 67 million have been amortized to June 30, 2022.

(3) **Relief regarding the expanding of the retirement plan 2020.** The Supervisor of Banks granted the Bank a relief regarding the expanding of its 2020 retirement plan. Costs in a total amount of approx. NIS 238 million (before taxes; an amount of NIS 157 million net of tax) have been eliminated in computing capital adequacy in the report for the third quarter of 2020, and are gradually amortized, as from the fourth quarter of 2020, on a quarterly straight-line basis (5% per quarter) over a period of five years. Costs in the amount of NIS 55 million have been amortized to June 30, 2022.

(4) **Relief regarding the retirement plan 2020 - MDB.** The Supervisor of Banks granted MDB a relief regarding its 2020 retirement plan. Costs in a total amount of approx. NIS 60 million (before taxes; an amount of NIS 40 million net of tax) have been eliminated in computing capital adequacy in the 2020 annual report, and are gradually amortized, as from the fourth quarter of 2020, on a quarterly straight-line basis (5% per quarter) over a period of five years. Costs in the amount of NIS 14 million have been amortized to June 30, 2022.

9. Capital Adequacy, leverage and liquidity in accordance with Directives of the Supervisor of Banks (continued)

1. Capital adequacy according to Directives of the Supervisor of Banks (continued)

(d) **Provisional Instruction mitigating the capital requirements in order to face the Corona crisis.** The Supervisor of Banks published on March 31, 2020 a Provisional Instruction, according to which, on the background of the spreading of the Corona virus and in order to secure the ability of banks to continue the granting of credit, the regulatory capital requirements applying to banks, have been reduced so that the minimum Common Equity Tier 1 ratio (excluding the additional capital buffer in respect of residential credit) would be 8% (compared to 9% prior to the change), and the minimum total capital ratio would be 11.5% (compared to 12.5% prior to the change). The Provisional Instruction has been extended from time to time, and recently until December 31, 2021. On December 27, 2021, the Banking Supervision Department published a circular, according to which, with effect from January 1, 2022, the temporary directive will cease to be valid. The mitigated capital requirements will apply for a period of twenty-four months following the end of the temporary directive period (namely, until December 31, 2023), on condition that the Bank's capital ratios shall not be lower than the capital ratios existing at the end of the temporary directive period, or the capital ratios applying to the Bank prior to the temporary directive, whichever is lower. Within the framework of the circular dated March 22, 2021, it was prescribed that a reduction in the capital ratios of up to 0.3 percentage points in the six-month period from the end of the temporary directive's validity (namely, until June 30, 2022) would not be considered a deviation from the regulatory capital requirements. As from January 1, 2022, with the expiry of the period of the Provisional Instruction, the minimum level of the Common Equity Tier 1 ratio and the minimum level of the total capital ratio reverted to the level of 9% and 12.5%, respectively, subject to that stated above.

9. Capital Adequacy, leverage and liquidity in accordance with Directives of the Supervisor of Banks (continued)

2. Leverage ratio according to Directives of the Supervisor of Banks

Computed according to Proper Conduct of Banking Business Directive No. 218 in the matter of leverage ratio.

Temporary directive for a relaxation in relation to leverage in light of the Corona crisis. On November 15, 2020, the Banking Supervision Department issued an update to Proper Conduct of Banking Business Directive No. 250. The update deals with the relaxation in the leverage ratio for a banking corporation, so that it will amount to 4.5% for a banking corporation whose market share is smaller than 24%. This was done in order to prevent a situation where the leverage ratio would constitute an obstacle to extending bank credit. The temporary directive has been extended from time to time. In a circular dated May 15, 2022, the relief stipulated in this matter was extended so that it will be valid until June 30, 2024, provided that the leverage ratio is not less than the rate on December 31, 2023 or from the minimum leverage ratio required from a banking corporation prior to the temporary directive, the lower of the two.

4. Net Stable Funding Ratio in accordance with the Supervisor of Banks's directive

General. With effect from December 31, 2021, the Bank applies Proper Conduct of Banking Business Directive No. 222, "Net Stable Funding Ratio – NSFR", which adopts the recommendations of the Basel Committee with regard to a Net Stable Funding Ratio in the Israeli banking system. In accordance with the directive, the objective of a Net Stable Funding Ratio is to improve the resilience of the liquidity risk profile of banking corporations in the long term by means of requiring from the banking corporations to maintain a stable funding profile in accordance with the composition of their balance sheet assets and their off-balance sheet activities. The Net Stable Funding Ratio consists of two components: available stable funding items (the numerator) and required stable funding items (the denominator). "Available stable funding" is defined as that part of the capital and liabilities that can be relied upon over the time horizon taken into account in the Net Stable Funding Ratio, which lasts for one year. The Required amount of stable funding of a particular corporation is a function of the liquidity characteristics and the residual maturities of the various assets held by that corporation, as well as of its off-balance sheet exposures.

In accordance with the directive, the required minimum Net Stable Funding Ratio stands at 100%.

3. Various actions against the Bank and its consolidated subsidiaries:

As detailed in Note 26 C 10 to the financial statements as at December 31, 2021, various actions are pending against the Bank and its consolidated subsidiaries, including class action suits and requests to approve actions as class action suits. In the opinion of the Bank's Management, which is based, inter alia, on legal opinions and/or on the opinion of managements of its consolidated subsidiaries, which are based upon the opinion of their legal counsels, respectively, as the - case may be, adequate provisions have been included in the financial statements, where required.

The total exposure with respect to claims filed against the Bank and its consolidated subsidiaries, whose prospects of materializing, in whole or in part, have been assessed as reasonably possible, amounted to approx. NIS 818 million as of June 30, 2022.

A description of material legal proceedings being conducted against the Bank and Group companies was brought in Note 26 C sections 10-11 to the financial statements as at December 31, 2021. The criteria under which a legal proceeding will usually be defined by the Bank as material is brought in Note 1 D 16 to the financial statements as at December 31, 2021.

Following is a summary of significant updates regarding material legal actions against the Bank and its subsidiaries:

3.1 Note 26 C 10.3 to the financial statements as of December 31, 2021, described a lawsuit filed on May 6, 2018, together with a motion for its approval as a class action suit with the Tel Aviv-Jaffa District Court against ICC and two additional Respondents. The subject of the motion is the claim that the Respondents had not provided proper disclosure regarding the charging of interest by them. The Claimants stated the amount of their claim in respect of all class members, and against all respondents, at NIS 181 million.

A pre-trial hearing was held on April 19, 2021, at the end of which, the Court advised the Appellant to withdraw the motion. A motion for withdrawal was filed by the Appellant on June 15, 2021. On January 26, 2022, the Court admitted the withdrawal motion and the proceedings came to an end.

3.2 Note 26 C 10.5 to the financial statements as of December 31, 2021, described a lawsuit filed on July 22, 2018, in the Tel Aviv District Court, together with a motion for its approval as a class action against ICC and two other credit card companies. The subject of the petition is paperless transactions (mainly telephone transactions) with companies engaged in direct marketing. It is alleged in the petition that the credit card companies have not prevented the companies engaged in direct marketing from exploiting the elderly and stealing their money in respect to illegal transactions, with this being done by charging their credit cards. It is also alleged in the petition that the credit card companies should have prevented this phenomenon at the outset and, prior to entering into an engagement with the direct marketing companies, they should have checked the nature of these companies and their activity and should have verified that they were in full compliance with the law. The petitioners have assessed the amount of their claim in the sum of NIS 900 million for all the members of the group. On June 29, 2022, ICC filed its summation arguments in the motion for the claim's recognition as a class action and, on July 14, 2022, the petitioners filed their summation arguments in response.

3.3 Note 26 C 10.6 to the financial statements as of December 31, 2021, described a lawsuit filed on August 12, 2021 together with a motion for its approval as a class action. The lawsuit refers to a failure in the installation of a server regarding the PayBox payment application, a failure, which, as argued by the plaintiffs, caused them damage. On April 3, 2022, the Bank filed its response to the motion. The case is scheduled to be heard on January 19, 2023.

3.4 Note 26 C 10.8 to the financial statements as of December 31, 2021, described a lawsuit filed on September 16, 2020, at the Jerusalem District Court together with a motion for its approval as a class action against MDB. The Claimant alleges that as a condition for the grant of a state-guaranteed loan MDB requires to open a deposit from the loan funds, with id pledged to secure the repayment of the loan, namely that the amount of the loan actually received is the amount of the loan, net of the amount of the deposit. The Claimant also alleges that the loan documents do not mention the level of the effective interest, including all fees, interest and other payments that have to be made.

10. Contingent liabilities and special commitments (continued)

The Claimant has assessed the amount of the action for the whole group in the sum of approx. NIS 817 million, but it was noted that the exact amount will be determined once the material in MDB's possession is received. At the hearing held on May 12, 2022, the parties notified the Court that they were intending to turn to mediation.

4. Class action suits and requests to approve certain actions as class action suits as well as other actions are pending against the Bank and its consolidated subsidiaries, which, in the opinion of the Bank's Management, based on legal opinions and/or on the opinion of managements of its consolidated subsidiaries, which are based on the opinions of their legal counsels, respectively, as the case may be, it is not possible at this stage to evaluate their prospects of success, and therefore no provision have been included in respect therewith.

4.1 Note 26 C 11.1 to the financial statements as of December 31, 2021, described a claim brief together with a plea for deferment of the payment of Court fees, filed on December 19, 2019, with the Tel Aviv-Yaffo District Court against the Bank and against five additional defendants.

The claim had been filed by a commercial bank in the Ukraine, the Joint Stock Company Commercial Bank, Private Bank, and the cause of action being fraud, embezzlement and deceit p14.erpetrated by former controlling stockholders of the Plaintiff who are being sued in the claim brief.

As argued in the claim brief, the controlling stockholders of the Plaintiff had acted for the granting of loans by the Plaintiff to entities under their control, such loan monies being later transferred through bank accounts in order to hide their source, and finally usurped for the personal benefit of the controlling stockholders. It is further argued that as part of the fraud and embezzlement perpetrated in accordance with the instructions of the controlling stockholders, an amount of US$1.2 billion was smuggled to Israel by way of monetary transfers from a bank account in Cyprus belonging to a company owned by the controlling stockholders to its account with the Bank. As described in the claim brief, the said monetary transfers were made in the years from 2007 to 2011. According to the arguments of the Plaintiff by allowing these monetary transfers to and from the Bank, the Bank has caused damage to the Plaintiff, and this, as argued by the Plaintiff, is in contradiction to the duties applying to him under the Prohibition of Money Laundering Act in Israel.

The amount of the claim against all defendants is stated at NIS 2.1 billion.

The Court fee was paid on January 30, 2020. On March 18, 2020, the Court accepted the plaintiff's motion and granted an order permitting the service of the statement of claim outside its jurisdiction.

On February 17, 2020, the Bank filed a motion for the dismissal in limine of the claim or, alternately, for a stay of proceedings therein due to the parallel proceedings being conducted overseas. On May 17, 2020, the Court ruled to accept the Bank's motion for an extension to the date for filing a statement of defense.

On December 7, 2020, the Court ruled for the rejection of the motion of the Bank for the in limine dismissal of the action. On December 31, 2020, the Bank applied to the Supreme Court for permission to appeal the said decision. On January 26, 2021, the Court granted the Bank an extension for the submission of a defense brief within sixty days from date of the decision of the Supreme Court in the request for permission to appeal. The Supreme Court dismissed on March 25, 2021, the motion for permission to appeal.

At the request of the Claimant, the Court permitted the delivery of the claim brief to a part of the Defendants, whose alleged place of residence is in the Ukraine; and this decision was appealed (not yet decided). Furthermore, at the request of the Bank dated May 26, 2021, the Court has extended the date for submission of the defense brief until after a decision is given in the motion for an Order under the money laundering prohibition laws, submitted by the Bank. In between, the Attorney General for the Government informed on October 28, 2021, of his intention to appear in the proceedings, and also stated his position, whereby, inter alia, he is opposed to the granting of an Order under the Prohibition of Money Laundering statutes. On October 17, 2021, the Bank filed a motion for the stay of proceedings in Israel, inter alia, on the background of the existence of parallel proceedings in the Ukraine. The Claimant filed on December 9, 2021, a response to the motion for the stay of proceedings. The Bank filed on January 9, 2022, its response to the response of the Claimant to the motion for the stay of proceedings. A hearing of the preliminary motions was held on May 18, 2022. In continuation of the hearing, a legal process arrangement had been reached, which obviates, at this stage, a decision regarding the preliminary motions. The Bank submitted a defense brief on August 3, 2022.

On January 27, 2022, two of the Respondents filed motions in which they deny the authority of the Court in Israel to try the case.

On February 3, 2022, one of the Defendants, a foreign resident, submitted a defense brief, and on February 16, 2022, the Claimant informed that he had delivered the claim brief to an additional Defendant (a foreign corporation).

4.2 Note 26 C 11.2 to the financial statements as of December 31, 2021, described a lawsuit together with a motion for its approval as a class action suit on April 12, 2021 against ICC and fifteen financial bodies, including banks, credit card companies, insurance companies and investment houses.

10. Contingent liabilities and special commitments (continued)

The subject of the action is the argument made by the Claimants that the Respondents provide to third parties, and to Google and to its advertising services in particular, private, personal and confidential data regarding their customers who are making use of the digital services of the Respondents, or who had done so during the seven years prior to the date of filing the action, without obtaining the consent of the said customers, thus damaging their rights to privacy while violating the duties imposed on the Respondents in accordance with the law.

The damage caused to the group, which the Claimants wish to represent, is estimated by the Claimants at amounts reaching millions of NIS. The Claimants state the amount of the personal damage for each Claimant at NIS 1,000 in respect of non-monetary damage, and NIS 1,000 in respect of the monetary damage.

On June 20, 2022, ICC filed its response to the motion for approval. A pretrial is scheduled for November 6, 2022.

Details regarding a motion for approval of an action as a class action in a similar matter, filed against the Bank and additional banks, were brought in Note 26, section 10.7 in the financial statements as of December 31, 2021.

5. **Discount Campus.** Details regarding the project are presented in Note 26 C 13 to the annual financial statements as of December 31, 2021. The investment in the project amounted at June 30, 2022, to NIS 957 million. The balance of the commitment in respect of this project amounted at that date to NIS 525 million. Additional liabilities in the amount of approx. NIS 42 million were added subsequent to balance sheet date in respect of engagements for performing a part of the finishing work and engagements in the technological field (all amounts do not include VAT).

6. **Directors and officers liability insurance.** On March 31, 2022, pursuant to the approval of the Remuneration Committee and the Board of Directors, the Bank took out a collective policy for the insurance of directors and officers, who are currently serving with the Bank or who will serve with it from time to time, including with respect to their service on behalf of the Bank as officers with any other company which is held by the Bank (hereinafter: "the Insurance Policy"), with this being in accordance with Regulation 1B1 of the Companies Regulations (Reliefs in Transactions with Interested Parties), 2000, and in accordance with the Israel Securities Authority's position paper 101-21, Remuneration policy (as last updated in August 2020) and with the provisions of the Bank's remuneration policy, as approved by the general meeting of the Bank's shareholders on March 18, 2020 subject to that stated below.

