**Appendix to Immediate Report – Regulation 37(a)(1) of the Regulations
Disclosure in Relation to the Board of Directors’ Decision to Distribute a Dividend in Accordance
with Regulation 37(a)(1) of the Securities Regulations (Periodic and Immediate Reports), 5730-
1970**

1. On March 8, 2022, the Bank’s Board of Directors approved a dividend distribution at the rate of 20% of the net profit for the fourth quarter of 2021.
2. The Bank’s Board of Directors has determined that the dividend complies with the distribution criteria prescribed in the Companies Law, 5759-1999 (the profit test and the solvency test) and is in conformity with Directive 331 of the Proper Conduct of Banking Business Directives in connection with restrictions on making a dividend distribution.
3. Regarding compliance with the profit criterion – the balance of profits, according to the meaning of this term in Section 302 of the Companies Law, prior to the distribution, exceed the amount that is to be distributed and total NIS 17,649 million.
4. Regarding compliance with the solvency criterion and with regulations to which banking corporations are subject – the Board of Directors has examined the effect of the distribution on the capital structure, on the capital adequacy and the leverage and liquidity ratios, basing their examination, inter alia, on forecasts for the coming year in relation to the Bank’s operating results in the year immediately following the dividend distribution. Pursuant to said examination, the capital adequacy ratio and the leverage and liquidity ratios will not be lower than the ratios required. The Board of Directors has determined that the distribution complies with the terms prescribed in Proper Conduct of Banking Business Directive No. 331 (Dividend Distribution by a Banking Corporation), that the dividend distribution has no material effect on the Bank’s financial position and that no concern exists that the dividend distribution will prevent the Bank from meeting its existing and anticipated obligations.
5. On September 30, 2021, a circular was published regarding an amendment to Proper Conduct of Banking Business Directive No. 250, within the framework of which it was stated, inter alia, that – despite increasing developments in exiting the coronavirus crisis – there is still a high level of uncertainty which impacts the banking corporations’ ability to predict their medium-term capital needs, and that the aforesaid uncertainty and risk necessitate the continuation of cautious and conservative tax planning. In the circular, it is clarified, inter alia, that the Supervisor of Banks’ position is that a distribution in excess of 30% of the banking corporation’s profits (in 2020 and 2021) will not constitute cautious and conservative capital planning.
6. Based on the aforesaid and after holding a discussion on this topic, and in accordance with the dividend policy approved on December 26, 2017, the Board of Directors has approved the distribution of the aforesaid dividend in an amount of NIS 105.8 million.

The information presented above includes forward-looking information as this term is defined in the Securities Law, 5728-1968. The Bank’s assessments regarding its operating results in the year immediately following the dividend distribution and the capital adequacy ratio and the leverage and liquidity ratios in this period, are based on an analysis of the Bank’s cash flows, the Bank’s existing obligations and scenarios that might negatively impact on its existing and anticipated liabilities. These assessments might not be realized, wholly or partly, or might be realized in a manner materially different than that expected, inter alia due to changes in market conditions and the materialization of any of the risks set forth in the Board of Directors Report as of December 31, 2021.
