## Group Overview

Discount Group completed the first quarter of 2021 with record adjusted net income of NIS 738m, strong adjusted ROE of $16.2 \%$, total equity of over NIS 20 bn , total assets of over NIS 300 m and a conservative reserve ratio of $1.83 \%$. This was, in part, driven by a recovering local economy that has benefitted from Israel's aggressive vaccination program and seen the number of positive cases fall to almost zero as well as by significant credit growth and continued strong non-interest financing income.

2020 saw consumers and businesses react quickly to COVID by modifying their behavior and adjusting their finances to the situation. One tool that they used was to request deferrals from the banking system as well as assistance from the government. Twelve months later we are seeing a return to normal with unemployment data trending lower and only a small percent of loans still in deferral. Discount's solid balance sheet and strong customer base have the Group well positioned to benefit as normalcy begins to return.

The Group's loan portfolio continues to grow increasing $5.7 \%$ YoY and $2.3 \%$ since the beginning of the year. We continue to execute on our strategy and achieved robust growth in both mortgages, up $15.7 \%$ YoY and $4.0 \%$ in the first quarter and in our corporate loan book, up $12.5 \%$ YoY and $1.8 \%$ QoQ. We continue to take a significant portion of mortgage generation market increasing our market share.

The growth of our loan book as well as our strong performance in non-interest income of NIS 298m up from NIS 148m in 4Q20 helped produce over NIS 2.5bn in Total Income in 1Q21. Our NII
of NIS 1.5bn was flat vs. 4Q20 and up $3.4 \%$ vs. 1Q20, this despite a continued benign interest rate and inflationary macro backdrop.

We maintained tight cost controls with total adjusted expenses reaching NIS 1.5 bn down $3.2 \%$ QoQ and up only $0.8 \%$ YoY. Our salary expenses were lower on the back of the largest ever early retirement program operated by the Group that, coupled with natural retirement saw a total of 754 employees retire from the bank. Salary and related expenses (excluding bonuses) were NIS 746 m similar to last quarter and down $4 \%$ YoY.

Negative provisions of NIS 147 m that represents a negative $0.30 \%$ credit loss expense ratio is among the clearest examples of how the economy is beginning to recover from the health pandemic that affected the globe. As was true throughout the pandemic, net write-offs remain low at $0.10 \%$ of the average balance of credit as compared with $0.19 \%$ at 31 December 2020 and $0.30 \%$ in 1Q20.

The Group continues to focus on its five year strategic plan having hit a number of achievements during the quarter including, completing our early retirement program, maintain high loan growth in targeted sectors, receiving recognition for innovation in retail banking and lastly, readiness to launch tokenization of credit cards in our leading digital wallet, PayBox.

## IDB NY:

IDBNY's 1Q21 results reflect signs of economic recovery in our core markets with robust loan growth, and an increase in fee income, specifically strong performance in client-related trading fees. These were partially offset by high provisions for loan losses related to the continuing impact of COVID. Our balance sheet remains strong with CET-1 of $13.9 \%$ enabling the bank to remain focused on executing its long-term strategy.