   The Insurance Policy will be in effect from April 1, 2022 through March 31, 2023 (hereinafter: "the Insurance Period"). The liability limit insured within the framework of the Insurance Policy is US$145 million per claim and in aggregate for the Insurance Period. In the event of a claim against any of the officers, no deductible shall be applicable to the officers themselves. The Bank bears deductibles in amounts and under terms stated in the insurance policy.

12. Regulatory Operating Segments

A. Details regarding the regulatory segments were brought in Note 29 a to the financial statements as of December 31, 2021. The principal assumptions, assessments and reporting principles used in the preparation of the data were detailed in Note 29 D in the financial statements as of December 31, 2021.

For details regarding administrative segments recognized by the Bank were brought in Note 30a to the financial statements as of December 31, 2021.

Whereas, with respect to a part of the customers, the Bank did not have the complete information required for the classification to regulatory operating segment, in accordance with the new instructions, in particular information regarding their business turnover, various actions were taken to obtain such information, and in certain cases, in the absence of information, decisions had been made on the basis of evaluations and estimates. The Bank is acting to complete the improvement of the information, and accordingly, such improvements may in future reporting periods require the reclassification of customers to the operating segments.

B. Reclassification - improvement in the allocation of customers to segments of operation – the transfer of customers from the large businesses segment, medium businesses segment and small and minute businesses segment to the institutional bodies segment.

12. Regulatory Operating Segments (continued)

14. Additional information regarding credit risk, credit to the public and allowance for credit losses

General. As from January 1, 2022, the Bank is applying the directives of the Supervisor of Banks requiring the adoption in full of accounting principles accepted by US banks in the matter of allowance for current expected credit losses (CECL). For details regarding the updated accounting policy and regarding the identification and classification of non-accruing debts, a term that has replaced the term impaired debts, see Note 1 (e) above. The comparative figures are presented in accordance with the format that was valid until December 31, 2021.

Debts – in this Note: Credit to the public, credit to Governments, deposits with banks and other debts, excluding bonds, securities borrowed or purchased under agreements to resell and assets in respect of the "Maof" market activity.

5. Additional disclosure regarding the quality of credit

(A) Risk characteristics according to credit segments

(1) Commercial credit

- Sensitivity to the domestic economic cycle in Israel. In addition, in view of material overseas investments by large Israeli corporations, the level of exposure to global crises increased;
- Sensitivity to changes in private consumption;
- The Corona pandemic, which broke out in the first quarter of 2020, significantly impacted upon the global economy in general, and upon economic activity in Israel in particular. A rapid recovery of economic activity was recorded in the Israeli economy during 2021, with a significant fading away of morbidity in the first quarter of 2022, leading to the removal of restrictions. In this context, it should be noted that the aviation and tourism sectors are suffering from labor shortages globally due to the steep rise in demand and are failing to realize their full business potential. Other sectors that depend on foreign tourism have not yet fully recovered;
- Price rises and high inflation rates, which began in 2021 and accelerated during the first half of 2022, inter alia against the background of disruptions in the global supply chain, have led to interest hikes on the part of the central banks and expectations that the rapid pace of the increases will continue. This trend has led to a raised level of economic uncertainty both in Israel and globally, and to volatility in share and bond prices. In addition, the war between Russia and the Ukraine, which broke out in the first quarter, and which led to additional impairment to the supply of commodities and to a rise in prices, has an adverse effect on the global economy.

The said macro-economic and geo-political events increase the level of risk in the short-medium term.

(2) Credit to private individuals – housing loans

- Loans involving a high finance ratio carry risk in the event of impairment in the value of collateral below the balance of the loan. The Bank's underwriting policy limits the ratio of finance when granting a loan.

(3) Credit to private individuals – other

- Exposure to retail credit is affected by macro-economic factors;
- The growth in competition in recent years, whether within the banking industry or against off-banking institutions, may lead to erosion of the spreads, to a decline in the quality of borrowers, and as a result thereof to increased credit risk. The present credit policy examines thoroughly the risk involved in the underwriting of loans to existing and new customers using models and tools developed for sales points, thus reducing such risk.

(4) Aftermath ramifications of the corona crisis on credit to private individual (mortgages and others)

- The economy recorded a rapid recovery rate in 2021. In the first quarter of 2022, negative growth in the GDP data was recorded. It is noted that the volume of borrowers requesting deferment in the repayment of loans during the Corona crisis period, and which have not yet reverted to regular repayment of their loans, is marginal.

14. Additional information regarding credit risk, credit to the public and allowance for credit losses (continued)

B. Credit to the public (continued)

5. Additional disclosure regarding the quality of credit (continued)

(B) Indication of credit quality

		Private Individuals				Private Individuals		
	Commercial	Housing Loans	Other Loans	Total	Commercial	Housing Loans	Other Loans	Total
Ratio of the balance of non-problematic credit to the public to the balance of credit to the public	96.3%	99.5%	98.6%	97.4%	95.8%	99.5%	98.3%	97.1%
Ratio of accruing credit to balance of credit to the public	2.7%	0.1%	0.9%	1.8%	-	-	-	2.1%
Ratio of non-accruing credit to balance of credit to the public	1.0%	0.4%	0.5%	0.8%	-	-	-	0.6%
Ratio of the balance of allowance to credit losses in respect of credit to the public to the balance of credit to the public	1.5%	0.4%	2.2%	1.3%	1.6%	0.5%	2.2%	1.4%
Ratio of the balance of allowance to credit losses in respect of credit to the public to the balance of problematic credit risk (excluding derivatives and bonds)	36.6%	73.3%	156.4%	46.8%	34.8%	92.1%	125.3%	44.6%

The number of days in which a debt is in arrears is a central factor in determining the classification of the Bank's debts, and accordingly affects the allowance for credit losses and the accounting write-offs. Notwithstanding the above, during the Corona crisis, in view of the outline for the deferral of loan repayments that had been granted to many borrowers, additional parameters have been taken into account for the classification of borrowers, such as: condition of the borrower, exposure to the crisis, impairment to income, and more.

A central indication regarding the quality of the credit portfolio is the ratio of performing debts to the problematic debts at the Bank.

Liabilities				
CLN Deposits	10	Discounted cash flow	Credit risk of the underlying asset	

2. Qualitative information regarding the measurement of fair value at level 3

Significant unobservable inputs, which were used to measure the fair value of derivative financial instruments, are the interest graph in the CPI linked segment, and adjustments regarding counterparty credit risk (CVA). As much as the interest graph rises (falls) and the Bank commits to pay the index-linked amount, so the fair value rises (falls). As much as the interest graph rises (falls) and the counterparty to the transaction is obligated to pay the Bank the index-linked amount, so the fair value falls (rises). The counterparty credit risk coefficient (CVA) expresses the probability of credit default of the counterparty to the transaction. A rise in the default probability reduces the fair value of the transaction, and vice versa.

17. Credit card activity

A. Existing arrangements between credit card companies and between such companies and the banks.

1. The arrangements were described in Note 36 A to the financial statements as of December 31, 2021.

Reduction of the cross-commission rate. The Governor of the Bank of Israel announced on February 25, 2018 a new outline with respect to the reduction of the cross-commission in deferred charge transactions, from the rate of 0.7% at that date to a rate of 0.5%, this in five phases.

The cross-commission level under the outline has been calculated based on the methodology that was approved in 2006 by the Competition Court, as referred to above.

The reduction in the issuer's fee to a level of 0.5% will be implemented in stages, as follows:

- from January 1, 2019, the end of the current arrangement period, through December 31, 2019, the issuer's fee stood at an average rate that did not exceed 0.6%;
- from January 1, 2020, through December 31, 2020, the issuer's fee stood at an average rate that did not exceed 0.575%;
- from January 1, 2021, through December 31, 2021, the issuer's fee stands at an average rate that shall not exceed 0.55%;
- from January 1, 2022, through December 31, 2022, the issuer's fee stands at an average rate that shall not exceed 0.525%;
- from January 1, 2023, the issuer's fee will stand at an average rate that shall not exceed 0.5%.

In addition, an outline was established with respect to the reduction of the cross-commission regarding immediate charge transactions, from the rate of 0.3% at that date, to a rate of 0.25%, in two phases. The aforementioned reduction will be carried out in stages, as follows:

- from January 1, 2021 through December 31, 2022, the commission stands at an average rate of not more than 0.275%;
- from January 1, 2023, the commission will stand at an average rate of not more than 0.25%.

On November 25, 2018, these rates were recognized in the Banking Order (Customer service) (Supervision over cross-clearing service for charge card transactions and for immediate debit transactions), 2018.

B. 1. Increase in competition and reduction in concentration Act. The Increase in Competition and Reduction in Concentration in the Banking Market in Israel (Legislation Amendments) Act, 2017, was published in the Official Gazette on January 31, 2017.

In the first stage, within the framework of implementing the Act, the credit card companies Isracard and MAX (formally: Leumi Card) were separated from Bank Hapoalim and Bank Leumi, respectively, and the separation of ownership of the credit card companies from the banks did not apply to the owners of ICC. Only in the second stage will the issue of the separation of ownership in relation to ICC be re-examined. In accordance with the law, a period of two year began on February 1, 2021, ending on February 1, 2023, during which the Minister of Finance may order ICC to be separated from Discount. To the best knowledge of the Bank, the matter is being examined by the relevant factors.

This and more, if in the past the large banks (Hapoalim, Leumi and Discount) issued to their customers credit cards of the credit card companies owned by them (Isracard, MAX and ICC), then, competition had intensified between the companies in the transitional period determined in the Act. Each bank holding control means in a debit card company, is required to divert a part of the business of issuing new cards to its customers to at least one other operating company, with which the bank had no business relations in the past. From the view point of ICC, although there is a reduction in the issue of credit cards to customers of the owner banks, ICC now has the opportunity to compete in the issue of new credit cards to customers of Hapoalim and Leumi. In this context, it should be mentioned that the transitional period ended in January, February and April 2022, with respect to Discount Bank, Bank Leumi and Bank Hapoalim, respectively. In the era following the entry into effect of the new Act, and now again, with the ending of the transitional period, the different participants in the credit card market, banks on the one part and credit card companies on the other part, find themselves in front of an array of moves and action possibilities of each of them and of each of the other participants.

The aforementioned could have a material effect on the banking system, including the Bank itself, on the credit card market and on ICC. Nevertheless, at this stage, prior to clarifying the nature, character, scope and timing of all the measures that will be taken, it is not possible to assess the aforesaid effects either in terms of materiality or in terms of quantity.

The additional tax that may apply, if doubt is raised as to the continued holding (according to this term's meaning in generally accepted accounting principles) of the Bank in ICC, computed in relation to the value of the holdings in ICC stated in the books of the Bank as of December 31, 2021, is estimated at approx. NIS 50 million.

2. **Arrangements following the Strum Act.** The arrangements were described in Note 36 B to the financial statements as of December 31, 2021.

Extension of a joint issuing agreement with Hapoalim Bank. Note 36 B 2 (b) to the financial statements as of December 31, 2021, described a joint issuing agreement and debit card issue operating agreement. On March 22, 2022, ICC and Hapoalim Bank signed an agreement for the updating of certain conditions stated in the agreement. Furthermore, the validity of the joint distribution agreement was extended for an additional period of one year, until December 31, 2025.

17. Credit Card Activity (continued)

C. **Joint distribution agreement with El-Al Company.** Note 36 C to the financial statements as of December 31, 2021 described an agreement in respect of an engagement of ICC with EL AL, regarding the issuance and operation of brand name credit cards, within the framework of which the FlyCard club is being operated.

The Corona crisis and restrictions on travelers imposed with respect thereto by governments throughout the world and in Israel have caused economic damage to numerous airline companies, including El Al. On May 18, 2022, El Al published its financial statements as of March 31, 2022, in which it reported, among other things, that – since El Al's ability to fulfill all its financial obligations is dependent on factors that are beyond the control of EL AL, at this stage, there is significant doubt regarding El Al being able to continue as a going concern.

El Al reported the transfer of activity of the Frequent Traveler Club, including the Club's assets, to a separate subsidiary company, wholly owned by El Al and regarding an agreement for obtaining finance for a transaction related to it.

ICC has studied these developments, and according to assessments made, based, inter alia, on the performance of the operation of the Club and the anticipated income there from, ICC has reached the conclusion that, at this stage, no reason exists for a provision for impairment to be recognized in respect of material amounts paid to El Al within the framework of the agreement. This conclusion is based on information existing in the hands of ICC at the reporting date, and on the estimates made by ICC, as stated. It is possible that actual developments would be different than those estimated by ICC.

D. **Extension of a joint distribution agreement with Shufersal Company.** Note 36 D to the financial statements as of December 31, 2021, described a joint credit card distribution agreement with Shufersal. On April 10, 2022, ICC and Shufersal signed an agreement for the updating of certain conditions stated in the agreement. Furthermore, the validity of the joint distribution agreement was extended for an additional period of three years, until December 31, 2030.

E. **Acquisition of the minority interest in Diners.** In December 2015 ICC acquired all the holdings of Dor-Alon and Blue Square in Diners (49%), so that upon conclusion of the transaction ICC holds all the rights (100%) in Diners. A dispute arose between the parties regarding the entitlement of the sellers to additional consideration, conditional upon fulfillment of conditions precedent. The parties referred to mediation proceeding in the matter, but the mediation proceedings were not successfully concluded.

A monetary action was filed on September 24, 2019 with the Tel Aviv District Court against ICC, in which the Court is requested to order ICC to pay to Dor-Alon and Blue Square an amount of approx. NIS 21 million. On February 9, 2020, ICC submitted a defense brief in respect of this action. Concurrently with the submission of the defense brief, ICC submitted a counterclaim, in which the Court is requested to order the opposite parties to pay ICC an amount of approx. NIS 33 million. On June 15, 2020, the Plaintiffs filed a response brief in which they reiterated their arguments, and on the same day they submitted a counter defense brief, in which the rejected the arguments of the company in the counterclaim. On September 29, 2021, the Court admitted ICC's motion for the disclosure of documents and rejected the parallel motion by the Claimants. A pretrial was conducted on October 27, 2021. On October 19, 2021, the plaintiffs filed a motion for the review of the aforementioned Court ruling from September 29, 2021. On October 27, 2021, a pre-trial meeting was held, following which the parties reached agreements regarding document discovery. The document discovery procedure has not yet been completed.

F **Extension of the clearing license of ICC and Diners.** On March 27, 2022, the provisional clearing permit of ICC and Diners was extended to March 31, 2023, or until a permanent permit is obtained, the earlier of the two.

18. Dividends

Details regarding the Bank's dividend policy are presented in Note 24 C (4) to the financial statements to December 31, 2020.

Declaration date	Payment date	Total dividend paid	Rate from the profit	Dividend per share
		In NIS million	In percentage	In agorot (100 agorot = NIS 1)
March 15, 2020	April 5, 2020	48.8	15	4.19
November 22, 2021	December 9, 2021	144.4	20	12.41
March 8, 2022	March 30, 2022	105.8	20	9.09
May 22, 2022	June 9, 2022	196.6	20	15.89

On August 11, 2022 the Bank's Board of Directors decided to make a dividend distribution at the rate of 20% of the profits of the second quarter of 2022, in an amount of approx. NIS 136 million, representing approx. 0.1099 Agorot per ordinary A share of NIS 0.1 par value.

19. Taxation

Note 8 D to the financial statements as of December 31, 2021, described appeal proceedings regarding VAT assessments, conducted at the Tel Aviv District Court in the matter of the company and additional credit card companies. Hearing of evidence was conducted during the months of June and July 2022.

ICC estimates the amount of exposure, in respect of which no provision has been recorded in its financial statements, at approx. NIS 195 million.

The parties are involved in negotiations to reach a compromise. At this stage, there is no certainty that the negotiations will yield an agreement.

20. Increase in capital

On March 30, 2022, the Bank completed a process of issuing shares to the public, comprising 72,994,300 shares of a par value of NIS 0.1 each, in total consideration for approx. NIS 1,428 million.

21. Realization of assets as part of the preparations for the relocation of the Head Offices and operation of the Bank to the Discount Campus

As part of the preparations for the relocation of the Head Offices and operation of the Bank to the Discount Campus, the following transactions were performed:

- The Bank sold on March 21, 2021, the property at 17, Yehuda Halevi Street in Tel-Aviv, which serves one of the Bank's Head Office units. Transfer of the right of possession in the property took place on December 31, 2021, and the property has been leased to the Bank until the planned relocation date to the Discount Campus, in the first half of 2023. Upon the transfer of possession of the property, the Bank recorded a profit of approx. NIS 38 million, net of the tax effect.
- On March 1, 2022, the Bank completed the sale transaction of two of its properties, located at 156 Herzl Street and 160 Herzl Street in Tel Aviv. In the first quarter of 2022 the Bank recorded a gain of approx. NIS 315 million, net of the tax effect. The property has been leased to the Bank until the planned relocation date to the Discount Campus.
- On March 23, 2022, ICC signed an agreement for the sale of the ICC Building in Givatayim, in consideration for NIS 336 million, with the addition of VAT and betterment levies. The transaction is expected to be consummated in the second quarter of 2023. ICC estimates a gain of approx. NIS 220 million, net of the tax effect, is expected to be recognized on this transaction at the date of closing the transaction (the Bank's share in this amount is approx. NIS 155 million).
- On August 8, 2022, MDB’s Board of Directors gave approval for the bank to enter into a transaction for the sale of space in The Jubilee Tower in Tel Aviv, which serves the bank’s Management and its central head office units. The closure of the transaction and transfer of possession of the property is expected by June 30, 2023. As assessed by it, MDB expects to recognize a gain of approx. NIS 80 million, net of the tax effect, in the second quarter of 2023. MDB has an option to defer the date of transferring possession by six months, until December 31, 2023, and, after that date, it also has an option to rent the property for up to two years.

22. Issue of debt instruments

On June 2, 2022, the Bank, by means of Discount Manpikim, completed the issue of bonds (expansion of Series "N") in a total amount of approx. NIS 1 billion, and commercial securities (Series 2) in a total amount of approx. NIS 700 million.

23. Equity remuneration for officers and senior employees

Outline for the allocation of share options. On June 27, 2022, the Bank's Board of Directors approved an outline for the granting of up to 10,000,000 nonmarketable share options to offerees, at no cost, each of which would be exercisable, upon fulfillment of certain terms, into one registered Ordinary A share of the Bank of a par value of NIS 0.1, subject to adjustments (hereinafter: "the outline" and "the pool", respectively), and it also approved, following approval by the Bank's Remuneration Committee regarding Officers of the Bank, the actual granting of up to 3,939,972 share options out of the pool, to 33 employees of the Bank, of which are 9 Executive Vice Presidents and 24 senior managers reporting to VP's, engaged by the Bank under personal employment agreements (hereinafter: "the present allotment"). On July 17, 2022, the Bank allotted the options to the offerees according to the present allotment (hereinafter: "date of allotment").

23. Equity remuneration for officers and to senior employees (continued)

The options under the present allotment and the options that would be allotted in the future, if at all, under the outline, are allotted in accordance with the capital remuneration plan 2022, approved by the Board of Directors and submitted to the Tax Authority on May 31, 2022 (hereinafter: "the plan") and in accordance with the provisions of Sections 102(b)(2) and 102(b)(3) of the Income Tax Ordinance (New Version), 1961, under the capital profit tax option, by means of a Trustee.

In the event that entitlement of the offeree to the option that had been granted to him expires and/or is cancelled prior to being exercised by him, the option returns to the pool being used by the Bank, and out of which, the Bank would be entitled to grant options in accordance with the provisions of the plan and the outline, at its exclusive discretion.

Vesting period. The options granted to each offeree under the present allotment, are divided into two tranches. The first tranche (one half of the options) vests at the end of two years since date of allotment, and the second tranche (one half of the options) vests at the end of three years from date of allotment (hereinafter: "the original vesting date").

Vesting performance goals. Each option tranche allotted to an offeree vests on the determined date for vesting, subject to the Bank fulfilling the cumulative conditions detailed below (hereinafter: "vesting performance goals"):

- The comprehensive capital adequacy ratio and the Common Equity Tier 1 ratio, according to the annual consolidated financial statements of the Bank for the two calendar years ended prior to the vesting date of the first trance and for the calendar year ended prior to the vesting date of the second tranche, shall not be lower that the minimal ratios determined in Directives of the Supervisor of Banks;
- The Bank's rate of return on equity according to the Bank's annual consolidated financial statements of the Bank for the two full calendar years ended prior to the vesting date of the first tranche, shall not be lower than 7% on an average, and the rate of return on equity in the calendar year ended prior to the vesting date of the second tranche shall not be lower than 7%. In the event that the Bank does not attain the performance goal of return on equity on the original vesting date of a particular tranche, the compliance test regarding this performance goal regarding that tranche would be deferred to the next year, so long as the option has not expired, with the rate of return on equity with respect to the first tranche shall be tested in relation to the three calendar years prior to the deferred vesting date, and with respect to the second tranche, shall be tested in relation to the calendar year prior to the deferred vesting date.

Exercise price. The exercise price of the options that would be allotted in accordance with the outline, shall at least equal the average of the closing quotations of the shares of the Bank on the Stock Exchange on the thirty trading days prior to the date of approval of granting by the Board of Directors (or by the manager of the plan) with the addition of a premium to be determined, if at all, when in relation to the present allotment a premium of 5% has been determined, and the exercise price of each option allotted to the offerees in the present allotment amounts to NIS 19.66 (subject to adjustments according to the outline).

Exercise period. Each tranche may be exercised as from the original date of vesting and until the end of two years from the said date, subject to adjustments in certain cases.

Manner of exercising the options. The exercise shall be made by an exercise mechanism of options into shares based on the benefit component (Net exercise).

Automatic compulsory exercise. In the event that following the vesting of any option tranche and prior to its expiry, the closing quotation for the Bank's shares on the Stock Exchange at the close of whatever trading date, would be equal to or exceed a price which is 70% higher than the closing quotation for the shares of the Bank on the trading day immediately prior to the date on which the Board of Directors approved the granting of options (with respect to the present allotment – an amount of NIS 31.65) (hereinafter: "the maximum quotation"), then all options of that tranche would be automatically exercised.

Miscellaneous instructions. The outline contains different instructions, including instructions regarding cases of termination of employment; instructions regarding adjustment of the right of the offeree to exercise the options in case of different events happening; instructions regarding the management of the plan and the authority of the manager of the plan, and more.

The economic value of the options. The fair value of the options granted under the present allotment, as of date of approval of the present allotment by the Board of Directors, amounts to approx. NIS 15,701 thousands. The fair value of the options is based upon a binomial model for the pricing of options, consistent with the Black & Scholes formula, all in accordance with the assumptions as contained in the outline.

The number of options allotted in the present allotment, in respect of each offeree being an Officer, reflects the fair value as of date of approval of the allotment by the Board of Directors, which equals the amount of three monthly salaries for each vesting year, and in respect of an offeree being another senior employee, equals two monthly salaries in respect of each vesting year.

Cost of remuneration. The cost of remuneration relating to the present allotment, computed in accordance with the fair value of the options granted under this allotment, amounts at June 30, 2022 to approximately NIS 15.7 million. Such cost would be charged as an expense over a period of three years, starting with the report for the third quarter of 2022.

23. Equity remuneration for officers and to senior employees (continued)

Additional allotment. On August 11, 2022, the Board of Directors approved an additional actual allotment of options out of the pool, to five employees of the Bank, of which, two are Executive Vice Presidents, and three are senior managers reporting to VP's, who are employed by the Bank under a personal employment agreement.

24. Pledges, Restrictive Terms and Collateral

RIPO transactions. During the second quarter of the year, the Bank started to engage in RIPO transactions for different periods, within the framework of which, the Bank had delivered bonds as security obtaining cash against it. As of date of this Report, the value of the security provided in this respect amounted to NIS 2.17 billion.

25. Holdings in Discount Capital Underwriting

a. Note 15 D to the financial statements as of December 31, 2021, include description of an agreement entered into by the shareholders of Discount Capital Underwriting. On May 25, 2022, the blockage period for the exercise of a PUT option granted to one of the minority shareholders of Discount Capital Underwriting ("the shareholder") was extended until December 31, 2023, with respect to the balance of Discount Capital Underwriting shares held by him (approx. 21%), in consideration for that determined by the parties, subject to the right of the shareholder to shorten the blockage period until December 31, 2022.

b. On August 9, 2022, the shareholders of Discount Capital Underwriting signed an agreement for the sale of approx. 21.6% of the shares of the Company pro rata ("the sold shares") to two Officers of Discount Capital Underwriting ("the purchasers"). The transaction is subject to fulfillment of conditions precedent, which, when completed, the holdings of Discount Capital would be reduced to 50.1%. The consideration for the transaction is not material. Upon consummation of the transaction, an Addendum to the company shareholders agreement will enter into effect, according to which, the purchasers would join as parties to the shareholders agreement, and that Discount Capital Ltd. would be granted a CALL option, and each of the purchasers would be granted a PUT option with respect to the sold shares.

Board of Directors and Management

Changes in the Board of Directors

Appointment of Director. The General Meeting of Shareholders held on August 2, 2022, decided to appoint Mr. Danny Yamin as a Director for a period of three years, as from February 1, 2023, subject to obtaining approval of the Supervisor of Banks or his non-objection. All as detailed in the Immediate Report dated August 2, 2022 (Ref. No. 2022-01-098110), the information contained therein regarding the above matters, is presented herein by way of reference.

Changes in Management

On February 21, 2022, Mr. Avi Levi, Senior Executive Vice President, commenced office as Head of the Banking Division, replacing Ms. Yafit Gheriani, Senior Executive Vice President, who terminated her office on this date.
Ms. Esther Deutsch, Senior Executive Vice President and Head of the Group Management and Regulation Division, terminated her office on June 15, 2022. Ms. Esther Deutsch will continue to act as Chairperson of the Board of Directors of MDB and of ICC.
On May 30, 2022, the Bank's Board of Directors approved the appointment of Ms. Hila Eran-Zik as member of Management with the title of Senior Executive Vice President, Head of the Corporate Division. She replaces Mr. Yuval Gavish, who informed on May 19, 2022, of his intention to terminate his office. The date of termination of his office has not yet been fixed.
On July 10, 2022, Ms. Orit Caspi, Executive Vice President, began her office as Chief Risk Officer and Head of the Risk Management Division, replacing Mr. Avi Levy, who terminated this office, as stated. Until the said date, acted Mr. Amir Rozin, Deputy Head of the Risk Management Division as substitute of the Head of the Risk Management Division replacing Mr. Avi Levi.
On August 11, 2022, Ms. Nitzan Sandor, Executive Vice President, began her service as Head of the Legal Counsel Division and Chief Legal Counsel in place of Ms. Hagit Meiroviz.
On August 11, 2022, Ms. Hagit Meiroviz, Executive Vice President, began her service as Head of the Human Resources Division in place of Ms. Orit Caspi.

The Chairman of the Board, the Board of Directors and the President & CEO thank Ms. Yafit Gheriani, Ms. Esther Deutsch and Mr. Yuval Gavish for their activity and contribution during their period of office at the Bank, and wish Mr. Avi Levy, Ms. Orit Caspi, Ms. Hagit Meirovitz and Ms. Nitzan Sandor success in fulfilling their offices.

Meetings of the Board of Directors and its committees

In the first half of 2022, the Board of Directors held 17 meetings. In addition, 40 meetings of committees of the Board of Directors were held.

The Internal Audit in the Group

Details regarding the internal audit in the Group, including the professional standards according to which the internal audit operates, the annual work plans and the considerations at its basis were included in the 2021 Annual Report (pp. 330-334).

Updates. During the second quarter of 2022 the following periodic reports were submitted and discussed:

- The annual report on the activities of the internal audit in 2021 was submitted on March 24, 2022, discussed by the Audit Committee on March 30, 2022 and in the Board of Directors on May 19, 2022;
- The quarterly report on the activities of the internal audit in the first quarter of 2022 was submitted on May 1, 2022, and discussed in the Audit Committee on June 22, 2022.

Transactions with Interested and Related Parties

A collective insurance policy in respect of Directors and Officers. On March 31, 2022, the Bank purchased a collective insurance policy in respect of Directors and Officers, officiating and who may officiate from time to time at the Bank, including in respect of their office on behalf of the Bank in any other company in which the Bank has an interest. For additional details, see Note 10 section 6 to the condensed financial statements.

On March 28, 2022, the Board of Directors decided to adopt yardsticks for complementing the remuneration of Directors during the Corona period, in accordance with the Remuneration Regulations (Provisional instruction), 2022.

Amendment of the Remuneration Policy of Officers at the Bank in accordance with Section 267A of the Companies Act. The General Meeting of Shareholders held on August 2, 2022, resolved to approve an amendment to the remuneration policy for Officers at the Bank, in accordance with Section 267A of the Companies Act. All as detailed in the Immediate Reports dated July 25, 2022 (Ref. No. 2022-01-094939) and August 2, 2022 (Ref. No. 2022-01-098110), the information detailed therein in this matter is presented hereby by way of reference.

Approval of the updating of the terms of office of the Chairman of the Board, and accordingly amendment of the remuneration policy for Officers. The General Meeting held on August 2, 2022, resolved to approve the updating of the terms of office of the Chairman of the Board, Mr. Shaul Kobrinsky, and, accordingly, an amendment of the remuneration policy for Officers. The said amendments are in accordance with and in the light of an amendment to Proper Conduct of Banking Business Directive No. 301A ”Remuneration policy in a banking corporation”, published by the Supervisor of Banks on April 10, 2022, which included instruction regarding everything relating to the remuneration of the Chairman of the Board of a banking corporation having no core controlling interest. All as detailed in the Immediate Reports dated July 25, 2022 (Ref. No. 2022-01-094939) and August 2, 2022 (Ref. No. 2022-01-098110), the information detailed therein in this matter is presented hereby by way of reference.

Special and independent committee – proceedings in Australia

Different legal proceedings have been conducted in Australia and in Israel against the Bank and against MDB (”the banks”), relating to accounts held with the banks by certain Australian family members and by companies related to them. The essence of the said proceedings is civil lawsuits (fiscal) filed in Australia by Liquidators of the related companies, claiming damage caused to these companies due to amended tax assessments issued by the Australian Tax Authorities. The claims were based on the argument (refuted) that the said banks had provided banking services to customers, assisting them in evading the payment of taxes in Australia.

On January 31, 2021, the banks signed compromise arrangements in relation to the aforementioned proceedings for the settlement of all claims and actions of the Plaintiffs against the Discount Group, including in relation to the proceedings, the family members and the related companies, with this being without any admission of liability. In accordance with the aforesaid arrangements, the amount of the settlement totals approx. AUD 138 million, equivalent to approx. NIS 343 million.

Concurrently, the Bank has agreed to an arrangement whereby the insurers will pay the banks an amount of approx. US$ 55 million in respect of which an amount of approx. US$ 47.5 million (approx. NIS 151 million) was recorded as income.
For further details, see Note 26 C 11.3 to the financial statements as of December 31, 2020 (pp. 230-231).
The Bank had carried out a lesson learning process in order to avoid repetition of events of that sort, and in this framework, the Bank reassessed processes and procedures.
As required by the Supervisor of Banks, the Boards of the two banks have decided to establish a joint committee of the two Boards of Directors, which will be a special, independent committee that will be headed by her honor, Retired Judge Hila Gerstel. His honor, Retired Judge Jacob Sheinman was appointed on August 15, 2021, as joint Chairperson of the Committee, acting together with her honor, Retired Judge Gerstel. The committee will examine the administrative and control processes that allowed the conduct of the Banks that led to the proceedings in respect of which the compromise arrangements were signed, while addressing, inter alia, to corporate governance aspects and the conduct of the Board of Directors and the senior Management including drawing conclusions and making general and personal recommendations with regard to officers and employees, where necessary, including in relation to remuneration awards granted to the officers during the relevant period.
The committee will present its conclusions and recommendations to the Boards of Directors of the banks.
The committee's conclusions and recommendations will be notified to the Supervisor of Banks, in response to the latter's request to the banks.

The human capital

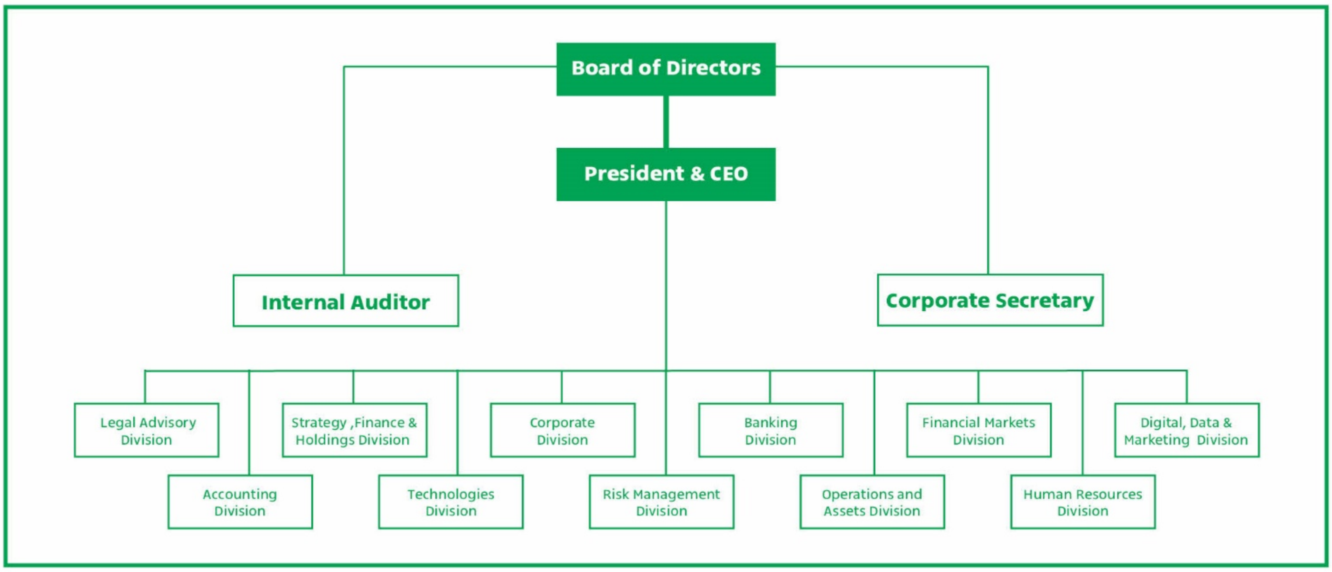
Changes in the organizational structure

The Bank's Board of Directors approved on April 26, 2022, several organizational changes, that would comprise an infrastructure for the acceleration of the implementation of the strategy in the Group:

- The Planning, Strategy and Finance Division absorbed most of the activity of the Group Management and Regulation Division, which was abolished, within the framework of a new Wing that has been established for this purpose – the Group Management Wing – which focuses on maximizing and utilizing to the utmost the business and strategic potential in all the subsidiary companies. In addition, the Division has absorbed the Fintech and Innovation Unit, transferred from the Digital, Data and Innovation Division. This Unit focuses on leading pioneering moves, supporting the strategy of the Bank and the Group. The name of the Division has been changed to the Strategy, Finance and Holdings Division.
- The Digital, Data and Innovation Division has absorbed the Marketing Wing and the Customer Experience Administration, transferred from the Strategy Division. This with the view of strengthening and leveraging the connection between the advanced capabilities existing in the fields of digital, data and marketing, in favor of continuing the advancement of the leading customer experience. The name of the Division has been changed to the Digital, Data and Marketing Division.
- A new Wing had been established within the Operations and Assets Division – the Products and Processes Wing, which leads the operational and banking excellence area across the organization. The Wing has absorbed the operations of the current account department from the Digital Division, the processes department from the Strategy Division, and the products department from the Operations Division. In addition, this Division absorbed the foreign trade department from the Corporate Division, as part of the process of concentrating the Bank's operational activity within the Operations Division.

The above changes took effect in the middle of May.

Organizational Structure Chart



Equity remuneration for officers and senior employees

On June 27, 2022, the Bank's Board of Directors approved an outline for the granting of up to 10,000,000 nonmarketable share options to offerees, at no cost, each of which would be exercisable, upon fulfillment of certain terms, into one registered Ordinary A share of the Bank of a par value of NIS 0.1, subject to adjustments (hereinafter: "the outline" and "the pool", respectively), and it also approved, following approval by the Bank's Remuneration Committee regarding Officers of the Bank, the actual granting of up to 3,939,972 share options out of the pool, to 33 employees of the Bank, of which are 9 Executive Vice Presidents and 24 senior managers reporting to VP's, engaged by the Bank under personal employment agreements (hereinafter: "the present allotment"). On July 17, 2022, the Bank allotted the options to the offerees according to the present allotment (hereinafter: "date of allotment").

On August 11, 2022, the Board of Directors approved an additional actual allotment of options out of the pool, to five employees of the Bank, of which, two are Executive Vice Presidents, and three are senior managers reporting to VP's, who are employed by the Bank under a personal employment agreement.

The aim of granting stock options is to remunerate officers and managers for their work and contribution to the Bank, and in order to maintain them for a long period of time, while creating appropriate incentives and relating them to the goals of the Bank, all this within the restrictions of the Remuneration of Officers of Financial Corporations (Special permit and the non-deductible Tax wise of exceptional remuneration) Act, 2016, and while maintaining the Bank's risk management framework.

For additional details, see Note 23 to the condensed financial statements, as well as the amended outline published by the Bank on July 13, 2022 (Ref. No. 2022-01-089110), the details contained therein in this matter are presented hereby by way of reference.

Organizational culture

Within the framework of the project regarding the organizational culture, strengthening and empowerment of senior managers with a view of improving ability for execution of decisions and projects and the optimal implementation of the strategic plan, it has been decided to establish a leading Forum. The Forum numbers some ninety managers directly subject to VP's, of the grades of wing and department managers. The forum has a work plan of five levels with the duty to advance and handle cross-organization issues, strategic projects and organizational matters. The Forum meets a number of times per year in a workshop format. In between these meetings, CEO updates are held on a monthly basis, and also enrichment and development processes as well as current updates are provided through a designated WhatsApp group. In addition, work teams have been formed for the removal of bureaucratic obstructions and improvement of processes.

Management of the human resources during the Corona crisis period

At the beginning of 2022, with the spreading of the fifth wave (the omicron variant) all the staff of the Head Office units, having the possibility of working from home, were permitted to partially work from their homes, under arrangement with their superiors. Units defined as critical to business continuity, moved to work in capsules, in a defined and managed outline. Employees who did not have a "Green pass" continued to work at the offices of the Bank on condition of presenting two negative Corona tests per week.
At the beginning of February 2022, in view of the change in guidelines by the Government regarding the use of the "Green pass" and the reduction in the scope of demand for its presentation, the Bank removed the requirement for the presentation of negative tests as condition for entry into the Bank premises. The guidelines regarding restrictions on movement and gatherings at the Bank were gradually removed until their final cancellation at the beginning of March 2022, with the decline in the morbidity data.
At the beginning of March, units of the Bank's Head Office turned to permanent work from home of up to one day per week, becoming part of the labor agreements.
The Bank continues to act in accordance with guidelines of the Ministry of Health regarding the Corona pandemic, while currently monitoring the sick and recovering status.

For details, see the 2021 Annual Report (pp. 349-359).

Environmental, Social and Governance (ESG)

Environmental, Social and Governance (ESG) Report for 2021. The Report is available for reference on the website of the Bank.
"Maala" Rating for 2022. On July 19, 2022, "Maala" published its rating for 2022. The Bank has been rated in the Platinum Plus category (distinguish companies with an absolute score of over 90). ICC has maintained its Platinum rating.

Rating of Liabilities of the Bank and some of its Subsidiaries

For details regarding the rating determined for the Bank and some of its subsidiaries by different rating agencies, see the 2021 Annual Report (pp. 361-362).

Activity of the Group according to regulatory operating segments - additional details

Household Segment (Domestic operations) - additional details

Developments in the segment

Branches. At the end of the second quarter of 2022, the Discount Group has 171 branches in operation in Israel (98 branches of the Bank and 73 branches of MDB).

For additional details, see the 2021 Annual Report (pp. 361-367).

Mortgage Activity

At the present time, the Bank operates 74 branches, countrywide, providing mortgage loan services. The Bank focuses on the granting of mortgage loans as a method for maintaining the business with existing customers and attracting new customers.

Developments in the mortgage market

	June 30,		
	2022	2021	
	in NIS millions		Change in %
Total housing loans granted by the banks, excluding internal recycling of loans	68,965	51,686	33.4
Loans from State funds	198	259	(23.6)

Legislative restrictions, regulations and special constraints applicable to the operations

Consumer Reform increasing transparency of information provided to bank customers and improving the competition environment in the mortgage market. In continuation of the announcement by the Bank of Israel dated November 14, 2021, regarding promotion of a series of consumer steps in the mortgages field, and Amendment to Proper Conduct of Banking Business Directive No. 451 was published on January 31, 2022, which would take effect on August 31, 2022. In addition, on June 13, 2022, a draft Amendment to Proper Conduct of Banking Business Directive No. 449 was published, according to which, a bank is required to present to the customer the actual cost in accordance with the computation formula recently amended as part of the Amendment to Proper Conduct of Banking Business Directive No. 451. In accordance with this Amendment, it is required to present the actual cost together for all the tracks of the loan, or with respect to the total framework offered to the customer. For additional details, see the 2021 Annual Report (pp. 364-366).

Amendment to Proper Conduct of Banking Business Directive No. 451, in the matter of housing loans. The Amendment, which was published on July 7, 2022, granted an extension in the implementation of a part of the reform of the principal approval. The beginning date for the presentation of a calculator that includes the forecasted change in interest rates is fixed for September 30, 2022. The disclosure duty regarding overall forecasted interest and interest rate for comparison purposes, upon considerations regarding advisability of premature redemption of the loan, takes effect on November 30, 2022.

Large businesses Segment (Domestic operations) - additional details

Legislative Restrictions, Regulations and Special Constraints applicable to the Segment

As of June 30, 2022, no deviations existed from the limitations as set in Proper Conduct of Banking Business Directive No 313. Furthermore, as of June 30, 2022, there were no deviations from the limitations on "related persons". In accordance with a clarification received from the Supervisor of Banks, the investment of the Group in securities of U.S. federal agencies is averaged at 50% for the purpose of computing the liability according to Directive 313.

Developments in the debt of the business sector

The debt of the business sector (excluding banks and insurance companies) amounted at the end of May 2022[6] to NIS 1,177 billion, an increase of 6.6% compared with the end of December 2021 (all the rates of change are in nominal terms and are affected by changes in exchange rates and in the CPI).

The increase in total indebtedness is due to a rise in the debt to banks (approx. 8%), to foreign residents (approx. 9%) and debt to institutional bodies (4%), in view of the growth in the balance of bonds held by institutional bodies and in loans. As a result of the aforesaid trends, the weighting of the bank in the total indebtedness of the business sector grew and stood at 52.8% at the end of May 2022 (52.2% at the end of December 2021).

During the first half the business segment, excluding banks and insurance companies, raised bonds in an amount of approx. NIS 21 billion (on the Tel-Aviv Stock Exchange and by means of non-listed bonds), compared to approx. NIS 19 billion in the corresponding period last year.

The margin between corporate bonds (included in the Tel-Bond 60 Index) and government bonds as of the end of June 2022 was 1.32%, compared with 1.11% at the end of 2021 and 1.06% at the end of June 2021.

The margin between corporate bonds (included in the shekel Tel-Bond) and government bonds as of the end of June 2022, was 1.4%, as compared to 1.34% at the end of 2021, and 1.4% at the end of the corresponding half last year.

Developments in the Segments' Markets

Following are development directions in the principal economic sectors:

- Industrial sector – The economic activity of Israeli industry has reverted to growth again in the last year in most areas and in particular in the high-tech industry, which has demonstrated impressive stability even at the height of the Corona crisis. At the same time, the effects of the Corona crisis alongside the war in Europe continue to weigh on activity and in particular supply chain disruptions that have led to a higher inflationary environment than in the past. Furthermore, the fear of a local recession, stemming from global developments, has risen considerably. On the other hand, the continued strengthening of the dollar, which supports an increase in exporters' revenues, may be a moderating factor in the face of the current macro environment;
- The hi-tech sector – this sector has enjoyed in recent years the availability of "cheap money", which supported a fast growth and the raising of capital at high volumes. The trend of rising interest rates and reduction in the supply of funds may have an adverse effect on growth in this sector;

---

6 The most updated data available at the time of submitting the report to print.

- The off-banking credit sector – the rise in the interest rates increases financing expenses of the players in the sector, alongside a growth in the level of risk of their customers;
- The tourism sector – With the removal of restrictions and the opening of hotels, there was a significant increase in occupancy rates including in urban hotels (especially those based on foreign tourism), among other things, due to the removal of restrictions around the world as well as the opening of gates in Israel for foreign tourists. However, the significant growth in outgoing tourism may create a moderating factor;
- The commercial sector - The removal of restrictions and the opening of shopping centers supported a decrease in the risk level compared to that recorded last year. The strength and duration of the recovery continues to be in line with consumer purchasing power, which is derived from, among other factors, the unemployment rate, current macro events and the inflationary environment, all of which could present a formidable challenge;
- Real estate sector – for details, see below under "Construction and real estate activity".

Anticipated Developments in the Segments' Markets

According to the updated growth forecast by the Bank of Israel from July 2022, the GDP is expected to grow by a rate of 3.5% in the years 2022 and 2023, respectively, a decrease of approx. 0.5% compared to the previous forecast in May. Moreover, the inflation is not expected to fall within the target range for price stability during the coming year.

For details regarding the "Large businesses Segment", see the 2021 Annual Report (pp. 373-380).

Construction and Real Estate Activity

Developments in markets of the activity

Residential property. The vivid activity on the housing market continues, accompanied by rising prices and being supported by the basic data in the housing market – excess demand over supply. Notwithstanding the above, the rise in interest rates and in inflation, as well as an economic slowdown, may have a moderating effect on prices of residential units and the pace at which they are sold.
Income producing office premises. Most of the demand related to large areas of quality properties in regions characterized by the presence of many hi-tech companies. Notwithstanding the above, the office premises market is sensitive to economic cycles, so that a slowdown in activity of hi-tech companies may result in erosion in rental prices applying to office buildings, particularly in areas that had experienced a very fast growth in rental prices in the past two years. Furthermore, a rising interest environment is expected to result in an increase of the discounting rates, following which, to a decline in value.
Income producing commercial real estate. The present occupancy rates are high and stable (even with relation to their level prior to the Corona crisis). Looking forward, the growth potential is coordinated with the performance of retail trading, and within the larger circle, with the buying power of the Israeli consumer. To the extent that the present macro-economic events, particularly in a high inflationary environment, would adversely affect private consumption, the challenges would intensify.
Infrastructures. The growth in volume of activity of the infrastructure sector has continued. Over and above the projects that are already in progress, expectations exist for the beginning of additional significant projects.

Legislative and regulatory limitations and special constraints applying to the activity

The limitations described above applying to the business segment also apply to construction and real-estate operations. In addition, it should be noted that as part of Proper Conduct of Banking Business Directives No. 315, a limitation applies to sectorial credit concentration, where that part of the credit being the responsibility of the banking corporation (including off-balance sheet credit) granted to a certain sector, as defined in the Directive, exceeds 20% of total credit to the public being the responsibility of the banking corporation. The Bank's sectorial credit concentration in the real estate sector was 16.65% as of June 30, 2022, compared with 17.12% at the end of 2021.

Requirement for a further allocation of capital. An Amendment to Proper Conduct of Banking Business Directive No. 203, was published on May 22, 2022, which states that to the list of debts averaged at the rate of 150% risk would be added loans intended to finance the purchase of land for development or building purposes at a rate exceeding 80% of the value of the purchased property (LTV). This, excludes loans financing the purchase of agricultural land having no planning horizon or intention to file a request for a change in zoning, and excluding loans financing the purchase of land for the personal use of a borrower who is not classified to the construction and real estate sector. The said Amendment took effect on June 30, 2022, though banking corporations may spread the effect of change in weight of the risk in respect of the existing amount of loans at fixed quarterly installments until June 30, 2023.
For additional details, see the 2021 Annual Report (pp. 377-380).

Financial Management Segment (Domestic operations) - additional details

Non-Financial Companies

Legislative restrictions, regulations and special constraints applicable to the sub-segment

As of June 30, 2022, the Bank was far from reaching the restriction on investment in non-financial corporations pursuant to Section 23 A (A) of the Banking Law (Licensing). For further details, see the 2021 Annual Report (p. 384).

Non-financial investments portfolio – principal data

Scope of the portfolio. The total value of the non-financial investments portfolio of Discount Capital amounted at June 30, 2022 to NIS 2,101 million. The outstanding investment commitments of Discount Capital amounted on June 30, 2022, to NIS 798 million (US$228 million) most of which in Funds the investment period of which has not yet expired.
Income. Discount Capital recorded in the first half of 2022 net income from non-financial investments in a total amount of approx. NIS 77.5 million. This, compared to net income in a total amount of approx. NIS 66.3 million in the first half of 2021.
New investments. In the first half of 2022 Discount Capital completed a number of investment transactions in investment Funds and in corporations in a total amount of approx. US$83 million.

For additional details, see the 2021 Annual Report (pp. 383-384).

International Operations Segment - Additional Details

Legislative Restrictions, Regulations and Special Constraints applicable to the International Operations

Exposure restriction with regard to overseas extensions. In accordance with guidelines of the Supervisor of Banks, a board of directors of a banking corporation, which operates or intends to operate by means of overseas extensions, is required to discuss and approve a comprehensive policy document with respect to the operations of overseas extensions. Within the framework of the said statement of policy, the Board of the banking corporation is required, among other things, to determine a restriction or a set of restrictions as to the exposure regarding the activities of overseas extensions, which should reflect the risk appetite applying to the operations of the overseas extensions, on condition that the principal part of the operations of the banking corporation and the banking group is located in Israel.
On June 30, 2022, the calculated rate of the Bank's exposure with respect to overseas extensions stood at 14.86% of total risk assets, as compared with 14.22% on December 31, 2021. The said exposure rate complies with the exposure limitations set by the Board of Directors, within the framework of the risk appetite declaration of the Discount Group.
The Bank monitors the development of the risks assets in respect of its operations in overseas extensions.
U.S. legislation. Following the crossing of the US$10 billion line of total assets in 2020, IDB Bank has been defined as a "Large bank" to which different regulatory requirements apply, and accordingly, these are being prepared for by

IDB Bank. Among other things, different instructions apply to it with respect to activity in derivatives and to the methodology for computing the deposit insurance. With the crossing of the line, the activity of IDB Bank is subject to supervision by the Consumer Financial Protection Bureau, the authority of which relates to compliance and to different instructions intended for the protection of customers. In addition, there is a change in the frequency and intensity of the regulatory audits of IDB Bank, performed by the FDIC and the NYDFS, making them more extensive and sequential in a way that presents a higher supervisory anticipation. Within the framework of the above stated, IDB Bank may be required to expand and intensify its internal controls, the compliance plan and the risk management. The US regulators have the authority to adopt public and non-public enforcement measures, in different circumstances, including in cases of identifying financial or operating weaknesses, deficiencies in corporate governance or other deficiencies, as well as cases of violation of Regulations. Within the framework of these enforcement measures, Regulators may order different measures, including measures to correct deficiencies or the discontinuation of certain practices, as well as increasing the capital, limiting growth, restrictions on profit distribution, termination of office of Officers, as well as the payment of penalties or civil indemnification.
As required under the USA PATRIOT Act and the Bank Secrecy Act (the "BSA"), Israel Discount Bank of New York has adopted a BSA compliance program, which includes policies, procedures and controls for the prevention of money laundering and terrorist financing. As a result of the identification of certain issues regarding IDB Bank's BSA compliance program, IDB Bank committed to applicable regulatory authorities in the US to take steps to address these issues and is working to do so, and, among other things, has approved a comprehensive remediation plan. IDB Bank is subject to oversight by these authorities on this matter, which could lead to administrative action, including a formal enforcement action such as the imposition of fines or penalties and/or restrictions on the activities of IDB Bank, as well as additional expenses and compliance costs and reputational damage.
As of this date, the Bank believes that these measures, to the extent imposed, would not have a material financial impact on the Bank's operating results.
Forward looking information. The above information forms forward looking information constituting an assessment based on existing information at the hands of the Bank at date of publication of these reports. Such information includes, inter alia, reference to future events the materialization of which is uncertain, based on assessments and data at the hands of Management of the Bank, and is conditional upon the existence of different factors, which existence is uncertain, inter alia, in relation to the regulatory measures that might be applied, as discussed above.

For additional details, see the 2021 Annual Report (pp. 385-387).

Additional Segments

For additional details regarding the Small and minute businesses segment (Domestic operations), see the 2021 Annual Report (pp. 370-371). For additional details regarding the Medium businesses segment (Domestic operations), see the 2021 Annual Report (pp. 372-373). For additional details regarding the Private Banking Segment (Domestic operations), see the 2021 Annual Report (pp. 367-369). For additional details regarding the Institutional bodies segment (Domestic operations), see the 2021 Annual Report (p. 380).

Credit Card Operations

Developments in operations

Clearing of the Diners brand. As described in the 2021 Annual Report (p.391), on December 21, 2021, the Ministry of Finance informed ICC that the examination of possibly allowing the cross-clearing of the Diners and American Express brands had begun. In continuation thereof, in a letter dated August 1, 2022, the Ministry of Finance presented to ICC an outline, by which, issuers of the closed brands ("Diners" and "American Express") shall allow each licensed clearing agent to engage in an aggregator agreement with them, and to summarize debits and credits of trading houses in respect of transactions made by way of charge cards of the closed brands. The position of the Treasury is that, to the extent that the said outline would take effect within 120 days, there will be no need to apply the authority of the Minister of Finance in accordance with the law, to determine that an issuer with Wide-Ranging Activity (which includes ICC) shall not refuse to engage with a clearing agent in order to settle cross-clearing of transactions made by use of charge cards issued by him, based on unreasonable arguments, also with respect to the closed brands. According to the letter, the Ministry of Finance intends to examine the state of affairs in the market, and the progress made by the parties in applying the said outline, and accordingly, reach conclusions with respect to the need to apply the authority of the Minister.

It is noted that at date of this Report, the subsidiary of ICC, Diners Club Israel Ltd. is engaged in agreements with several aggregators granting them the ability to offer trading houses clearing services for the "Diners" brand under terms agreed with each aggregator.

ICC is examining the outline and its possible implications upon its business.

In accordance with assessments of ICC and the Bank, implementation of the outline may on the one hand increase competition in the clearing sector in general and in the closed brands ("American Express" and "Diners") in particular, and respectively, might bring a decline in income from the clearing segment of ICC. On the other hand, the outline may widen the coverage of the closed brands in the clearing market to additional trading houses. It is noted, that in accordance with the outline, ICC might serve as an aggregator for the "American Express" brand.

An agreement for cooperation with Electra Consumer Products and Hapoalim Bank. On March 20, 2022, ICC has reached an understanding in principle with Electra Consumer Products (1970) Ltd. ("ECP"), according to which, the parties would engage in an agreement for cooperation in the establishment of an off-banking customer club based on credit cards, covering all the retail chains of the ECP Group.

On May 10, 2022, ICC, ECP and Hapoalim Bank Ltd. ("the parties") signed an updated agreement in principle ("the updated agreement in principle"), which states that the parties would engage in a tripartite cooperation agreement for the establishment of a joint customer club based on an off-banking credit card. The agreement is based upon the renewed agreement in principle of March 2022, subject to certain modifications.

On August 10, 2022, the parties signed a tripartite agreement with ACP and with Bank Hapoalim, for cooperation in connection with the activity of a customer club based on an off-banking credit card issued by ICC, intended for BIT customers and for customers of the retail stores chains of ECP, in which customers of the BIT-Card Club and customers of the Family 365 Club would be included ("the Club"), for a period of twelve years from date of fulfillment of the conditions precedent in accordance with the agreement. The agreement would be renewed automatically for three years each time, unless any of the parties informs of his wish not to renew the agreement, all in accordance with the terms and accords detailed in the agreement.

The aim of the credit-card Club is to provide value and benefits to customers of the credit-card Club, while, within the framework of this cooperation, ICC, as stated, would issue credit cards of the Club to customers of ECP and its subsidiary companies and to customers of BIT who join the Club.

The agreement states, among other things: (1) ICC shall serve as the sole and exclusive issuer of the Club's credit cards, as off-banking cards, and shall act as the entity responsible for providing all the services related to the issue and the operation of the Club's card, as well as additional services as detailed in the agreement; (2) The issuance of the club cards will be carried out in ICC's digital issuance interface, to which, among other things, customers of the BIT application will be directed. Furthermore, the BIT Application would serve for the presentation to Club customers of certain data related to the Club; (3) ECP would be responsible for the management of the Club, including connection with club customers, as well as the formation of value offers to Club customers, all as detailed in the agreement; (4) ECP and the Bank shall be entitled, each of them separately, to payments from ICC in respect of their share in the income earned on the transaction turnover made by use of the Club's credit cards, as well as additional income related to the operations of the Club (in accordance with the rates and conditions stated in the agreement). ECP would be entitled to additional payments, as detailed in the agreement, including in respect of the participation of ICC and the Bank in marketing and sales promotion expenses of the Club. Reconciliation between the parties will be made with respect to the expenses; (5) In the years 2023 and 2024, ECP will be entitled to receive, according to the agreement, safety net grants and target grants that may guarantee it receipts, net in the amount of approx. NIS 32 million in each of the years; In addition, ECP will be entitled to a bonus conditional on meeting performance goals in the amount of up to NIS 50 million, during the period of the agreement, all as detailed in the agreement.

Entry into effect of the agreement and the execution thereof are subject to fulfillment of conditions precedent, including obtaining a permit from the Commissioner of Competition (under terms detailed in the agreement). The parties are acting to complete the said conditions precedent. No certainty exists that the cooperation would be completed or that the required permit would be obtained.

ICC estimates that the introduction of the Club would take place in 2023, subject to fulfillment of the said conditions precedent.

Cooperation agreement with PAZ. On February 20, 2022, ICC signed an agreement for the cooperation with PAZ Oil Company Ltd. ("PAZ"), in the marketing of loans extended by ICC at its responsibility, through the "Yellow" Application, to members of the Yellow Customer Club. The agreement is in effect for a period of three years, and PAZ has the option of extending the agreement by two additional periods of twelve months each. It would be possible to terminate the agreement at an earlier date upon existence of certain causes of action relating to the volume of operations. The agreement regulates the consideration payable by ICC to PAZ, based upon the actual profits of ICC earned on loans extended within the framework of the operation.

Cooperation agreement with Hapoalim Bank with respect to BIT. On March 16, 2022, ICC and Hapoalim Bank signed a cooperation agreement for the extensions of credit to customers of the BIT Application, owned by Hapoalim Bank. The credit would be extended by ICC at its full responsibility. The agreement states the consideration to which Hapoalim Bank would be entitled in respect of its share in the joint venture. The agreement states conditions precedent to its taking effect, including obtaining regulatory approvals that are still pending at date of publication of this Report. The agreement shall remain in effect for a period of thirty-six months from date of fulfillment of the conditions precedent stated therein, including approval by the Competition Authority.

Extension of a joint issuing agreement with Hapoalim Bank. For details, see Note 17 B 2 to the condensed financial statements.

Extension of a joint distribution agreement with Shufersal Company. For details, see Note 17 D to the condensed financial statements.

Agreement with PayBox. On March 29, 2022, ICC and PayBox signed an agreement for the issue of designated credit cards, entitling the holders thereof to various benefits. At the first stage, cards would be issued only as virtual cards by ICC and at its responsibility. The agreement states the order for the distribution of the consideration between ICC and PayBox.

Updates and extension of operational issuance agreement with Bank Yahav. On March 31, 2022, an agreement was signed between ICC, Diners and Bank Yahav for Government Employees Ltd. to extend the validity of the previous agreements signed between the parties, while updating certain terms. The agreement will be valid through December 2026.

Agreement to operate credit cards that are charged to an employer's account. On July 21 ICC signed an agreement with a third-party for the issuance of charge cards that will serve corporations, bodies and organizations in Israel that wish to provide various budgets for the benefit of their employees and/or service providers ("the End-Users"), by means of off-banking credit cards having a user interface linked to a designated app, which will be issued to the End-Users and will allow them to make use of the employer's budget and, if so selected, to also receive an additional personal credit facility from ICC.

For additional details see the 2021 Annual Report (pp. 387-394).

Technological improvements and innovation

General. Among the goals of the Bank's strategic plan, is the goal of the implementation of technological means and increasing customer experience.

The field of open banking is one of the strategic fields defined by the Bank and, within its framework, a "backbone of partners" has been launched on the application. The Bank is working to expand the backbone of partners on the application and has recently added FamilyBiz, which offers customers a tool for summarizing financial data. This was added to the list of companies such as PayBox, RiseUp and Fibo. In addition, a "backbone of partners" has also recently been launched for business customers on the business application, where the Bank offers customers sophisticated services through ICount and Amir CashFlow Ltd., which provide a range of financial solutions for business customers.

Strategic cooperation for setting up a digital wallet. For details see "Management's handling of current material issues" above.

Direct channels

The following innovations and updates took place during the current activity in the second quarter of 2022:

Loans

Loan over digital channels – increasing the number of repayments. Previously, it was only possible to spread loan repayments over 72 installments; it is now possible to take a loan over digital channels and spread the repayments over 84 installments. The change applies to all the types of loans that can be taken over the digital channels, apart from a "bonus loan" for public sector employees and a "young person's loan", which can both be spread up to 36 installments.

Display of loan arrears alert. Should one or more of a customer's loans be in arrears, the information was previously displayed on the applications for private individuals and businesses, only upon entering the loans lobby; now, the information will be displayed on the application, as soon as the dashboard comes up, where the customer will receive a loan arrears alert and guidance on how to settle the debt with the Bank.

Deposits

Placement of funds on deposit – link to additional deposits. In light of greater customer activity in deposits on the application, against the background of interest hikes, a link to additional deposits that are available on the website has been added to the application for private individuals so as to provide an optimal choice.

Digital for business

Foreign trade also on the English website. Foreign trade information has also been added to the business website in English.

Innovations in the foreign trade world – on the business website. (1) calculating the tax-exempt balance amount – for customers performing foreign currency transfers in the course of foreign trade, the calculation of the tax-exempt balance amount will already be presented in the transaction itself. (2) attaching files in the foreign currency receipts process – an option has been added for files to be attached in the approval process and the files will be transferred directly to the banker. (3) improving the presentation of transactions awaiting signature – customers entering the application for approving transactions will receive a focused display of foreign trade transactions awaiting signature.

Customer experience

Beginning and ending on the digital. In order to facilitate customers and to allow them to receive information in one place without having to leave the application, four information queries have been added to the application menu for private individuals. The customer will select the desired topic from the menu in the application and will be transferred automatically to the appropriate website: payments made; inflows and outflows; payments forecast; or foreign currency inflows and outflows.

Continuing to divert to written correspondence – Write instead of calling. In order to strengthen the position of the written correspondence channel on the application for private individuals as the main communications channel for customers, when a customer chooses to contact a branch from the private branch page (in the "Contacting the Bank" area), a notice will come up inviting the customer to write instead of calling. This option has been added to the option that already exists – use of written correspondence instead of making calls to TeleBank.

Continuing to divert to written correspondence – writing instead of setting up a meeting. When a customer, using the application, chooses to set up a meeting on one of the following topics: deposits and savings, queries and information or depositing documents and confirmations, it is suggested to the customer that he should write to the Bank, instead of setting up a meeting. Other meeting topics are planned to be added in the future.

Meeting with a banker – choosing between a branch and an extension. Until now, when a customer wanted to set up a meeting on a particular subject, such as foreign currency transactions or for the collection of checkbooks, the system would decide for the customer whether the meeting would be held at a selected branch or at some extension. Now, the customer can choose a meeting at the desired branch or an extension.
Change in a Customer's fingerprint/facial recognition identification on a device. The customer's privacy protection has been strengthened: Should it be seen that a customer's fingerprint or facial recognition identification on a device has changed (for instance: when the ownership of the mobile device is changed), the customer entering the application for the first time with a new fingerprint/facial recognition identification will be required to identify himself for the first time with a password; from the next entry the biometric identification will already be updated on the mobile device and the customer will again be able to identify himself with his biometric identification (without having to re-register for the service – the registration is saved).
Answer from the banker – notice on entering the application. When a banker responds to correspondence on the application for private individuals, a push message is sent to the customer. Henceforth, if the customer has not yet opened the message and the application is launched, a prominent notice is displayed on entering the application that a message from the banker is awaiting the customer. The innovation is aimed at improving the service to the customer and to shorten the time for closing the circle on every query.
Identified call from the Bank. On joining the "identified call" service on the application for private individuals and then after, each time the customer receives a call from the Bank or misses a call, the screen will show that this is a call from Discount. The service is provided free of charge but is only available for customers with android devices.

Open banking

Expansion of the "backbone of partners". A new partner has been added to the application for private individuals: "FamilyBiz" – an app for financial management tool for personal and family use. Selecting this option will take the customer to the relevant page on the marketing website.

Main developments in the Israeli economy and around the world in the first half of 2022

Developments in the Global economy

General. The global economy is being affected by the war in the Ukraine and due to the rise in commodity prices and impairment to the chain of supply, which had started prior to the outbreak of the war, with the recovery from the Corona crisis, and which accelerated as a result of the war. In consequence thereof, inflation has increased significantly, leading to erosion in consumer income and forces the central banks to raise the interest rate at a fast pace, despite signs of slowdown in economic activity. The FED raised the interest rate to 1.5%-1.75% and started to reduce the balance sheet. At the same time, the ECB raised the interest rate by 0.5% to 0%. The US economy shrank in the second quarter by an annualized rate of 0.9%, and on the other hand, the GDP of the Eurozone recorded growth of 2.8%.
Financial markets. The first half of the year was marked by a high market volatility level, and closed with steep price falls in the equities market. This in light of the monetary policy of the central banks, which have acted decisively to rein in inflation, and the fear of a recession.

The changes in selected share indices recorded in the first half of the years 2021 and 2022

Index	2022	2021
500 S&P	(20.6%)	12.3%
DAX	(20.2%)	10.5%
MSCI Emerging Markets	(18.8%)	6.7%

Against the background of the central bank's actions to rein in inflation and the steep interest hikes, an increase of approx. 150 basis points occurred in yields on 10-year US government bonds and in yields on the equivalent German bonds.

The returns on government bonds

10Y Government Bond Yields	June 30, 2022	December 31, 2021
U.S.A.	3.0%	1.5%
Germany	1.3%	(0.18%)

In total for the first half of the year, the US dollar strengthened, on the background of the relatively solid state of the US economy, and in the light of the fast increase in the interest rate. Consequently, the dollar basket (DXY) strengthened by a rate of 9%.

Changes in the U.S. dollar against selected currencies in the first half of the years 2021 and 2022

Exchange rate	2022	2021
EUR	7.80%	3.90%
JPY	17.90%	6.60%
GBP	10.0%	(1.1%)

On the background of the recovery from the crisis, impairment of the chain of supply and the war between Russia and the Ukraine, steep increases were recorded in price of commodities, with an increase in oil price to a level of over US$100 per barrel, not remembered since 2014.

Changes in selected commodities indexes in the first half of the years 2021 and 2022

	2022	2021
The commodities index - GSCI	26.4%	14.2%
The oil price (BRENT)	47.6%	22.7%
The oil price (WTI)	40.6%	21.9%
Gold	(1.0%)	9.6%

Main Developments in the Israeli Economy

General

Following an especially strong growth[7] in the last quarter of 2021 (approx. 16%), the GDP recorded at the beginning of 2022, contraction at an annualized rate of 1.8%. Except for the investments component, regression is noted in all applications, while imports continued to grow at a fast rate. Investments in fixed assets recorded a moderate growth, in view of the impressive increase in investments in residential construction (approx. 24%) for the fourth consecutive quarter, while investments in machinery and equipment and in motor vehicles have contracted.
Over the first half of the year, the "broad" unemployment rate stood at an average level of 5%, compared to 7.3% in the second half of 2021, with the "narrow" unemployment rate amounting to 3.5%. The low unemployment rate and the high rate of vacant positions reflect the tight labor market.

7 The economic growth data for the second quarter of 2022 have not as yet been published at date of publication of this Report, and, accordingly the data in this respect relate to the first quarter.

Developments in economic sectors

In the first half of 2022, the turnover of economic sectors recorded moderate growth, compared to the second half of 2021, reflecting the exit from the Corona crisis. Notwithstanding that, a relatively fast growth in turnover, continued during that period with respect to hotel and catering, information and communication and professional and scientific services sectors.

Developments in the activity of the Israeli economy with overseas markets

Significant growth was recorded in the months of January-May 2022, in direct investments in Israel (through banks) by foreign residents, as compared to the first half of the previous year. Notwithstanding, a sharp regression took place in financial investments by foreign residents in marketable securities, as a result of a decline in a large number of components. A significant change had occurred in investment by foreigners in government bonds in Tel-Aviv, which dropped at an especially high volume compared to the first half of 2021, and recorded a net negative investment. Concurrently, a net negative flow was recorded in investments by Israeli residents in foreign equities, compared to a high level in 2021.

Changes recorded in investments of the Israeli economy abroad

Investments in Israel by foreign residents	January-May 2022	January-June 2021
	US$ million	
Total direct investments through banking system	8,341	6,370
Total financial investments	8,239	20,490
Of which: Government bonds and MAKAM	4,250	12,485
Shares	3,791	5,322

Investments abroad by Israeli residents	January-May 2022	January-June 2021
	US$ million	
Total direct investments through banking system	133	811
Total financial investments	(1,884)	9,432

Developments in inflation and foreign exchange rates

Against the background of a global trend of accelerating inflation, concurrently with opening the economy to full activity, the tight labor market and the weakening of the shekel, inflation has continued to accelerate. In June 2022, the inflation reached an annual rate of 4.4%, compared to 1.7% in June of 2021. The core inflation (not including energy, fruits and vegetables) also increased to an annual rate of 3.8%. Concurrently, a sharp rise has been recorded in inflation expectations for all time ranges, and for the short term in particular – from approx. 2.4% per year at the end of 2021 to approx. 3.2% at the end of June (index contract).
During the first half of the year, the shekel devalued sharply against the dollar by a rate of 12.5% and of approx. 7% against the currencies basket. This, as a result of declines on overseas equity markets and the global strengthening of the dollar.

Fiscal and monetary policy

Fiscal policy. The budgetary surplus for the 12 months that ended in June 2022 stood at 0.4% of the GDP, against the background of growth in tax revenues at the same time as a decline in expenditure. Compared to the corresponding period last year, tax revenues in the first half of the year increased by 17.5%, with direct taxes – and, in particular, the contribution made by taxes on real estate – rising by 25%. Concurrently with the rise in revenues, government expenditure fell by 11.8% due to a sharp decrease in expenses for the emergency economic plan.

Monetary policy. During the first half of 2022, the Bank of Israel raised the interest by 0.65%, from a level of 0.1% (which had been in effect since 2020) to a level of 0.75%. In addition, as part of the policy of monetary restraint, bond purchasing has ceased and the scope of foreign currency purchases has been very limited.

Change in the monetary base. During the first half of 2022, a moderate increase was recorded in the M1 money supply (cash in the hands of the public and shekel current-account deposits), 2.87% compared with a rise of 9.2% in the corresponding period last year. The slowdown in the rate of growth stems both from the cash and current account deposits components, which recorded a growth rate of approx. 4% and approx. 2.5%, respectively.

Stability was recorded in the monetary base in the first half of 2022, compared to an increase of approx. NIS 23 billion in the corresponding period last year, a trend agreeing with the change in the monetary policy. Absorption by the Government was recorded in this period, which was offset by the inflow of cash by the Bank of Israel in a similar scope. Absorption was recorded in this period by means of the Bank of Israel operations on the open market (MAKAM), in while the tenders for shekel deposits were reduced.

Sources for the change in the monetary base in the first half of the years 2021 and 2022

	2022	2021
	In NIS billion	
Operations on the Capital Market	(19.8)	7.3
The Shekel deposits tender	55.0	(51.0)
Monetary loans	-	17.7
Foreign currency conversion	1.1	81.7
Government activity	(37.4)	(33.5)

Capital market

In accordance with the global trend, the local capital market has seen prices fall, although at significantly more moderate rates. This, at a high level of volatility.

The changes recorded in selected share indices in the first half of the years 2021 and 2022

	First half	
Index	2022	2021
TA 35	(8.0%)	7.0%
TA 125	(9.1%)	6.1%
TA banks	(7.2%)	15.6%
TA Global-Blutech	(25.8%)	8.8%
Real-estate 15	(17.9%)	3.2%

Trading in government bonds in Israel was characterized by rising yields, similarly to the global trend, of approx. 150 basis points, for 10-year, to a level of approx. 2.7%. The rise in the shekel yields was accompanied by a sharp rise in real interest, over the whole length of the graph, alongside an increase in short-term inflation expectations.

The changes recorded in selected bond indices in the first half of the years 2021 and 2022

	First half	
Index	2022	2021
General bonds	(5.6%)	0.3%
General Government bonds	(6.6%)	(0.8%)
Shekel Government bonds	(6.5%)	(1.5%)
Linked Government bonds	(6.8%)	0.4%
General Corporate bonds	(4.2%)	2.1%
Linked Corporate bonds	(5.0%)	2.2%
Shekel Tel-Bond	(4.9%)	0.3%

During the first half of 2022, the corporate bond market recorded a decline of approx. 6% and of approx. 5% in the TelBond 60 and in the shekel TelBond, respectively, with slight fluctuations in margins. The volume of issues by Israeli corporations amounted to approx. NIS 41 billion, of which approx. NIS 21 billion, excluding banks, insurance and finance corporations. This as compared to approx. NIS 23 billion and approx. NIS 19 billion, respectively, in the corresponding half last year.

The asset portfolio held by the public

The value of financial assets held by the public portfolio declined in the months of January and May 2022 by 3.4%, on the background of declines in all linkage segments, excluding the foreign currency segment, amounting at the end of the period to approx. NIS 4.9 trillion. The decline in the value of the portfolio is explained, to a large extent, by a decrease in value of foreign equities, the value of equities in Israel and the CPI linked segment. On the other hand, stability was recorded in the shekel segment and the value of the foreign currency linked component increased in view of the devaluation of the shekel.

Distribution of the asset portfolio held by the public

	June 30, 2022	December 31, 2021
Shares	26.5%	28.1%
Non-linked assets	37.7%	36.5%
CPI linked assets	24.8%	25.1%
Foreign currency linked assets	11.0%	10.5%

Principal economic developments in July-August 2022[8]

In Israel, the budgetary surplus for the twelve months ended in July 2022 increased to 0.6% of the GDP. In view of the continuing rise in the inflationary environment and the significant inflationary pressures, the FED raised the interest rate in July by 0.75% to a level of 2.25%-2.5%, and concurrently, the ECB raised the interest rate from -0.5% to 0%.
The Bank of Israel has also raised the interest rate by 0.5% to a level of 1.25%, this, as part of the global policy.
In view of increasing concerns regarding recession, a reduction in prices of commodities was recorded since the middle of June. Concurrently, estimates increased that the central banks would slowdown the pace of monetary restraint, and as a result, an upward trend was recorded in the equities markets, alongside a reduction in yields on government bonds.
During the period, the TA 125 Index rose by approx. 8.7%, and the S&P500 rose by approx. 9.4%. The rise in share prices abroad, led to the strengthening of the shekel by approx. 5% against the US dollar, and by approx. 7% against the Euro.
The decline in shekel yields was coupled with a decline in real yields, alongside a decline in inflationary expectations (mainly for the short to medium-term range). The inflationary expectations grossed-up in the CPI contracts have also declined to a level of 2.8% per annum, compared to 3.2% at the end of June and approx. 3.4% in the middle of the month. The decline in the inflationary expectations matches the trend in the US bond market and was also supported by the strengthening of the shekel. Shekel yields for ten years fell from a level of approx. 3.3% in the middle of June to approx. 2.6% at the end of the period.

8 All data relate to the period from July 1, 2022 and until August 8, 2022.

Legislation and Supervision

Following is a summary of legislation changes and relevant legislation initiatives during the reviewed period, which affect or might have a significant effect on the Bank's operations.

Legislation for increasing competition in banking and financial services

Strengthening Competition and Reducing Concentration in the Israeli Banking Industry, (legislation amendments) act, 2017

The Act prescribes, inter alia, prohibiting of a bank, the value of its balance sheet assets on a consolidated basis exceeds 20% of the total balance sheet assets of the banking industry ("a bank with Wide-Ranging Activity"), from engaging in operating the issue of debit cards, from clearing of transactions made by debit cards and from controlling or holding means of control in a corporation engaged in the said operations. In the period from the end of four years from the beginning date (namely, from February 1, 2021) and until six years from this date, the Minister of Finance is authorized to determine, with the consent of the Governor of the Bank of Israel and with the approval of the Finance Committee of the Knesset, that, restrictions shall apply also to a banking corporation which holds less than 20%, though not under 10%, and this taking into consideration, inter alia, the state of competition existing in the credit market.

It was further determined in the Act, that during a transitional period beginning on the beginning date and ending at the end of five years from the said date, and with respect to a bank having a Wide-Ranging Activity – until the end of three years from date of separation or until the end of five years from the beginning date, whichever is later ("the transitional period"), restrictions shall apply to a bank issuing debit cards and which immediately prior to date of publication of the Act had controlled or held means of control in a debit card company, as follows:

- A bank shall conduct the issuance operation of charge cards issued by it by means of an operating company, and shall allow the operating company to become a part to the charge card agreement.
- As from the termination of a period of two years from date of publication of the Act and until the end of the transitional period, the bank shall not conduct, by means of one operating company, the issuance operation of more than 52% of the total new credit cards issued by the bank to its customers. The Minister of Finance is authorized to change the said rate at any time during the transitional period under the terms prescribed in the Act. The engagement of a bank with an operating company, for the purpose of conducting the issue operation of new credit cards issued by the bank to its customers shall be made only after conducting a process which allows every operating company the proper and fair opportunity to offer its services.

It was also determined that during the transitional period, also the following instructions will apply to a bank having a Wide-Ranging Activity which issues charge cards, additional instructions, inter alia, with respect to the division of income derived from issue operations of charge cards and from the activity of customers using charge cards, between a bank, as stated, and the charge card company; to the date of approach to the customer regarding the renewal of the Credit card; to restrictions regarding the total of credit facilities in charge cards of its customers.

The Committee for the examination of competition in the credit market. In accordance with the law, a committee was formed for the examination of competition in the credit market has been determined, which would monitor the implementation of the Act since the beginning date, and until the end of six years since the said date. The duties of the committee are: conduct periodic examinations regarding the state of competition in the credit market and locate barriers in respect of development of competition in this market; to monitor the implementation of the provisions of the Act; to recommend in the matter of activating the authority of the Minister of Finance in respect of extending to additional banking corporations the prohibition on engagement in the operation of issuance and clearing of charge cards, on the control of or on the holding of means of control in a corporation engaged in the said operations.

A measurable test for the measuring success in increasing competition in the banking sector. In accordance with the Law, on October 25, 2017, the Committee for the Examination of Competition in the Credit Market published measurable tests for the examination of success in increasing competition in the banking market. These tests will serve as a basis for a semi-annual analysis and for the report that the Committee will submit to the Economic

Committee of the Knesset, and are also expected to serve the Committee when recommending measures for improvement and increase in competition in the market, including also the matter of exercising the authority of the Minister of Finance, under the Strum Act, to change the definition of ”a bank with Wide-Ranging Activity”. The Committee retains the right to change, add or reduce tests. A set of general tests have been determined, as well as an additional test relating to the Bank and ICC.
The Committee has determined tests of different types, including – tests for the removal of entry barriers and transfer barriers for customers; tests examining the entry of new competitors and customer activity; tests regarding the distribution of market shares, volume and prices; tests regarding means of payment.
A test for the Bank and ICC. The Committee decided to test whether the cumulative rate of change in credit balances (excluding large business and operations abroad) of the Discount group at the end of 2020 would be in the range of 2.5 to 4.5 percentage points over the cumulative rate of change of the other four large banking groups and the two credit card companies that had been separated. This test would be monitored on a semi-annual frequency. It has been clarified that this test, as all other tests, would serve the Committee as indication for a decision regarding the detachment of ICC from the Bank, though in any event, the Committee retains discretion in the matter.
The third report by the Committee examining competition in the credit market. This report was published on August 16, 2021. Inter alia, the report points out that since the beginning of the Reform, significant progress had been made in reducing barriers to competition, which forms an essential condition for the growth in competition. This progress has been slowed down following the publication of the second report, both due to the Corona period and in consequence to the political uncertainty prevailing during the reviewed period. In the first place, the progress includes the gradual materialization of a digital bank using a computer services facility, as well as providing the possibility of conducting online additional operations (both by engagement with banking institutions as well as with off-banking providers of credit, among which are regulated bodies). In addition, the report included reference to the ICC-Discount test – on the one hand, the analysis shows the clear conformation of the Discount Group with the lower end of the defined test. On the other hand, the prominent trend in the competition image is the reduction in activity of Hapoalim Bank in the consumer sector and the growth in credit to large businesses. It is further noted, that the Committee had decided not to analyze ICC and Discount in a singular manner, except for their conformation with the test that had been determined at the time.
Rate of cumulative change in the actual balances of credit. The Discount Group's credit has grown at a rate of 35.9% during the years 2016 through 2020 (total credit, net of large businesses and overseas), while the four major banking groups and the two separated credit card companies grew at a rate of 18% in the same period. Namely, the rate of cumulative change in the aforesaid credit balances of the Discount Group was 17.9% higher than the system.
For additional details, see the Note 17 B 1 to the condensed financial statements.

Economic Competition

Approach by the Competition Authority in the matter of the joint relationships between ABS and BCC and the prima facie existence of a restrictive agreement. On April 12, 2022, the Competition Authority made an announcement, according to which, the Competition Tribunal had fully endorsed the agreed outline for the separation of the companies, formed in cooperation with the Payments Division of the Bank of Israel. In accordance with the outline, the staff and offices of these companies would be separated by August 2022, most of the applicative developments enabling increasing competition between the companies would be separated by the end of 2023, the infrastructure of the companies would be separated by the end of 2024, and the computer hardware of the companies would be separated by the end of 2027.

Climate Bill Memorandum, 2022

On May 8, 2022, the Committee of Ministers on Legislation approved the Climate Bill Memorandum, 2022. The aim of the proposed Bill is to create an integrative framework for the confrontation with the climate crisis, in accordance with international commitments of the State of Israel, including goals for the reduction in emission of greenhouse gases, energetic efficiency and expansion of use of renewable energies. Within the framework of the Act, an independent expert committee will be set up to follow the treatment of the matter by the Government, and also control and reporting mechanisms will be establishment. Adoption of the Bill and the goals to be determined therein, may have an impact on the environment risk management of the Bank, both as part of determining the risk appetite, and as part of the Bank's policy in various areas, including: credit, market and relevant risk management investments, including the credit policy, operational risk management and market risks management.

Legislation and Regulation Amendments relating to the Capital Market

Temporary directive for mutual fund managers and trustees pursuant to Section 65A of the Joint Investment in Trusts Act regarding assets that may be acquired and held in a hedge fund trust. The temporary directive was published by the Israel Securities Authority on July 14, 2022, in order to encourage public accessibility to investment in hedge funds within the supervised framework of a trust fund. The directive sets out a framework of rules for the activity of a hedge fund trust, including removing the investment, diversification and leverage restrictions that currently apply to a trust fund. The temporary directive will be in effect for a year and a half, with an option to be extended for a further year, with this being subject to the time constraints prescribed in Section 65A of the Joint Investment Trusts Act. In order to allow customers to purchase the security and hold it, operational preparation of the banks is required.

Various Legislation Matters

Provision of pension consulting services over digital channels. On June 22, 2022, a government bill – Supervision of Financial Services Act (Pension Consulting, Marketing and Clearance System) (Amendment No. 11), 2022 – was brought before the Knesset, the aim of which is to enable banking corporations to provide pension consulting services also over digital channels and not solely in a face-to-face format. Furthermore, on July 21, 2022, the Capital Markets, Insurance and Savings Authority renewed its announcement that it will not take enforcement measures against banking corporations that will provide pension counseling services by digital means or by telephone to existing customers in the pension counseling field. This position will be in effect until the end of three months from the day of the 25th Knesset's assembly.

Payment Services (Exemption from the provisions of the Act) Regulations, 2022. The Regulations took effect on April 13, 2022, in which it is stated that the prohibition to deduct a commission or any other charge from the funds for which a payment order was issued, does not apply when the payment operation is carried out from a payment account or to a payment account managed by a supervised payment service provider, for which the payment order is transmitted through the 'Swift' system. The aforementioned exemption will not apply to a commission or other charge that, according to the payment order, the payer chose to bear himself and that the payment service provider collects from the payer himself. Furthermore, a temporary exemption has been added, until October 14, 2023, from various provisions in the Payment Services Act, for an immediate debit payment method that is not intended for the use of a particular payer that can be accumulated up to an amount determined by the regulations and without reloading and for an immediate debit payment card that can be reloaded subject to an accumulation ceiling established in the regulations, which is limited in the purchase options allowed to it and requires its physical presentation, which was issued for the use of a payer who is not a specific payer and delivered to a specific payer through a governmental body or a non-profit corporation as part of economic assistance.

Amendment No. 23 to the Equal Rights to Persons with a Disability Act. The Amendment took effect on July 13. 2022, with the aim of improving the enforcement abilities of the Commissioner of Equal Rights to Persons with a Disability. In this framework, the authority of the Commissioner had been extended to include the filing of an action on behalf of a person with a disability; supervisory authority and the authority to impose administrative penalties in case of violation of the accessibility instructions. The amounts of the monetary sanctions may vary between NIS 12,500 and NIS 37,500. To these amounts may be added additional sanctions in cases of prolonged violation and recurring violation.

Draft Banking Order, (customer service) (supervision of operation services by a clerk, operation in a direct channel, extended track and extended track plus), 2022. The draft was published on March 9, 2022, and in its framework, it is proposed to impose supervision on banking services: operation by a clerk, operation in a direct channel and the services of the tracks - extended track and extended track plus (basic track is already under supervision). According to the explanation, the Bank of Israel wishes to bring the aforementioned services under supervision out of considerations of the public interest and out of a desire to monitor the existing price level and make sure that no changes are made in the existing situation without the approval of the Supervisor of Banks. It should be noted that the meaning of the supervision is that the supervisor is authorized to determine by an Order the price of the services, a maximum price, or a prohibition on charging a commission in their respect. In addition, a banking corporation that requests an increase in the rate of said services compared to the prevailing price at the time of the issuance of the Order, will be required submit a request to the Supervisor of Banks. The Supervisor will be entitled to request additional details, approve the increase or reject it.

Directives of the Supervisor of Banks

Proper Conduct of Banking Business Directive No. 427, in the matter of "advanced payments services". The Directive, published on June 13, 2022, contains rules applying to those managing current accounts and issuing charge cards with respect to the manner of presentation of information regarding payment transactions made through the payments application, with the aim of enabling customers to improve follow-up of the transaction in their accounts. The information regarding payment operations shall be presented on the page showing movement in the account and on the communication channels available to the customers. According to the Directive, a payment application managed by a banking corporation has to present the required information details.

Proper Conduct of Banking Business Directive No. 460, in the matter of "presentation of activity data in a securities deposit". The Directive, published on December 26, 2021 and amended on June 13, states a uniform format for the presentation to the customer of information and data regarding his securities deposit with the banking corporation. In this framework, it is stated how information should be presented to customers regarding yields on their securities deposit, the assets included therein, the commissions paid by the customer for the service, the manner of delivery of information to customers who are not subscribers to online services, the reporting currency, the manner of calculating yields on the securities deposit and more. In addition to the presentation of current information, a uniform framework was defined for more extensive quarterly information provided to customers, including customers obtaining consultation. The Directive will take effect on January 1, 2023, and the first report would be presented for the first quarter of 2023.

Draft Proper Conduct of Banking Business Directive regarding a banking corporation's broker-dealer activities. An updated draft of the directive was distributed on April 10, 2022. The aim of the draft is to create a regulatory framework for the activities of banking corporations in the field of financial brokering, with regard to the receipt and transfer of orders for executing transactions in securities for customers, both in their activities as brokers and also by way of trading on their own account (broker-dealer activity). The draft includes various amendments including to the Bill Memorandum for Regulating Activity in Broker-Dealer Services, which the Israel Securities Authority published in 2018, with the aim of applying uniform principles for all the bodies engaged in broker-dealer activities in Israel. The draft is expected to replace Proper Conduct of Banking Business Directives Nos. 461 and 419 and expand their purview on the basis of generally accepted global standards.

Details regarding new Proper Conduct of Banking Business Directives (or draft Directives) were provided in the chapters "Description of the Activity of the Group According to Segments of Operation – additional details", "Human Capital" above and in the Document "Disclosure according to the third pillar of Basel and additional information regarding risks" available for review on the Internet.

For further details regarding "Legislation and Supervision", see the 2021 Annual Report (pp. 405-429) and the "Disclosure according to the third pillar of Basel and additional information regarding risks" document, which is available for perusal on the Bank's website, on the MAGNA site of the Israel Securities Authority and on the MAYA site of the Tel Aviv Stock Exchange Ltd.

Legal Proceedings

Material claims outstanding against the Bank and its consolidated subsidiaries are described in the 2021 Annual Report (pp. 430-431) and Note 10 to the condensed financial statements.

Additional Legal Proceedings

1. On March 27, 2017, ICC received notice of a lawsuit filed against it with the Lod-Central District Court, together with a motion for approval of the action as a class action suit. The Plaintiff claims that in accordance with the letter of the agreement between it and ICC, where a transaction had been cancelled prior to the crediting of the trading house, ICC is not entitled to charge the trading house with the full amount of the clearing commission, unless in cases where the transaction had been effected manually and not by use of the electronic POS instrument. Alternatively, the Plaintiff argues that a contractual instruction permitting ICC to charge in full the clearing commission also where the clearing service had not been rendered in full (due to cancellation of the transaction), comprises a "discriminating term in a uniform contract", that has to be abolished or changed. The Plaintiff estimates the damage caused to all class members at NIS 45 million.
   A preliminary hearing of the case was held on March 28, 2019. The parties had conducted mediation proceedings in which they were not successful in concluding the dispute by agreement. Therefore, summing-up briefs have been filed with the Court.
   On May 25, 2020, the Court admitted the motion for the conduct of the case as a class action suit.
   In accordance with the Court's recommendation, the parties entered into mediation, and, on January 6, 2022, the Court was presented with a motion to approve a settlement arrangement with regard to the case. On May 24, 2022, the Attorney General to the Government submitted her position to the Court, according to which, the Attorney General does not object to the approval of the arrangement.
2. On August 7, 2017, a claim and a motion for its approval as a class action were filed at the District Court in Tel-Aviv against MDB. It is alleged in the motion that MDB charges fees for drawing up guarantee documents when extending a guarantee's validity, contrary to the contractual arrangement between the customer and the Bank, and it was notes that the estimated amount damages by all the members of the class is approx. NIS 24 million. On January 11, 2022, a ruling was given approving the conduct of the claim as a class action. On February 3, 2022, MDB filed with the Supreme Court a motion for permission to appeal against the decision to approve the action as a class action suit, and at the same time a motion for the stay of execution of the decision was also filed. On March 6, 2022, the Supreme Court ruled that the motion for permission to appeal requires an answer and issued a temporary stay of execution Order. On June 8, 2022 a decision was taken according to which, the motion for permission to appeal would be fixed for hearing before a composition of judges, and a stay of execution Order was issued until the Court decides in the matter. A hearing was fixed for September 7, 2022.
3. An action against the Bank and two additional banks was filed on November 19, 2018, with the District Court Central Region together with a motion for approval of the action as a class action suit. It was stated in the motion that at this stage it is not possible to estimate the amount of the damage to all members of the class, though the amount exceeds NIS 3 million. The subject matter of the motion was the transaction for the withdrawal of cash by means of a charge card, from a distant ATM operated by a bank that had not issued the card. The Claimants argue that in such transactions only the bank operating the ATM is entitled to charge a commission, while the issuer bank of the card has no right to charge an additional commission in respect of the transaction. It is argued that, in practice, the customer pays two commissions: one commission to the operating bank in respect of the withdrawal of cash from its ATM and an additional commission for a direct channel transaction charged by the issuer bank of the card.

On November 1, 2020, the Court decided to hear the action as a class action. On December 1, 2020, a motion for leave to appeal against the ruling to approve the claim as a class action was filed with the Supreme Court. On October 26, 2021, the position of the Attorney General was submitted, which supports the Bank's position. In the hearing of the motion for permission to appeal held on July 25, 2022, the Court decided to admit the motion for permission to appeal, abolished the decision of the District Court of November 1, 2020, and dismissed the motion for approval of the action as a class action.

For additional details, see the 2021 Annual Report (pp. 430-431).

Material Legal Proceedings settled in the first half of 2022

1. For details regarding the motion for approval of a claim as a class action suit, in which the Court decided on January 26, 2022, to admit the motion for withdrawal of the Claimant, see Note 10, section 3.1 to the condensed financial statements.
2. For details regarding the decision of the Supreme Court to admit the motion of the Bank for permission to appeal in the matter of approval of an action as a class action, see above "Legal proceedings", section 3.

Proceedings regarding Authorities

1. **Demand for data – The Competition Authority.** A request for further data was received in the first half of 2022, by MDB and by the Bank, with respect to banking services provided to customers in the Arab sector.
2. **Privacy Protection Authority.** The Authority announced on February 16, 2020, the starting of a regulatory administrative process under the Privacy Protection Act, for the examination of circumstances of the PayBox event. On October 1, 2020, the Authority sent the Bank a letter determining allegedly breach of the Privacy Protection Law. The Bank submitted its response in writing on December 9, 2020 and had requested an additional oral hearing. The Privacy Protection Authority has consented to the request of the Bank to hold a viva voce hearing. The hearing was held on October 21, 2021.
3. On February 6, 2020, ICC received a demand for information from the Competition Authority, under Section 46(b) of the Economic Competition Act, 1988, with respect to trading houses receiving from ICC or from a related entity, debit card clearing services. In continuation thereof and following the data that had been delivered, further demands were received, this within the framework of an investigation that was conducted by the Authority in the matter.
   ICC provided the required data and is conducting negotiating with the Authority with respect to concluding the investigation by way of an agreed Order, that will include a monetary payment on the part of ICC. As assessed by ICC, the aforesaid payment is not expected to have an effect on the company's reports.
4. **Imposition of financial sanction.** On December 28, 2021, the Supervisor of Banks notified ICC of his intention to impose on it a financial sanction of NIS 1 million for its alleged violation of Section 11(a) of Proper Conduct of Banking Business Directive No. 470, pursuant to which a card issuer shall not charge a customer for transactions conducted after termination of the charge card contract. The Supervisor of Banks informed ICC on May 8, 2022, of his decision to impose upon it a monetary sanction in the amount of NIS 650 thousand.
5. On July 4, 2022, the Bank and MDB received a notice pursuant to Section 8A(a) of the Banking Ordinance with regard to repeated deficiencies in the removal of pledges following the settlement of the charges, for which the pledges were registered. The banks have taken the necessary steps to comply with the requirements specified in the notice.

For additional details, see the 2021 Annual Report (p. 432).

Total interest expenses	**69**	**119**	**188**
Interest income, net	**282**	**106**	**388**

Footnotes:

(1) The data is presented after the effect of hedge derivative instruments.

(2) Based on monthly opening balances, except for the non-linked shekels segment in respect of which the average balances are based on daily data.

(3) Before deduction of the average stated balance of allowances for credit losses. Including impaired debts that do not accrue interest income.

(4) From the average balance of bonds held to maturity was deducted (added) the average balance of profits (losses) included in equity as part of accumulated other comprehensive income in the item "Adjustments regarding the presentation of available-for-sale securities at fair value" in respect of bonds transferred from the available-for-sale portfolio, in the amount of NIS 98 million.

(5) From the average balance of trading bonds and of available-for-sale bonds was deducted (added) the average balance of non-realized gains (losses) from adjustment to fair value of trading bonds as well as gains (losses) in respect of available-for-sale bonds included in shareholders' equity as part of accumulated other comprehensive income, in the item "Adjustments in respect of available-for-sale securities according to fair value" in the amount of NIS (3) million and NIS (987) million, respectively; 2021 – NIS (5) million and NIS 296 million respectively.

(6) Including derivative instruments and other assets that are not interest bearing and net of allowance for credit losses.

(7) Including derivative instruments.

(8) Net return – net interest income divided by total interest bearing assets.

(9) The quantitative impact has been computed by multiplying the interest margin by the change in the average balance between the periods. The price impact has been calculated by multiplying the average balance for the corresponding period last year by the change in the interest margin between the periods.

(10) The method of computing the quarterly rates of income and expenses in annual terms has been changed as from January 1, 2022, in accordance with the accepted practice at US banks. The comparative data was restated accordingly.

Appendix no. 3 - Additional details

1. Activity in derivative financial instruments

Credit risk involved in financial instruments. The Bank's activity in derivative financial instruments involves special risk factors including credit risks.
The uniqueness of the credit risk in such transactions stems from the fact that the stated amount of the transaction does not necessarily reflect its entailed credit risk. For further details see "General disclosure regarding exposure related to credit risk of a counterparty" under "Credit risk management".
Note 11 to the condensed financial statements presents details of operations in derivative instruments - scope, credit risk and maturities. Part B of the aforementioned Note presents details of credit risk with respect to derivatives by counter party, on a consolidated basis. Following are further details regarding data presented in part B of the aforementioned Note.

Appendix no. 3 - Additional details (continued)

1. Activity in derivative financial instruments (continued)

(1) Details according to rating of balance-sheet balances of assets derived from transactions in derivative instruments where the counterparty is a bank

Appendix no. 3 - Additional details (continued)

2. Details of the investment in government bonds

Note 5 to the financial statements includes, among other things, details regarding investments in government bonds included in the "held to maturity" portfolio, the "available-for-sale" portfolio and the "trading" portfolio, divided into bonds and loans of the Government of Israel and bonds and loans of foreign governments.

Details divided by governments with respect to the total securities portfolio

	June 30, 2022		December 31, 2021	
	Book value	Fair value[1]	Book value	Fair value[1]
	In NIS millions			
Of the Israeli Government	25,570	25,124	27,204	27,388
U.S. government	4,866	4,866	3,318	3,318
Other governments	166	166	262	262
Total	**30,602**	**30,156**	**30,784**	**30,968**

Footnote:

(1) Fair value data based on market prices, does not necessarily reflect the price that may be obtained on the sale of securities in large volumes.

Appendix no. 4 - Glossary

Option	A contract between two parties within the framework of which one of the parties (the option writer) grants the counterparty a right to acquire or a right to sell an asset specified in the contract, in consideration for a predetermined price on a date set in advance or prior thereto.
Bond	A security that includes a commitment by the issuer to pay the holder of the security (the bond) the principal specified in the bond with the addition of interest, on the dates prescribed or upon fulfillment of a certain condition (in accordance with the terms prescribed in the bond).
Least developed countries - LDC	Countries classified by the World Bank in a low or medium income group.
Regulatory capital	The capital components used in calculating the stability ratios (e.g., capital adequacy) and consisting of two tiers: a. Tier 1 capital that comprises the accounting common equity after regulatory adjustments (as defined in Proper Conduct of Banking Business Directive No. 202). b. Tier 2 capital that mainly comprises capital debt instruments and other regulatory adjustments.
Indebtedness	Credit and commitments to provide credit (balance-sheet and off-balance-sheet) as defined in Proper Conduct of Banking Business Directive No. 313.
Special mention debt	A debt that has potential weaknesses for which Management's special attention is required, and which, if not attended to, might adversely affect the repayment of the credit or the position of the Bank as a creditor.
Problematic debt	A debt that is classified as "non-accruing", "substandard" or under "special mention".
Substandard debt	A debt that is inadequately safeguarded by collateral or by the solvency of the debtor, and in respect of which there is a distinct possibility that the Bank will sustain a loss, if the deficiencies are not rectified.
Impaired debt	A debt in respect of which the Bank expects that it will be unable to collect the amounts due to it from the debtor, on the dates prescribed under the debt agreement.
Collateral dependent debt	A non-accruing debt whose repayment, in the Bank's opinion, is expected from the realization of only the collateral provided to secure the said debt, since the debtor has no other available resources for its repayment.
Total capital adequacy ratio	The ratio of the total capital resources (Tier 1 and Tier 2) to the Bank's total risk weighted assets.
Recorded amount of a debt	The balance of a debt, including accrued interest that has been recognized, any premium or discount that has not yet been amortized, deferred net fees and commissions or deferred net costs that have been added to the debt balance and have not yet been amortized, net of any part of the debt that has been subject to an accounting write-off.
Basel instructions	The instructions for the management of banks risks that have been prescribed by the Basel Committee that deals with supervision and the setting of standards for the supervision of the world's banks.
Subordinated debt notes	Debt notes, in which the rights conferred thereunder are subordinate to claims by the rest of the Bank's creditors, except for other debt notes of the same class.
Off-balance-sheet credit instruments	Debt instruments such as commitments to provide credit and guarantees (not including derivative instruments).
Derivative instrument	A financial instrument or other contract that contains three cumulative features: a. A basis and nominal value that determine the settlement amount of the instrument. a. The net initial investment required is less than that would be required in other types of contracts that are exposed in a similar manner to changes in market factors (or where no investment is required). b. Its terms require or permit net settlement.
Forward looking information	Some of the information detailed in the directors' report, which does not relate to historical facts, comprises forward-looking information, as defined in the Securities Law, 1968. The Bank's actual results might differ materially from those indicated in the forward-looking information, due to a large number of factors, including, among other things, macro-economic changes, changes in the geo-political situation, regulatory changes and other changes not under the Bank's control, and which may result in the non-realization of the estimates and/or in changes in the Bank's business plans.

Appendix no. 4 – Glossary (continued)

Forward looking information (continued)	Forward-looking information is typified by terms and words like: "believe", "anticipate", "estimate", "intends", "prepares to...", "might" and similar expressions, in addition to nouns such as: "desire", "anticipation", "intention", "expectation", "assessment", "forecast", etc. Such forward-looking expressions involve risks and uncertainties as they are based on evaluations by Management as to future events, which include, among other things, evaluations as to the state of the economy, public preferences, domestic and foreign interest rates, inflation rates, etc. as well as regarding the effects of new legislative and regulatory provisions relating to the banking industry and the capital market and to other fields that have an impact on the Bank's activity and on the environment in which it operates, and that by the nature of things, their realization is uncertain. The information presented below relies, among other things, on information in the Bank's hands, inter-alia, publications by other entities such as the Central Bureau of Statistics, the Ministry of Finance, the Bank of Israel, the Ministry of Housing and other entities that publish data and assessments as to the Israeli and global financial and capital markets. The above reflects the Bank's and its subsidiaries point of view at the time of preparation of the financial statements as to future events, based on evaluations that are uncertain. The evaluations and business plans of the Bank and its subsidiaries are derived from such data and assessments. As stated above, actual results might differ materially and impact the realization of the business plans or bring about changes in these plans.
Financial instrument	Cash, evidence of the rights of ownership in a corporation, or a contract that fulfills the following two conditions: a. The instrument imposes a contractual obligation on one party to transfer cash or another financial instrument to the second party, or to exchange other financial instruments with the second party under terms that might be unfavorable to the first party. b. The instrument grants the second party a contractual right to receive cash or another financial instrument from the first party, or to exchange other financial instruments with the first party under terms that might be beneficial to the second party.
Average maturity	A weighted average of the time to the principal repayment and to the interest payments of interest-bearing financial instruments.
Over-the-counter (OTC) derivative	Derivative instruments which are not traded on an official stock exchange and are created within the framework of an agreement between two counterparties.
Counterparty credit risk - CVA (Credit Valuation Adjustment)	The exposure to a loss that might arise if the counterparty to a derivative instrument transaction does not fulfill the terms of the transaction.
Active market	A market in which transactions in an asset or a liability take place with sufficient frequency and volumes as to provide information regarding the pricing of the assets or liabilities on a current basis.
Financing rate - LTV (Loan To Value Ratio)	The ratio of the approved debt facility, at the time of granting the facility, to the value of the asset that secures the debt, as approved by the Bank at the time of granting the facility, which is used in calculating the “capital adequacy”.
ICAAP (Internal Capital Adequacy Assessment Process)	The Bank’s internal capital adequacy assessment process. The process combines, among other things, setting capital targets, capital planning measures and examining the capital position under a variety of stress tests.
